**Comparing Law**

Catherine Valcke, 2018-10-25 The enterprise of comparative law is familiar yet its conceptual whereabouts remain somewhat obscure Comparing Law Comparative Law as Reconstruction of Collective Commitments reconstructs comparative law scholarship into a systematic account of comparative law as an autonomous academic discipline The point of that discipline is neither to harmonize world law nor to emphasize its cultural diversity but rather to understand each legal system on its own terms As the proposed reconstruction exercise involves bridging comparative law and contemporary legal theory it shows how comparative law and legal theory both stand to benefit from being exposed to each other At a time when many courses are adding a transnational perspective Valcke offers a more theoretical broadened and refreshed view of comparative law

Includes section Book reviews      *From Human Dignity to Natural Law* Richard Berquist,Jensen,2019-10-11 From Human Dignity to Natural Law shows how the whole of the natural law as understood in the Aristotelian Thomistic tradition is contained implicitly in human dignity Human dignity means existing for one s own good the common good as well as one s individual good and not as a mere means to an alien good But what is the true human good This question is answered with a careful analysis of Aristotle s definition of happiness The natural law can then be understood as the precepts that guide us in achieving happiness To show that human dignity is a reality in the nature of things and not a mere human invention it is

necessary to show that human beings exist by nature for the achievement of the properly human good in which happiness is found This implies finality in nature Since contemporary natural science does not recognize final causality the book explains why living things as least must exist for a purpose and why the scientific method as currently understood is not able to deal with this question These reflections will also enable us to respond to a common criticism of natural law theory that it attempts to derive statements of what ought to be from statements about what is After defining the natural law and relating it to human or positive law Richard Berquist considers Aquinas s formulation of the first principle of the natural law It then discusses the love commandments to love God above all things and to love one s neighbor as oneself as the first precepts of the natural law Subsequent chapters are devoted to clarifying and defending natural law precepts concerned with the life issues with sexual morality and marriage and with fundamental natural rights From Human Dignity to Natural Law concludes with a discussion of alternatives to the natural law      *Encyclopedia of Philosophy* Donald M. Borchert,2006 Presents a collection of alphabetically arranged entries that provide information on a wide range of topics related to philosophy including ethics religion history aesthetics logic metaphysics from Aristotle and the Greek Academy to modern concepts of feminist theory and philosophy of the mind      *Selected Acquisitions* Stanford Law Library,1969      **Law Books**
