Research in Education, 1973

The Process of Science, Revised Edition Anthony Carpi Anne Egger, 2011 Through a series of examples drawn from biology climate science geology environmental science and other disciplines the chapters in this book demystify the process of science and the work that scientists do The authors highlight the many methods used in science and the common characteristics that unite them all as science The examples illustrate that science is a human endeavor and research is enriched and enlivened by the diversity of scientists themselves This book is an excellent companion to any college level introductory science course emphasizing how we know what we know It will also serve as an invaluable resource for undergraduate students preparing to do research for the first time or for anyone who might be interested in learning more about the process of science and scientific research

Book blurb **Dialogues in Climate and Environmental Research, Policy and Planning** Innocent Chirisa,2020-07-03

Climate change is the topic of the century It is a subject of discussion by sceptics heretics and those that have immersed in it as a serious debate for engagement In this volume the matter is localised to the plateau bordered by the great rivers of Limpopo to the south and Zambezi to the north Evidence has it that climate change is inducing immense environmental change hitherto unknown including water stress and droughts heat waves and flooding The effects span across all sectors agriculture forestry engineering construction and other socio economic dimensions of life When an issue becomes such topical it becomes political but also courts policy debate The thrust of this volume is to explore into climate change as an environmental concern begging government attention and requiring prioritisation as a shaper of our future whether we set to put mitigation or adaptation measures in place or we choose to do nothing about it as sceptics would perhaps suggest The book explores climate change as a theoretical policy technical and practical debate as it affects sectors and rural and urban spatialities in Zimbabwe Contributions explore such themes as regional research gender disaster preparedness policymaking resilience governance urban planning risk management environmental law and the food water health energy climate change nexus

Bowen theory and develop a clearer knowledge of ways to navigate the challenges faced when studying individual familial and societal problems An essential resource for clinicians and researchers in the social and natural sciences the Handbook of Bowen Family Systems Theory and Research Methods provides a comprehensive framework for understanding the application of Bowen theory to family practice and family research *Project Independence* United States. Federal Energy Administration,1975 **Project Independence Blueprint** United States. Federal Energy Administration,1974 What is Project Independence The sources and uses of energy in the United States have changed dramatically in the last several decades As a result in just one generation we have shifted from a position of domestic energy abundance to a substantial and continually growing reliance on foreign energy sources Project Independence is a wide ranging program to evaluate this growing dependence on foreign sources of energy and to develop positive programs to reduce our vulnerability to future oil cut offs and price increases **Liability and Environment** Lucas Bergkamp,2021-12-06 Liability and Environment analyzes the role of law in particular civil liability in controlling environmental pollution and risk In modern environmental policy liability has become a popular instrument In this book Prof Bergkamp takes a fresh look at civil liability for environmental harm in an inter and transnational context Over the last decade industry s liability exposure for environmental harm has expanded significantly At the international EC and national level proposals for onerous strict environmental liability regimes are pending The polluter pays principle which is an articulation of the cost internalization theory in the environmental area is believed to justify such liability regimes Applying an instrumental approach to legal instruments Prof Bergkamp aims to redefine the role of liability in the heavily regulated environmental area He shows that liability for environmental harm is not justified by the polluter pays principle is an uncertain and unreliable instrument for achieving prevention results in an inefficient insurance scheme and plays a dubious role in adjusting activity levels Based on an analysis of the basic characteristics of alternative legal instruments Prof Bergkamp concludes that civil liability should play a more modest limited role in an environmental law system dominated by public law Where deterrence is not the objective first party insurance compensation funds or other public law regimes should be preferred over liability rules In addition to civil liability of private parties Liability and Environment discusses State liability under international EC and national law Under international law breach of a primary obligation triggers a State s liability Prof Bergkamp argues that this rule should be applied also to liability of private parties In the environmental area a business primary obligations are spelled out in detailed permit conditions regulations and statutes According to Prof Bergkamp only if a primary obligation is breached a private person should be liable for environmental harm The system that Bergkamp advocates is an objective fault liability regime in which public environmental law defines the standard of care for both government and industry In rebuilding our civil liability system we should keep in mind that what is good for industry should be good for everyone or it is not good for anyone we should keep in mind that what is good for private parties should be good for the state or it is not good for either In rebuilding

our civil liability system the international law of State responsibility which is unpolluted by risk spreading and activity level considerations will guide us a long way This book is aimed at advanced law students academic scholars and practitioners In addition it will be of interest to policy and legislative analysts legislators and government officials Professor Bergkamp s book cannot be described as solving the problems of legal and regulatory control of environmental harm whether within a nation or internationally As suggested before however the very idea of a solution is illusory All legal and regulatory regimes around the world are today and will remain for the future in a state of perpetually continuing development The virtue of this fine book is that it moves the process of that development forward by a very substantial measure from the Foreword by George L Priest

Nursing, Revised Edition Jean Watson, 2011-05-18 Jean Watson s first edition of Nursing now considered a classic introduced the science of human caring and quickly became one of the most widely used and respected sources of conceptual models for nursing This completely new edition offers a contemporary update and the most current perspectives on the evolution of the original philosophy and science of caring from the field s founding scholar A core concept for nurses and the professional and non professional people they interact with care is one of the field s least understood terms enshrouded in conflicting expectations and meanings Although its usages vary among cultures caring is universal and timeless at the human level transcending societies religions belief systems and geographic boundaries moving from Self to Other to community and beyond affecting all of life This new edition reflects on the universal effects of caring and connects caring with love as the primordial moral basis both for the philosophy and science of caring practices and for healing itself It introduces Caritas Processes and provides other energetic and reflective models to assist students and practitioners in cultivating a new level of Caritas Nursing in their work and world
