Multinational Crime The Challenge Of Terrorism Espionage Drug And Arms Trafficking:

Challenges of Policing Democracies Dilip Das, Marenin Otwin, 2012-10-12 In this text the editors analyze the diverse situations that police forces operate under and the challenges that they face in different kinds of democracies. This cross cultural comparison of various systems highlights the universal observation that police are an anomaly in a democracy and explores how various influences for example large scale social violence a zeal for crime fighting and vulnerability to temptation often find police incapable of behaving in a democratic manner. Challenges of Policing Democracies goes beyond just showing the similarities and differences of the policing challenges democratic societies face it also examines the responses and remedies adopted by police in various countries at different levels of democratic achievement and how every society struggles with the challenges of preserving democratic values without sacrificing the effectiveness of policing.

Of Fears and Foes Jose V. Cipurut, 2001-09-30 At the end of the deadliest century known to mankind the world still finds itself mired in bloodshed. In addition to formal inter state conflict we see an increase in other forms of organized violence including ethnic warfare terrorism civil conflict and internationally necessitated police actions. Cornered by these powerful global forces nation states continue their quest for security. There is a search plagued by futility since the very meaning of the word security is being eroded by the pace and tenor of change in an evolving international environment more complex and confusing than ever. The explanatory power of traditional notions of international security which has provided a cornerstone for international relations theory as a whole seems increasingly inadequate in helping to understand the makings of global security. A novel approach is needed one that integrates discerning insights from the study of language history geography religion economics and technology with more traditional understandings of the workings of power on an international level and on an intranational scale. Of Fears and Foes presents just this kind of innovative thinking by some of the most creative scholars working on these issues today. Cipurut invites us to consider a fundamental reassessment of what constitutes security and insecurity in an emerging global environment. Handbook of Transnational Crime and Justice

Philip Reichel, Jay Albanese, 2013-04-29 Transnational crime and justice will characterize the 21st century in the same way that traditional street crimes dominated the 20th century. Fatal Future? Richard M. Pearlstein, 2009-06-03 The nature and goals of terrorist organizations have changed profoundly since the Cold War standoff among the U S Soviet and Chinese superpowers gave way to the current polyplex global system in which the old rules of international engagement have been shattered by a new struggle for power among established states non state actors and emerging nations In this confusing state of global disorder terrorist organizations that are privately funded and highly flexible have become capable of carrying out incredibly destructive attacks anywhere in the world in support of a wide array of political religious and ethnic causes

This groundbreaking book examines the evolution of terrorism in the context of the new global disorder Richard M Pearlstein categorizes three generations of terrorist organizations and shows how each arose in response to the global conditions of its time Focusing extensively on today's transnational i.e. privately funded and internationally operating terrorist organizations he devotes thorough attention to the two most virulent types ethnoterrorism and radical Islamic terrorism He also discusses the terrorist race for weapons of mass destruction and the types of attacks including cyberterrorism that are likely to occur in coming years Pearlstein concludes with a thought provoking assessment of the many efforts to combat transnational terrorism in the post September 11 period

The Nexus Between Organized Crime and Terrorism Paoli, Letizia, Fijnaut, Cyrille, Wouters, Jan, 2022-02-18 In the post 9/11 era the nexus between organized crime and terrorism has raised much concern and has been widely discussed in both academic and policy circles but is still largely misunderstood This critical book contributes innovatively to the debate by distinguishing three types of nexus interaction transformation imitation and similarities and identifying the promoting factors of each type

Crime-terror Alliances and the State Lyubov Grigorova, Ted Robert Gurr, 2013 This new book by Lyubov Mincheva and Ted Gurr examines the political economy of transborder violence on the European Periphery that poses grave threats to domestic and international security in Europe and elsewhere The units of analysis are unholy alliances i.e. hybrid transborder militant and criminal networks which have been active in the 1990s and the first decade of the 2000s The concept of Unholy Alliances is extended to also include the trans state criminal syndicates that arise in failed and dysfunctional states or operate within the global illicit economy It also addresses the question of what reigns supreme in securing the militants long term success money or social endowment including strong identity networks

The Threat from International Organized Crime and Global Terrorism United States. Congress. House. Committee on International Relations, 1997

Banking Secrecy and Offshore Financial Centers Mary Alice Young, 2013-02-11 This book brings together the issues surrounding banking secrecy and confiscation of criminal proceeds The book examines the existing legal agreements at the international regional and national levels and their interaction in the substantive areas of confiscation anti money laundering and banking confidentiality laws It looks at how these agreements have been applied in offshore financial centers and demonstrates that despite a number of legally binding UN Conventions as well as global anti money laundering recommendations the implementation of them is often lukewarm by those Parties who have ratified the Convention and adopted obligations because of this the confiscation legislation is incompatible with strict banking confidentiality laws The work draws on the experience of criminologists to offer critical insight into the legislative frameworks designed to deal with banking secrecy and confiscation in offshore financial centers It goes on to offer suggestions for measures that may be taken by major economies to circumvent the lack of cooperation by offshore financial centers as intolerance towards money laundering grows in light of recent political and economic events This book will be of particular interest to students and scholars of Law Finance and Criminology

The Politics of Controlling Organized Crime in Greater China Sonny Shiu-Hing Lo, 2015-12-14 In China the central government has the political will to control organized crime which is seen as a national security threat The crux of the problem is how to control local governments that have demonstrated lax enforcement without sufficient regulation from the provincial governments The development of prostitution underground gambling and narcotics production has become so serious that the central government has to rely on anti crime campaigns to combat these three evils This book explores the specific role of government institutions and agencies notably the police in controlling organised and cross border crime in Greater China Drawing heavily on original empirical data it compares the both the states of the People s Republic of China and Taiwan as well as city states Hong Kong and Macao This region has become increasingly economically integrated and human interactions have been enhanced through improved trade relations tourism and increased individual freedom The book argues that the regime capacity of crime control across Greater China has been expanded through

regional and international police cooperation as well as anti crime campaigns It suggests that a strong central state in China is necessary to rein in the local states and to prevent the risk of deteriorating into a political criminal nexus Focusing on regime capacity in crime control regime autonomy from crime groups and regime legitimacy in the fight against organized crime this thought provoking book will be of great interest to students and scholars of Chinese politics and criminology more broadly
