Radiologic Examination of the Urinary Tract Howard M. Pollack, 1971 *The Radiological Examination of the Male Urethra* G. L. S. Kohnstam, Edward Henry Paul Cave, 1925 **Radiological Imaging of the Ureter** Francis Joffe, Philippe Otal, Michel Soulie, 2012-12-06 Owing to its central position in the retroperitoneal and pelvic cavity the ureter is rapidly affected by a variety of pathological processes Furthermore any disease involving the ureter can also have an effect on the kidneys For several decades the diagnosis of diseases affecting the ureter was based on intravenous excretory urography and techniques of direct opacification However the diagnostic strategy has been extensively modified by the advent of helical computed tomography and magnetic resonance imaging This book the first to focus specifically on ureteral imaging covers both the new and the traditional techniques Their use in the variety of scenarios involving ureteral disease is clearly elucidated with the aid of high quality informative images **Radiology Today** Martin W. Donner, Friedrich H. W. Heuck, 2012-12-06 Radiology Today 3 presents papers and panel discussions from a multi national faculty at the biannual Salzburg Symposium which this time covered three important topics critical diagnostic pathways in gastro intestinal and genitourinary radiology interventional radiology of the abdomen and cost containment in radiology The choice of these topics illustrates the changing role of the radiologist in the practice of medicine today and in the foreseeable future He will have to serve as a consultant more than ever before assuming in creasing responsibility for sequencing of imaging procedures and par ticipating more and more in therapeutic intervention In order to pro vide meaningful assistance the imaging consultant must be aware of the efficacy and the limitations of every procedure In this context cost containment is a worldwide public concern and the most appropriate procedures must be identified Radiology Today 3 demonstrates how the radiologist functions as a member of diagnostic and management teams to provide optimal in formation and efficient low risk patient care at the lowest possible cost Martin W Donner Friedrich H W Heuck Contents Critical Diagnostic Pathways Abdomen 3 G MARCHAL A L BAERT K GEBOES E PONETTE 1 FEVERY The Diagnosis of Pancreatic Cancer 3 W REICHARDT Localization Techniques for Hormonally Active Pancreatic Tumors 7 AR MARGULIS S MCCARTHY Hepatic Mass Lesions 12 M KORMANO K PARTANEN 1 KUIKKA Dynamic Liver CT and New Contrast Agents 17 W FROMMHOLD J PIRSCHER 20 Gallbladder Diseases Imaging Sequences 1 A KIRKPATRICK Jr **Fundamentals of Radiologic Technology** Naval Medical School (U.S.), 1971 Radiologic technology R.
