on links between Weimar film and American film noir and on the conflicted relationship between directors of the New German Cinema and Hollywood. Recently German film studies has begun reexamining the interconnection of the two film cultures and focusing on the internationalism of German cinema but little research has been done on contemporary German directors involvement in American cinema a gap in scholarship that this book fills. The study offers ways of understanding current German cinematic engagement with America and different directorial responses to the hegemonic pressures of Hollywood. It delineates the historical trajectory of German American film relations in the 20th century then analyzes the careers and works of four German born directors who have significant ties with American cinema: Wolfgang Petersen, Roland Emmerich, Percy Adlon, and Tom Tykwer. A series of close readings of their productions isolates the cinematic practices and strategies with which these filmmakers negotiate the different national cultural and cinematic paradigms they traverse. The book analyzes constructions of national cultural identity, probes the boundaries of national cinemas, and expands our understanding of emerging hybrid film cultures. It is a contribution to German film studies and to the emerging field of transnational film studies.

Christine Haase is Associate Professor of German at the University of Georgia.

The A to Z of German Cinema Robert C. Reimer, Carol J. Reimer, 2010-04-01

German film is diverse and multi faceted its history includes five distinct German governments: Wilhelmine Germany, the Weimar Republic, the Third Reich, the Federal Republic of Germany, and the German Democratic Republic; two national industries: Germany and Austria; and a myriad of styles and production methods. Paradoxically, the political disruptions that have produced these distinct film eras, as well as the natural inclination of artists to rebel and create new styles, allow for the construction of a narrative of German film. While the disjuncture generates distinct points of separation, it also highlights continuities between the ruptures. Outlining the richness of German film, *The A to Z of German Cinema* covers mainstream, alternative, and experimental film from 1895 to the present through a chronology, introductory essay, appendix of the 100 most significant German films, a bibliography, and hundreds of cross referenced dictionary entries on directors, actors, films, cinematographers, composers, producers, and major historical events that greatly affected the direction and development of German cinema. The book's broad canvas will lead students and scholars of cinema to appreciate the complex nature of German film.

Television, Tabloids, and Tears Jane Shattuc, 1995

I am Biberkopf. Rainer Werner Fassbinder declared, aligning himself with the protagonist of his widely seen television adaptation of Berlin Alexanderplatz. The statement provoked an unprecedented national debate about what constituted an acceptable German artist and who has the power to determine art. More than any recent German director, Fassbinder embodied this debate, and Jane Shattuc shows us how much this can tell us not just about the man and his work but also about the state of culture in Germany. It is fascinating in itself that Fassbinder, a highly controversial public figure, is the subject of *Fassbinder's Germany*. Thomas Elsaesser, 1996

Rainer Werner Fassbinder is one of the most prominent and important authors of post war European cinema. Thomas Elsaesser is the first to write a thoroughly analytical study of his work. He stresses the importance

of a closer understanding of Fassbinder's career through a re-reading of his films as textual entities. Approaching the work from different thematic and analytical perspectives, Elsaesser offers both an overview and a number of detailed readings of crucial films while also providing a European context for Fassbinder's own coming to terms with fascism. Historical Dictionary of German Cinema Robert C. Reimer, Carol J. Reimer, 2019-07-15. The history of German film is diverse and multifaceted. This volume can only suggest the richness of a film tradition that includes five distinct German governments: Wilhelmine Germany, the Weimar Republic, the Third Reich, the Federal Republic of Germany, West Germany, and the German Democratic Republic, East Germany, as well as a reunited Germany, two national industries, Germany and Austria, and a myriad of styles and production methods. Paradoxically, the political disruptions that have produced these distinct film eras, as well as the natural inclination of artists to rebel and create new styles, allow for the construction of a narrative of German film. Disjuncture generates distinct points of separation and yet also highlights continuities between the ruptures. This second edition of Historical Dictionary of German Cinema contains a chronology, an introduction, appendixes, and an extensive bibliography. The dictionary section has over 200 cross-referenced entries on directors, actors, films, cinematographers, composers, producers, and major historical events that greatly affected the direction and development of German cinema. This book is an excellent resource for students, researchers, and anyone wanting to know more about German cinema. Alterity, Identity, Image, 2023-12-14. *Film - An International Bibliography* Malte Hagener, Michael Töteberg, 2016-12-16. Kommentierte Bibliografie. Sie gibt Wissenschaftlern, Studierenden und Journalisten zuverlässig Auskunft über rund 6000 internationale Veröffentlichungen zum Thema Film und Medien. Die vorgestellten Rubriken reichen von Nachschlagewerk über Filmgeschichte bis hin zu Fernsehen, Video, Multimedia. **Personal Experience and the Media** Klaus Ulrich Miltz, 2006. The work of the West German artist Rainer Werner Fassbinder is as versatile as it is extensive. During the 16 years of his artistic career, Fassbinder produced more than 40 films and staged 29 plays, half of which he had written himself. In doing so, he not only drew on aesthetic traditions as diverse as the German folk play, the American gangster film, Hollywood melodrama, the Theatre of Cruelty, and the French Nouvelle Vague, but also worked in three media simultaneously: theatre, cinema, and television. It has often been pointed out that this versatility appears to forestall any conceptualisation of Fassbinder's work from the vantage point of its production. The present work aims at exactly such a conceptualisation by exploring the interplay between his work for the different media.
