Evidence for Child Welfare Practice Michael J. Austin, 2013-09-13 This book provides a work in progress that seeks to capture the micro direct service and macro

managerial perspectives related to identifying evidence for practice within the practice domain of public child welfare. It is divided into two categories: namely evidence for direct practice and evidence for management practice. In Part I the articles are categorized in the areas of child welfare assessment and child welfare outcomes. Expanded versions of the chapters can be accessed at www.bassc.net. In Part II the focus is on organizational issues that relate to evidence for management practice. This section includes an overview of evidence based practice from an organizational perspective along with evidence related to the experiences of others in implementing evidence based practice. This book pushes the discussion of evidence based practice in several new directions regarding 1 the use of structured reviews to complement the systematic reviews of the Cochrane and Campbell Collaboratives 2 the process of viewing the call for evidence based practice as a goal or future vision of practice and evidence for practice provides a more immediate approach to promote evidence informed practice and 3 a recognition that evidence informed practice is part of building agency based knowledge sharing systems that involve the tacit and explicit knowledge needed to improve the outcomes of social services. This book was published as a special issue of the *Journal Of Evidence Based Social Work Practice-Based Research in Social Work* Sarah-Jane Dodd, Irwin

Epstein, 2012-03-12. This unique textbook explores practice based research (PBR) using numerous practice examples to actively encourage and engage students and practitioners to embrace research as a meaningful support for their practice. Whilst evidence based practice gives practitioners access to information about universal best practices, it does not prioritize practitioner generated knowledge or promote new research based interventions relevant to their own practice circumstances as PBR does. This book discusses the evolution of PBR as a distinct social work research approach, describes its principles and methods, and presents a range of exemplars illustrating the application of PBR within different practice methods in different practice settings. The chapters cover: Identifying the research question in a PBR model; Designing a study and identifying a methodology; Sampling; Literature reviews; Gathering data; Ethics; Analyzing data and interpreting results; Putting research into practice; Viewing the practitioner as central to the research process and research as a necessary component of practice. This invaluable book emphasizes the seamless integration of practice and research. It is about research in social work practice rather than research on social work practice. Each chapter includes an overview, an introduction, and a key concepts summary. *Practice Based Research in Social Work* is a very accessible text suitable for social work students, particularly MSW students and practitioners. *Science and Social Work* Stuart A. Kirk, William James Reid, 2002. Historically there have been two main approaches to the proper role and function of science in social work. This work presents a balanced appraisal demonstrating how the fruits of scientific research can aid clinical practice. *The Use of Research in Social Work Practice* Nancy F. Chavkin, 1993-09-30. Chavkin tests the theory that there is a relationship between organizational structure and the use of research recommendations in school social work. Part I includes three chapters that explore the complex relationship between applied social science research and practice. Part II is the case example of the use of Costin's recommendation for

changes in the goals and methods of school social service delivery Part III presents the implications of the case for practice policy and theory and provides suggestions for future research Chavkin s organizational perspective adds to the information social workers have about why research findings are adopted in some organizations and not in others and how organizational structure factors facilitate or inhibit adoption Recommended for social work scholars and practitioners researchers and agency leaders
