Participatory Research Methodologies Alpaslan Özerdem, Richard Bowd, 2016-05-13 Participatory research methodologies have been used since the 1970s as a tool to garner accurate information about communities in which development practitioners operate. Their usefulness as a collection of research techniques has been evident in academic disciplines such as politics, sociology, anthropology, and economics among others. This informative text assesses the use of participatory methods as a research tool in the contexts of development and reconstruction after conflict and disasters by identifying cross-cutting themes and establishing a comparative lessons learned framework that can help inform future uses of them both for practitioners and researchers. More importantly, rather than adopting a prescriptive perspective, this book provides a critical analysis of such methodologies. Specifically, the reader will benefit from the collation of the experiences of those who utilize participatory research methods in different countries and contexts and from different academic and practitioner perspectives.

The Ashgate Research Companion to Political Violence Marie Breen-Smyth, 2016-03-23 Aimed at scholars, students, and lay persons interested in peace and conflict studies, *The Ashgate Research Companion to Political Violence* is a comprehensive resource to understand the principal debates on political violence, a field which is becoming an increasingly important part of courses on peace and conflict. Organized into seven main sections, this volume deals with a wide range of issues covering the following important research areas: Issues of definition and nomenclature and how contests over these relate to political violence; Theoretical frameworks and methods for understanding and researching political violence; Motivations and goals of those who use political violence; The various forms of political violence; Perspectives on countering political violence by state and non-state actors; Why and how political violence ends; The aftermath of political violence. Contributions by leading scholars in the field provide an authoritative guide and source book on political violence for the scholar, the researcher, and the informed general reader.

Ethics and Values in Social Research Paul Ransome, 2013-04-23 Ethical responsibility has intellectual and practical implications for social researchers. Transitional Justice in Practice Renée Jeffery, 2017-01-06 This book examines the practice of transitional justice in the Solomon Islands from the period of *The Tensions* to the present. In late 1998, the Solomon Islands were plunged into a period of violent civil conflict precipitated by a complex web of grievances, injustices, ethnic tensions, and economic insecurities. This conflict dragged on until the middle of 2003, leaving an estimated 200 people dead and more than 20,000 displaced from their homes. In the time that has elapsed since the end of *The Tensions*, numerous at times incompatible approaches to transitional justice have been implemented in the Solomon Islands. The contributors to this volume examine how key global trends and debates about transitional justice were played out in the Solomon Islands, how its key mechanisms were adapted to meet the specific demands of post-conflict justice in this local context, and how well its practices and

processes fulfilled their perceived functions **Peace and Conflict: Europe and Beyond** Alexander I Gray,Ibrahim Al-Marashi,2006-01-01 Peace and Conflict Studies is an increasingly observed discipline as researchers seek to investigate complex issues and to aid in the building of knowledge which can be used towards transforming conflict Analyzing case studies from Europe and beyond this edited volume seeks to provide theoretical tools and alternative approaches for examining the root causes of violence and to extrapolate possibilities for transcending peace through conflict transformation The reader is presented with specific case studies from the Middle East South Eastern Europe the Mediterranean rim and South America What differentiates this work is that more than just analyzing the conflicts contributors offer either methodological or theoretical alternatives for their transformation While not discarding the value of traditional approaches to conflict resolution a new generation of peace workers is emerging and proposing that a certain level of conflict is a natural and sometimes necessary aspect of human relations There is a growing recognition that it would be almost impossible to rid society of conflict altogether A view that is gaining increasing currency is one which promotes the idea of conflict transformation This approach entails transforming levels of conflict in order to alleviate discord avoid violence and create circumstances for future peace building **New Perspectives in Political Ethnography** Lauren Joseph,Matthew Mahler,Javier Auyero,2007-09-20 The use of ethnographic research social research based on the observation of individuals or institutions where the researcher becomes part of the group or very close to the group to better understand their actions is becoming more and more of a prevalent methodology within sociology As ethnography gains prominence within the discipline its focus theoretical underpinnings and narrative styles are also expanding to the yet unexamined worlds and institutions of society Politics political institutions and those working in politics state officials politicians and activists have so far missed the lens of the ethnographer As a group politicians and those in politics can be found in every corner of the world While political systems and politicians are by no means the same in every country what brings these people together to be part of the political process Ethnography is uniquely equipped to look microscopically at the foundations of political institutions and their attendant sent of practices just as it is ideally suited to explain why political actors behave the way they do and to identify the causes processes and outcomes that are part and parcel of political life The volume based on a special issue of Qualitative Sociology has a two fold purpose to bring politics into the ethnographic literature and of ethnography in studies of politics The case studies included are based on the research of ethnographers studying the various level of politics in Brazil Japan El Salvador Bosnia the Philippines India and the United States It will be of interest to those in the sociology of politics political science and those looking for ethnographic research on a global level **Legitimacy in Peacebuilding** Franzisca Zanker,2017-09-13 The book offers a critical analysis of legitimacy in peacebuilding with a focus on peace negotiations and civil society participation in particular The aim of this book is to unpack the meaning of legitimacy for the population in peacebuilding processes and the relationship this has with civil society involvement There is a growing

consensus for addressing local concerns in peacebuilding with the aim of ensuring local ownership Moreover scholars have noted a relationship between civil society inclusion in peace negotiations and legitimacy Yet the very idea of legitimacy remains a black box Using data from original empirical fieldwork including over 100 semi structured interviews and 12 focus group discussions the book focuses on two case studies of negotiations that respectively ended a long civil war in Liberia in 2003 and ended the post election violence in Kenya in 2008 It argues that civil society involvement is conceptually insufficient to show a multidimensional understanding of legitimacy Instead the book shows a complex picture of legitimate peace negotiations based on outcome and participation based characteristics with the involvement of both guarantors of legitimacy and a more general civic agency which includes the general population Through forms of participative communication the passive audience become active stakeholders in the construction of legitimacy This has repercussions for how we think about civil society and peacebuilding more generally This book will be of much interest to students of peacebuilding conflict resolution security studies and IR in general
