Nascent Entrepreneurship and Learning Mine Karataş-Özkan, Elizabeth Chell, 2010-01-01 This work by Karata zkan and Chell provide fresh insights on entrepreneurial learning and the entrepreneurship process Employing a well informed social constructivist perspective it combines theory with a richly grounded empirical analysis at three distinct but inter related levels the micro the mesa all set in the macro context of the enterprise culture A strength of the work is the multiple levels of analysis which sheds new light on entrepreneurial learning as part of the entrepreneurial process The result is a processual view that captures conceptualises and explains the transitive process of becoming an entrepreneur Alistair R Anderson The Robert Gordon University UK In this book Karata zkan and Chell show great clarity in dealing with a range of complex issues They articulate these in a manner which makes them interesting and comprehensible and in a fashion which impressively interweaves theory practice and method Sarah L Jack Lancaster University UK This informative

book examines the process of nascent entrepreneurship from a learning perspective It offers a multi layered framework of nascent entrepreneurship through an inter disciplinary approach and sound application of Bourdieu s conceptual tools and also by generating practical insights for nascent entrepreneurs enterprise educators and mentors Supported by an empirical investigation of two case studies the authors argue that it is not sufficient to study nascent entrepreneurship and concurrent process of entrepreneurial learning at just the individual entrepreneur or collective team or organisational level and examine the socio behavioural aspects of learning but that entrepreneurial learning should be understood by inter relating personal micro relational meso and macro contextual aspects of nascent entrepreneurship The comprehensive coverage of entrepreneurship theory and research will be of significant value for scholars researchers and students in the field

Perspectives on Change Bernard Burnes, Julian Randall, 2015-11-19 Despite the plethora of books on change there appears is a notable gap in the field rarely is the authentic and candid voice of change practitioners heard Seldom are those most closely involved in the management of change given or seek the opportunity to write about their personal experiences and reflexivity Nor is this just a case of practicing managers not being given a voice or feeling that they cannot be frank and open about what they do How often do academics candidly state what they actually do when they are faced with managing change in their own institutions or when they are called on in a consultancy capacity Similarly it is rare for full time consultants to be candid about what it is they actually do instead they tend to have a well honed sales pitch which lays out a logical change process directed at helping the client to achieve success Yet when academics consultants and practicing managers are prepared to speak candidly about what they really do a richer messier but more illuminating picture of change emerges The aim of Perspectives on Change is to move beyond the do as I say approach of most change books and to encourage academics consultants and managers to say candidly what it is they really do and what they really think about change and how it should be managed The Editors of this book Burnes and Randall have over 60 years of experience between them of studying and teaching change management acting as consultants and actually managing change projects They are therefore well aware of the differences and contradictions between what academics consultants and managers say about change in public and what they say in private and do in practice Perspectives on Change will offer students and practitioners of change a unique opportunity to understand change in practice In addition it will also contribute to the Rigour Relevance debate by giving a different and perhaps more realistic perspective on the nature of the gap between theory and practice
