Duncan Gallie, 2004 **Resisting Marginalization** Duncan Gallie, 2004-03-25 This book breaks new ground by bringing together recent research into the determinants of marginalization risks for the unemployed and research into new social policies for combating marginalization It examines the major controversies about how far entrapment in unemployment is due to resource constraints motivational problems or skill deficiency It examines the forms that new policies have taken the way they vary between EU countries and the effects they have had on the life experiences of the unemployed Its central concern is how far the new policies developed in the 1990s in particular the spread of activation and welfare to work policies address the major sources of vulnerability of the unemployed The chapters draw on the results of a number of major comparative research programmes funded by the European Commission These provide for the first time rigorous comparative data across a range of different countries They bring together the insights of researchers from different disciplines economists jurists social psychologists and social policy analysts The book shows that while the new policy initiatives helped to mitigate the severity of the experience of unemployment they were far from providing an adequate response to the underlying factors that put people at risk of marginalization These were primarily due to skill deficiencies that were rooted in disadvantages that people experienced when they were young and in the persisting inequalities in training opportunities during people's work careers The case is made for a major new policy initiative to improve the quality of working life of the low skilled and their opportunities for skill development **Social Consequences of Labour Market**

Duncan Gallie, 2013-09-12 This book provides a comparative analysis of the impact of the economic crisis on the quality of work and work life balance Youth on the Move Kristiina Brunila, Lisbeth Lundahl, 2020-02-03 The book addresses one of the most urgent social problems in many countries the uncertain school to work transitions of young people As a result a transition machinery has been created consisting of various education and training measures realised by e g teachers and youth workers The volume demonstrates that discourses related to youth transitions do not simply describe young adults but create them For example young people are expected to be active citizens who make themselves attractive to employers and those who fail in doing so may be labelled having psychological deficiencies When failing transitions resulting in lack of higher education or unemployment are treated as individual s problems rather than rising from structural factors the solutions are likewise individualized The book thus underlines the importance of analysing power relations reflected by gender health social class and ethnicity The articles of the book combine perspectives from young people policymakers teachers and youth workers in Iceland Finland Sweden and England

Theorising Social Exclusion Ann Taket, Beth R. Crisp, Annemarie Nevill, Greer Lamaro, Melissa Graham, Sarah Barter-Godfrey, 2009-09-10 Social exclusion attempts to make sense out of multiple deprivations and inequities experienced by people and areas and the reinforcing effects of reduced participation consumption mobility access integration influence and recognition This book works from a multidisciplinary approach across health welfare and education linking practice and research in order to improve our understanding of the processes that foster exclusion and how to prevent it Theorising Social Exclusion first reviews and reflects upon existing thinking literature and research into social exclusion and social connectedness outlining an integrated theory of social exclusion across dimensions of social action and along pathways of social processes A series of commissioned chapters then develop and illustrate the theory by addressing the machinery of social exclusion and connectedness the pathways towards exclusion and finally experiences of exclusion and connection This innovative book takes a truly multidisciplinary approach and focuses on the often neglected cultural and social aspects of exclusion It will be of interest to academics in fields of public health health promotion social work community development disability studies occupational therapy policy sociology

politics and environment *Youth, Diversity and Employment* Rune Halvorsen, Bjørn Hvinden, 2018 Including youth in the labour market is a major challenge facing many European countries This book examines the transitions from education to employment with a focus on Nordic youth in the broader European context The book combines insights from the social sciences and law by linking the challenges facing young people in general and the more specific barriers facing the more vulnerable groups of young people Youth Diversity and Employment provides original insights on the interdependencies or interaction between redistributive and regulatory social policies *The Last Safety Net* Thomas Bahle, Vanessa Hubl, Michaela Pfeifer, 2011 As Europe's public realms face upheaval this text identifies how social solidarity is being reinvented from below and redefined from above Interdisciplinary transnational approaches provide new insights into the relationship between national and transnational social solidarity across Europe **Urban Outcasts** Loïc Wacquant, 2013-04-26 Breaking with the exoticizing cast of public discourse and conventional research Urban Outcasts takes the reader inside the black ghetto of Chicago and the deindustrializing banlieue of Paris to discover that urban marginality is not everywhere the same Drawing on a wealth of original field survey and historical data Loïc Wacquant shows that the involution of America's urban core after the 1960s is due not to the emergence of an underclass but to the joint withdrawal of market and state fostered by public policies of racial separation and urban abandonment In European cities by contrast the spread of districts of exclusion does not herald the formation of ghettos It stems from the decomposition of working class territories under the press of mass unemployment the casualization of work and the ethnic mixing of populations hitherto segregated spawning urban formations akin to anti ghettos Comparing the US Black Belt with the French Red Belt demonstrates that state structures and policies play a decisive role in the articulation of class race and place on both sides of the Atlantic It also reveals the crystallization of a new regime of marginality fuelled by the fragmentation of wage labour the retrenchment of the social state and the concentration of dispossessed categories in stigmatized areas bereft of a collective idiom of identity and claims making These defamed districts are not just the residual sinkholes of a bygone economic era but also the incubators of the precarious proletariat emerging under neoliberal capitalism Urban Outcasts sheds new light on the explosive mix of mounting misery stupendous affluence and festering street violence resurging in the big cities of the First World By specifying the different causal paths and experiential forms assumed by relegation in the American and the French metropolis this book offers indispensable tools for rethinking urban marginality and for reinvigorating the public debate over social inequality and citizenship at century's dawn **Production Dynamics for Life Quality in the Incipient 21st Century** Chau-kiu Cheung, 2022-08-18 This book addresses the life quality of the average adult in the world based on international data weighted according to national population size It rests on the theoretical framework of analytic functionalism to explain statics and dynamics in the production of life quality The statics means the influences of personal and national factors on life quality whereas the dynamics mean the changes in the influences over time This approach

elucidates life quality at the personal level rather than at the national level which overlooks what happens to the average person living in the world The approach involves a broad view of the production of life quality including experiences practices and appraisals of life This production also involves personal background characteristics and the national indicators of modernization globalization and environmental issues Knowledge about the production is helpful for policymakers researchers students and other people to upgrade life quality Such knowledge is valuable because it is up to date generalizable and sensible based on the analytic functionalist theoretical framework and statistical estimation

Social Costs Today Wolfram Elsner,Pietro Frigato,Paolo Ramazzotti,2012-06-25 This book deals with the current crises from a somewhat different the usual perspectives It claims that causes and policy implications of these crises cannot be properly assessed by focusing on allocative efficiency or income growth alone it requires a more general approach based on social costs It does not deal with social costs according to the Pigouvian or the Coasian traditions It draws on the work of Original Institutional Economics OIE such as Thorstein Veblen Karl William Kapp and Karl Polanyi on Post Keynesians such as Hyman Minsky and in general on authors who have provided insights beyond the conventional wisdom of economic thought

Resilience Process and Its Personal and Social Bases Chau Kiu Cheung,2024-10-30 This book is to elucidate personal and social bases for personal resilience thus addressing the issue concerning the predominance of social factors in shaping resilience Essentially the book starts with a clarification of resilience as a phenomenon rather than a trait The clarification also identifies the personal bases in terms of the resilience process which specifies belief about resilience as a precursor to learning about resilience action for resilience and resilience successively To justify the personal and social bases the book expounds the analytical functionalist framework to specify voluntaristic and deterministic mechanisms to perform the four requisite functions of goal attainment adaptation integration and latency Equipped with the conceptual and theoretical grounds the book proceeds to scrutinize the effects of personal and social factors on resilience and its process The personal factors include personal background characteristics personality functional disability and various beliefs whereas the social factors include experiences of caring peace violence and social exclusion in society kindness sociability and aid from other people and social capital The scrutiny engages five databases about 6 948 Chinese people in Hong Kong and neighboring Chinese cities composed of the public service users older adults students and people with visual impairment Overall the book presents ample theoretical and empirical substances to clarify the genesis of resilience

The Political and Social Construction of Poverty Romano, Serena,2014-01-29 Poverty is not a neutral phenomenon nor are social inclusion programmes neutrally conceived designed and implemented Their ultimate nature is built upon ideas values actors politics and economic constraints This topical book is one of the first to examine the social and political construction of anti poverty programmes in Central Eastern Europe and their transformation from communist rule to the current economic crisis It covers the approach towards the parasite poor through to Guaranteed Minimum Income Schemes and illustrates how the

distinction between different categories of deserving and undeserving poor has evolved over the years as the result of changing paradigms combined with the pressure exerted by domestic and international actors the European Union and the World Bank among others This text breaks new ground for social policy students and scholars interested in understanding how differently post communist welfare states have represented legitimised and dealt with poverty need and social justice in accordance with divergent normative frameworks constructed at national level Sanctions and Sweeteners Kate Stanley,Liane Asta Lohde,Stuart White,2004 *Work Orientations* Bengt Furåker,Kristina Håkansson,2019-07-15 Work orientations and work attitudes have to do with the productive capacities in society Insofar as individuals are positively oriented towards contributing their labour we can expect a great amount of work to be done and to be carried out efficiently carefully and responsibly These subjective factors are thus very vital in modern working life *Work Orientations Theoretical Perspectives and Empirical Findings* offers up to date research on people s commitment to work and employment and job satisfaction in economically advanced countries It will also analyse changes that have taken place in these respects over the last decades Among the key issues in *Work Orientations* are questions about whether patterns of work centrality and employment commitment tend to remain stable or have changed across time in various countries Moreover we assume that the circumstances under which people participate in the social division of labour colour their subjective relationships to their jobs and to employment in general A major aim of the book is to explore the impact of factors such as occupation education age and gender on work orientations and work attitudes *Work Orientations* will be invaluable for researchers and scholars in the fields of organizational studies the sociology of work employee engagement and related disciplines **Citizenship and the Political Integration of Muslims** Manlio Cinalli,2017-11-01 This book explores the political integration of Muslims and Islam across contemporary democracies The author focuses on France a country in which the integration of Muslims is usually seen as being problematic and controversial and which is struggling with both Islamic radicalisation on the one hand and the new wave of extreme right populism on the other Whereas conventional approaches to the topic of the integration of Muslims in France have tended to focus on single methods and sources such as demographic characteristics or cultural and economic resources the field mixed method approach offered in this book allows for a more nuanced analysis It sheds new light on the interactive dynamics between policy processes the role of key meso level actors such as movements and associations and the political entrepreneurship of Muslims themselves within the overarching frame of French citizenship The book thus assesses the extent to which a broad set of interactions link Muslim French to the broader community of French citizens It will be of interest to scholars and students with an interest in Political Sociology Islamic Studies Citizenship and European Politics
