Rethinking Architecture A Reader In Cultural Theory:

Rethinking Architecture Neil Leach, 2005-12-20 Brought together for the first time the seminal writing on architecture by key philosophers and cultural theorist of the twentieth century Issues around the built environment are increasingly central to the study of the social sciences and humanities The essays offer a refreshing take on the question of architecture and provocatively rethink many of the accepted tenets of architecture theory from a broader cultural perspective The book represents a careful selection of the very best theoretical writings on the ideas which have shaped our cities and our experiences of architecture As such Rethinking Architecture provides invaluable core source material for students on a range of courses

Rethinking Architecture Neil Leach, 2004 **Rethinking Architecture** Leach, 2009-05-15 [The Derrida Reader](#) Jacques Derrida, 1998-01-01 In the English speaking world Jacques Derrida's writings have most influenced the discipline of literary studies Yet what has emerged since the initial phase of Derrida's influence on the study of English literature classed under the rubric of deconstruction has often been disowned by Derrida What then can Derrida teach us about literary language about the rhetoric of literature and about questions concerning style form and structure The Derrida Reader draws together a number of Derrida's most interesting and idiosyncratic essays that treat literary language the idea of the literary and questions of poetics and poetry The essays discuss single tropes or concepts a figure such as metaphor the ideas of titles and signatures proper names and Derrida's thinking on such subjects as undecidability or aporia The editor's introduction is a demonstration in practice of how Derrida reads and how he adapts the act of reading to the text or figure in question The introduction also outlines each essay's main points its usefulness for reading literary texts and its particular area of interest The Derrida Reader thus provides students of literature with a focused contextualized and readily understandable volume

Architecture and the Virtual Marta Jecu, 2015-01-01 Architecture and the Virtual is a study of architecture as it is reflected in the work of seven contemporary artists working with the tools of our post digital age The book maps the convergence of virtual space and contemporary conceptual art and is an anthropological exploration of artists who deal with transformable space and work through analogue means of image production Marta Jecu builds her inquiry around interviews with artists and curators in order to explore how these works create the experience of the virtual in architecture Performativity and neo conceptualism play important roles in this process and in the efficiency with which these works act in the social space

The Dissertation Iain Borden, 2006-08-14 The

Dissertation is one of the most demanding yet potentially most stimulating components of an architectural course Properly done it can be a valuable contribution not only to the students own learning development but also to the field of architecture as a whole This book provides a complete guide to what to do how to do it when to do it and the major pitfalls involved This is a comprehensive guide to all that an architecture student might need to know about undertaking the dissertation including new material on CD ROM and online sources web based research techniques digital images alternative imaging strategies key architecture links referencing and new dissertation extracts It clearly navigates the student through the whole process of writing preparing and submitting a dissertation as well as suggesting what to do after the dissertation has been completed Subjects covered include how to write a proposal which research methodologies and techniques to adopt which libraries and archives to utilize including special architectural resources on the net as well as how to structure reference and illustrate the final submission The authors also take architecture students into new terrain suggesting alternative methods of undertaking dissertations whether as video prose writing multimedia or other forms of expression Furthermore this guide includes new examples of exemplary dissertations of all kinds as completed by students in Europe and North America so that the reader can clearly see the kinds of work which they themselves might choose to pursue Also in the Seriously Useful Guides Series The Crit The Portfolio Practical Experience **The Politics of Parametricism** Matthew Poole, Manuel

Shvartzberg, 2015-10-22 Over the last decade parametricism has been heralded as a new avant garde in the industries of architecture urban design and industrial design regarded by many as the next grand style in the history of architecture heir to postmodernism and deconstruction From buildings to cities the built environment is increasingly addressed designed and constructed using digital software based on parametric scripting platforms which claim to be able to process complex physical and social modelling alike As more and more digital tools are developed into an apparently infinite repertoire of socio technical functions critical questions concerning these cultural and technological shifts are often eclipsed by the seductive aesthetic and the alluring futuristic imaginary that parametric design tools and their architectural products and discourses represent The Politics of Parametricism addresses these issues offering a collection of new essays written by leading international thinkers in the fields of digital design architecture theory and technology Exploring the social political ethical and philosophical issues at stake in the history practice and processes of parametric architecture and urbanism each chapter provides different vantage points to interrogate the challenges and opportunities presented by this latest mode of technological production **The Hotel as Setting in Early Twentieth-century German and Austrian Literature**

Bettina Matthias, 2006 The employment of the hotel as a setting for literary works of the period and the cultural reasons behind it As the bourgeois concept of home became problematic after important changes in German speaking society during the 19th century many fiction writers chose the literary setting of the hotel to explore the status of the individual and the notions of public and private As social microcosms hotels are fitting experimental settings for literary inquiries into the

tension between the individual's quest for a place in the world and the technocratic rationalism of modern life. The book has two parts: the first establishing the cultural and theoretical context and the second providing analyses of literary works set in hotels. A brief history of commercial hospitality and a chapter establishing the theoretical framework of the hotel as a paradigmatic ambivalent semi-public and stage-like modern space lead to readings of texts by Schnitzler, Zweig, Werfel, Kafka, Thomas Mann, Joseph Roth, and Vicki Baum. Bettina Matthias is Associate Professor of German at Middlebury College.

Queer Sexualities: Diversifying Queer, Queering Diversity Vikki Fraser, 2019-01-04. This volume was first published by Interdisciplinary Press in 2013. *Queer Sexualities: Diversifying Queer, Queering Diversity* offers an interdisciplinary approach to studies of queer sexualities. Using queer to disrupt and subvert, the chapters in this volume address a diverse range of themes and approaches to the study and articulation of queer sexuality. Through the approaches offered by ethics, activism, and politics, theology, ethnography, film, literature, and media studies, as well as geography and architecture, the chapters all work to emphasise that queer crosses borders, troubling and breaking down these borders as they go. At the heart of each of the chapters are diverse ways of looking at sexualities. The chapters disrupt the heteronormative ownership of sex and the body. In so doing, this volume offers a perspective of queer sexuality that subverts borders at the same time, highlighting the multiple ways of doing queer across times, spaces, and disciplines.

Virtual Systems and Multimedia Theodor G. Wyeld, Sarah Kenderdine, Michael Docherty, 2008-03-03. This book constitutes the thoroughly refereed post-conference proceedings of the 13th International Conference on Virtual Systems and Multimedia (VSMM 2007) held in Brisbane, Australia, in September 2007. The 18 revised full papers presented were carefully reviewed and selected from 97 initial submissions during two rounds of reviewing and improvement. The papers put a special focus on virtual heritage and virtual cultures, virtual environments, and virtual experiences, as well as on applied technologies and systems.

Tower Power: The US on a Freudian Couch after 9/11 Devrim F. Kilicer Yarangumeli, 2012-05-25. *Tower Power* presents an engaging series of discussions in dialogue on one of the first truly interdisciplinary and historically informed studies of the American skyscraper and September 11. Devrim F. Kilicer's book offers a critical inspection of the ways in which the center of the center, the vertical *temenos* of the United States, New York City, is comprehended as the place for the American Dream of material success with its overwhelming bundle of skyscrapers. The author contends that it is only by approaching the phenomenon of September 11 in the context of iconic American skyscrapers that we can truly understand the ways September 11 has been canonized and imbued with a sacred character. At the same time, her study allows September 11 to inform our understanding of the skyscraper as the essential American architectural form. She provides a socio-psychoanalytic lens through the works of psychoanalysts Sigmund Freud and Jacques Lacan, together with social theorists Michel Foucault and Pierre Bourdieu, in understanding why New York City has been expanding vertically and what this architectonic verticality tells us about the American psyche.

Simo Mikkonen,Pekka Suutari,2017-05-15 Music Art and Diplomacy shows how a vibrant field of cultural exchange between East and West was taking place during the Cold War which contrasts with the orthodox understanding of two divided and antithetical blocs The series of case studies on cultural exchanges focusing on the decades following the Second World War cover episodes involving art classical music theatre dance and film Despite the fluctuating fortunes of diplomatic relations between East and West there was a continuous circulation of cultural producers and products Contributors explore the interaction of arts and politics the role of the arts in diplomacy and the part the arts played in the development of the Cold War Art has always shunned political borders wavering between the guidance of individual and governmental patrons and borderless expression While this volume provides insight into how political players tried to harness the arts to serve their own political purposes at the same time it is clear that the arts and artists exploited the Cold War framework to reach their

own individual and professional objectives Utilizing archives available only since the collapse of the Soviet Union the volume provides a valuable socio cultural approach to understanding the Cold War and cultural diplomacy **Staging Mobilities**

Ole B. Jensen,2013 This text is about the fact that mobility is more than movement between point A and B It concerns how the movement of people goods information and signs influences human understandings of self other and the built environment

Collision David Cecchetto,Nancy Cuthbert,Julie Lassonde,2008-12-18 With very few exceptions interdisciplinary art and interarts practices examined as such including the perspective of artist researchers and not subsumed under a singular category of performance or visual art have until now been largely ignored While it would be simplistic to think that this collection somehow rectifies the piecemeal status of this discourse our wager is that this collection works towards presenting an understanding of this status as in a certain sense constitutive of the field Beginning with an introduction to the very multiplicities that compose and complicate interdisciplinary practices then moving into questions of body technology location movement space practice performativity aesthetics this collection covers an enormous amount while still retaining an overarching sense of unity in the context of the subject as a whole Each of these sections negotiates a series of interrelated collisions in order to address a range of theoretical positions as well as a variety of international and cultural perspectives In addition to addressing the notion of interdisciplinarity and the challenges of specific interarts practices this publication seeks to question how we might understand interarts practice in a way that does not exclude perspectives such as spirituality law political activism and community development to name only a few The inclusion of these disparate practices within this publication itself a site of collision of the poetic the conversational and the theoretical is thus not presented as an attempt to unify or normalize them but rather as a productive charting of their radical explosion a collision that is always a colliding Intermingled Fascinations Jane Ramey Correia,Flannery Wilson,2011-05-25
