Enlightenment notions of culture which have been naturalized in the West for centuries require that art be autonomously beautiful universal and devoid of any practical purpose The authors of this multidisciplinary volume seek to complicate this understanding of art by examining art objects from across Asia with attention to their functional ritual and everyday contexts From tea bowls used in the Japanese tea ceremony to television broadcasts of Javanese puppet theater from Indian wedding chamber paintings to art looted by the British army from the Chinese emperor's palace from the adventures of a Balinese magical dagger to the political functions of classical Khmer images the authors challenge prevailing notions of artistic value by introducing new ways of thinking about culture The chapters consider art objects as they are involved in the world how they operate and are experienced in specific sites collections rituals performances political and religious events and imagination and in individual peoples lives how they move from one context to another and change meaning and value in the process for example when they are collected traded and looted or when their images appear in art history textbooks how their memories and pasts are or are not part of their meaning and experience Rather than lead to a single universalizing definition of art the essays offer multiple divergent and case specific answers to the question What is the use of art and argue for the need to study art as it is used and experienced Contributors Cynthia J. Critical Terms for Art History, Second Edition Robert S. Nelson, Richard Shiff, 2010-03-15 Art has always been contested terrain whether the object in question is a medieval tapestry or Duchamp's *Fountain*. But questions about the categories of art and art history acquired increased urgency during the 1970s when new developments in critical theory and other intellectual projects dramatically transformed the discipline The first edition of *Critical Terms for Art History* both mapped and contributed to those transformations offering a spirited reassessment of the field's methods and terminology Art history as a field has kept pace with debates over globalization and other social and political issues in recent years making a second edition of this book not just timely but crucial Like its predecessor this new edition consists of essays that cover a wide variety of loaded terms in the history of art from sign to meaning ritual to commodity Each essay explains and comments on a single term discussing the issues the term raises and putting the term into practice as an interpretive framework for a specific work of art For example Richard Shiff discusses *Originality* in Vija Celmins's *To Fix the Image in Memory* a work made of eleven pairs of stones each consisting of one original stone and one painted bronze replica In addition to the twenty

two original essays this edition includes nine new ones performance style memory monument body beauty ugliness identity visual culture visual studies and social history of art as well as new introductory material All help expand the book's scope while retaining its central goal of stimulating discussion of theoretical issues in art history and making that discussion accessible to both beginning students and senior scholars Contributors Mark Antliff Nina Athanassoglou Kallmyer Stephen Bann Homi K Bhabha Suzanne Preston Blier Michael Camille David Carrier Craig Clunas Whitney Davis Jas Elsner Ivan Gaskell Ann Gibson Charles Harrison James D Herbert Amelia Jones Wolfgang Kemp Joseph Leo Koerner Patricia Leighton Paul Mattick Jr Richard Meyer W J T Mitchell Robert S Nelson Margaret Olin William Pietz Alex Potts Donald Preziosi Lisbet Rausing Richard Shiff Terry Smith Kristine Stiles David Summers Paul Wood James E Young

Comparativism in Art History Jas Elsner, 2017-07-05 Featuring some of the major voices in the world of art history this volume explores the methodological aspects of comparison in the historiography of the discipline The chapters assess the strengths and weaknesses of comparative practice in the history of art and consider the larger issue of the place of comparative in how art history may develop in the future The contributors represent a comprehensive range of period and geographic command from antiquity to modernity from China and Islam to Europe from various forms of art history to archaeology anthropology and material culture studies Art history is less a single discipline than a series of divergent scholarly fields in very different historical geographic and cultural contexts but all with a visual emphasis on the close examination of objects These fields focus on different often incompatible temporal and cultural contexts yet nonetheless they regard themselves as one coherent discipline namely the history of art There are substantive problems in how the sub fields within the broad brush generalization called art history can speak coherently to each other These are more urgent since the shift from an art history centered on the western tradition to one that is consciously global

Gay and Lesbian Studies in Art History Whitney Davis, 2013-11-19 Find original research and interpretive studies of the relations between homosexuality and the visual arts. Evidence for the role of homosexuality in artistic creation has often not survived in part because the direct expression of homosexuality has often been condemned in Western societies. *Gay and Lesbian Studies in Art History* presents examples of contemporary art historical research on homoeroticism and homosexuality in the visual arts, chiefly painting and sculpture of the Western tradition from the ancient to the modern periods. Chapters explore the dynamic interrelation of sexuality and visual art and emphasize problems of historical evidence and interpretation and the need to reconstruct social and cultural realities sometimes quite different from our own. *Gay and Lesbian Studies in Art History* addresses contemporary art historians' interest in studying sexuality in the visual arts, examining such questions as: What are some of the present-day reasons for and problems of this research? How is it related to other research areas within art history and to wider public debates about the meaning, value and propriety of works of art? While the book examines a variety of research problems and theoretical perspectives, most chapters focus on the historical interpretation of a particular work of art, artist or visual convention. Chapters present new documentation of the importance of homosexuality in the production and reception of artworks in the Western tradition, develop models for approaching the question of how sexuality and visual creation are related and explore researchers' experiences and obligations in working in the area of gay and lesbian studies in art history today. Contributing authors stress problems of historical evidence and reconstruction, the social and cultural construction of homosexuality and the active role of visual conventions in shaping perceptions of homosexuals, homosexuality and homosexual desire. They discuss both the biography of artists and the significance of individual works of art and the social reception and circulation of works of art in the context of wider religious, legal, medical, political and economic relations. The book may revise readers' beliefs about the significance and value of a number of works of art hitherto forgotten, neglected, underappreciated or misinterpreted. *Gay and Lesbian Studies in Art History* is an enlightening and informative book for art historians, museum professionals, scholars in the field of lesbian and gay studies and art history students and professors.

Art of Illusion Dan Karlholm, 2006 To survey art history as a whole was a pressing task for a generation of German scholars around the mid nineteenth century Their projections of a historicist chain of artworks ranged from textual narratives without illustrations to separate picture compendia as well as images of a more allegorical kind Other means with which to picture art history as part of a virtually all encompassing cultural history were the museums of art erected in Germany at the time in Berlin and Munich especially This book deals with practices of representing art history in various media This includes post Hegelian texts and engravings of art history from the 1840s onwards by Franz Kugler Julius Schnorr and others In addition works of art of the late twentieth century by Andy Warhol Anselm Kiefer and others provide opportunities to speculate on the after effects and discursive traces of the old regime Extending the concept of historiography to include not just textual or institutional endeavours but a host of different images as well from reproductive prints to pop paintings and visual archives of the digital era this study is intended to contribute in new ways to a critical historiography of the field of art history and visual culture today

Art And The Committed Eye Richard Leppert, 2019-04-05 In *Art and the Committed Eye* Richard Leppert examines Western European and American art from the fifteenth to the twentieth century He studies the complex relation between the look of images and the variety of social and cultural uses to which they are put and demonstrates that the meaning of any image is significantly determined by its function which changes over time In particular he emphasizes the ways in which visual culture is called on to mediate social differences defined by gender class and race In Leppert addresses the nature and task of representation discussing how meaning accrues to images and what role vision and visibility play in the history of modernity Here he explains imagery's power to attract our gaze by triggering desire and focuses on the long history of the use of representation to enact a deception whether in painting or advertising explores art's relation to the material world to the ways in which images mark our various physical and psychic ties to objects The author analyzes still life paintings whose subject matter is both extraordinarily diverse and deeply paradoxical from flower bouquets to grotesque formal arrangements of human body parts Leppert demonstrates that even in innocent still lifes formal design and technical execution are imbued with cultural conflict and social power is devoted to the representation of the human body as subject to obsessive gazing and as an object of display spectacle and transgression The variety of body representation is enormous pleased or tortured gorgeous or monstrous modest or lascivious powerful or weak in the bloom of life or under the anatomist's knife clothed or naked But it is the sexual body Leppert shows that has provided the West with

its richest most complex contradictory conflicted and paradoxical accounts of human identity in relation to social ideals

Literary Criticism Mark Bauerlein, 2013-04-19 As the study of literature has extended to cultural contexts critics have developed a language all their own Yet argues Mark Bauerlein scholars of literature today are so unskilled in pertinent sociohistorical methods that they compensate by adopting cliches and catchphrases that serve as substitutes for information and logic Thus by labeling a set of ideas an ideology they avoid specifying those ideas or by saying that someone essentializes a concept they convey the air of decisive refutation As long as a paper is generously sprinkled with the right words clarification is deemed superfluous Bauerlein contends that such usages only serve to signal political commitments prove membership in subgroups or appeal to editors and tenure committees and that current textual practices are inadequate to the study of culture and politics they presume to undertake His book discusses 23 commonly encountered terms from deconstruction and gender to problematize and rethink and offers a diagnosis of contemporary criticism through their analysis He examines the motives behind their usage and the circumstances under which they arose and tells why they continue to flourish A self styled handbook of counterdisciplinary usage *Literary Criticism An Autopsy* shows how the use of illogical unsound or inconsistent terms has brought about a breakdown in disciplinary focus It is an insightful and entertaining work that challenges scholars to reconsider their choice of words and to eliminate many from critical inquiry altogether
