Rethinking The Economics Of War The Intersection Of Need Creed And Greed:

Rethinking the Economics of War Cynthia J. Arnson, I. William Zartman, 2005-10-12 This collection of essays questions the adequacy of explaining today's internal armed conflicts purely in terms of economic factors and re-establishes the importance of identity and grievances in creating and sustaining such wars. Countries studied include Lebanon, Angola, Colombia, and Afghanistan.

Economics of War and Peace Ben Goldsmith, Jürgen Brauer, 2010-06-14 Presents the research on economic factors affecting peace and war. This title includes theoretical perspectives on the economic foundations of peace, violence, and war within countries; connections between international trade and inter-state conflict; and the role of legal/institutional factors in international and internal conflict.

International Mediation in Civil Wars Timothy D. Sisk, 2009-01-08 This book evaluates the role of international mediators in bringing civil wars to an end and makes the case for powerful peacemaking using incentives and sanctions to leverage parties into peace. As internal violence within countries is a hugely significant threat to international peace in the post-Cold War era, the question of how these wars end has become an urgent research and policy question. This volume explores a critical aspect of peacemaking that has yet to be sufficiently evaluated: the turbulent period beyond the onset of formal or open negotiations to end civil wars and the clinching of an initially sustainable negotiated settlement. The book argues that the transnational flow of weapons, resources, and ideas means that when civil wars today end, they are more likely to do so at the negotiating table than on the battlefield. It uses bargaining theory to develop an analytical framework to evaluate peace processes moving from stalemate in wars to negotiated settlement, and it rigorously analyses the experiences of five cases of negotiated transitions from war: South Africa, Liberia, Burundi, Kashmir, and Sri Lanka.

Great Powers and Strategic Stability in the 21st Century Graeme P. Herd, 2010-02-25 This book addresses the issue of grand strategic stability in the 21st century and examines the role of the key centres of global power: US, EU, Russia, China, and India in managing contemporary strategic threats. This edited volume examines the cooperative and conflictual capacity of Great Powers to manage increasingly interconnected strategic threats: not least terrorism and political extremism, WMD proliferation, fragile states, regional crises, and conflict, and the energy/climate nexus in the 21st century. The contributors question whether global order will increasingly be characterised by a predictable interdependent one-world system as strategic threats create interest-based incentives and functional benefits. The work moves on to argue that the operational concept of world order is a Concert of Great Powers directing a new institutional order: norms and regimes whose combination is strategic threat-specific, regionally sensitive, loosely organised, and inclusive of major states: not least Brazil, Turkey, South Africa, and Indonesia. Leadership can be singular, collective, or coalition-based, and this will characterise the nature of strategic stability and world order in the 21st century. This book will be of much interest to students of international security, grand strategy, foreign policy, and IR. Graeme P. Herd is Co-Director of the International Training Course in Security Policy at the Geneva Centre for Security Policy (GCSP). He

is co author of several books and co editor of *The Ideological War on Terror World Wide Strategies for Counter Terrorism* 2007 *Soft Security Threats and European Security* 2005 *Security Dynamics of the former Soviet Bloc* 2003 and *Russia and the Regions Strength through Weakness* 2003 *An Ethnographic Approach to Peacebuilding* Gearoid Millar, 2014-04-24 This book aims to outline and promote an ethnographic approach to evaluating international peacebuilding interventions in transitional states While the evaluation of peacebuilding and transitional justice efforts has been a growing concern in recent years too often evaluations assess projects based on locally irrelevant measures reinforce the status quo distribution of power in transitional situations and uncritically accept the implicit conceptions of the funders planners and administrators of such projects This book argues that evaluating the effects of peacebuilding interventions demands an understanding of the local and culturally variable context of intervention Throughout the book the author draws on real world examples from extensive fieldwork in Sierra Leone to argue that local experiences should be considered the primary measure of a peacebuilding project s success An ethnographic approach recognizes diversity in conceptions of peace justice development and reconciliation and takes local approaches and local critiques of the international agenda seriously It can help to empower local actors hold the international peacebuilding industry accountable to its supposed beneficiaries and challenge the Western centric ideas of what peace entails and how peacebuilding is achieved This book will be of much interest to students and scholars of peacebuilding peace and conflict studies transitional justice African politics ethnography International Relations and security studies as well as practitioners working in the field **Theories of Terrorism** Daniela Pisoiu, Sandra Hain, 2017-09-28 This new textbook provides students with a multidisciplinary theoretical and methodological introduction to terrorism studies The book identifies the main theories proposed in the field of terrorism studies as they relate to several issues why and how individuals and organizations get involved in terrorism the definition and concept of terrorism state terrorism leaving terrorism behind counter terrorism manifestations of terrorism in time and space Terrorism studies is a highly heterogeneous field with a broad range of theories and disciplines marked by ample debates Beyond individual contributions and unique perspectives however it is difficult for students and interested readers to have a broader and structured grasp of the theoretical landscape within and behind the study of terrorism This textbook offers a valuable new teaching tool which aims to provide students with the conceptual theoretical and methodological toolbox necessary to understand and research terrorism This book will be essential reading for students of terrorism studies political violence and counter terrorism and is highly recommended for students of security studies criminology politics and international relations

A Micro-Sociology of Violence Jutta Bakonyi, Berit Bliesemann de Guevara, 2014-06-11 This book aims at a deeper understanding of social processes dynamics and institutions shaping collective violence It argues that violence is a social practice that adheres to social logics and in its collective form appears as recurrent patterns In search of characteristics mechanisms and logics of violence contributions deliver ethnographic descriptions of different forms of collective violence

and contextualize these phenomena within broader spatial and temporal structures The studies show that collective violence at least if it is sustained over a certain period of time aims at organization and therefore develops constitutive and integrative mechanisms Practices of social mobilization of people and economic resources their integration in functional structures and the justification or legitimization of these structures sooner or later lead to the establishment of new forms of violent orders be it at the margins of or beyond the state Cases discussed include riots in Gujarat India mass violence in Somalia social orders of violence and non violence in Colombia humanitarian camps in Uganda trophy taking in North America and violent livestock raiding in Kenya This book was originally published as a special issue of Civil Wars

Drug Trafficking, Violence, and Instability Phil Williams, Vanda Felbab-Brown, Army War College (U.S.). Strategic Studies Institute, 2012 Although challenges posed by various kinds of violent armed groups initially appear highly diverse and unrelated to one another in fact they all reflect the increasing connections between security and governance and in particular the relationship between poor governance and violent armed groups In many cases these groups are overtly challenging the state in others they are cooperating and colluding with state structures while subtly undermining them in yet others the state is a passive bystander while violent armed groups are fighting one another The mix is different the combinations vary and the perpetrators of violence have different motives methods and targets In spite of their divergent forms violent nonstate actors VNSAs share certain qualities and characteristics These violent armed groups represent a common challenge to national and international security a challenge that is far greater than the sum of the individual groups and that is likely to grow rather than diminish over the next several decades This monograph focuses on the complex relationship between human security crime illicit economies and law enforcement It also seeks to disentangle the linkages between insurgency on the one hand and drug trafficking and organized crime on the other suggesting that criminal activities help sustain an insurgency but also carry certain risks for the insurgency

Unfinished Business Guy Olivier Faure, 2012 Most studies of international negotiations take successful talks as their subject With a few notable exceptions analysts have paid little attention to negotiations ending in failure The essays in Unfinished Business show that as much if not more can be learned from failed negotiations as from successful negotiations with mediocre outcomes Failure in this study pertains to a set of negotiating sessions that were convened for the purpose of achieving an agreement but instead broke up in continued disagreement Seven case studies compose the first part of this volume the United Nations negotiations on Iraq the Middle East Peace Summit at Camp David in 2000 Iran European Union negotiations the Cyprus conflict the Biological Weapons Convention the London Conference of 1830 33 on the status of Belgium and two hostage negotiations Waco and the Munich Olympics These case studies provide examples of different types of failed negotiations bilateral multilateral and mediated or trilateral The second part of the book analyzes empirical findings from the case studies as causes of failure falling in four categories actors structure strategy and process This is an analytical framework recommended by the Processes of International Negotiation

arguably the leading society dedicated to research in this area The last section of *Unfinished Business* contains two summarizing chapters that provide broader conclusions lessons for theory and lessons for practice *At the End of Military Intervention* Robert Johnson, Timothy Clack, 2015 Written by leading scholars and practitioners this is the first book to explore the specifics of what happens at the end of military intervention It draws upon on a wide range of post 1945 examples from a variety of regions and periods providing a foundational source on what forms a crucial element of past and present interventions Transnational Organized Crime Margaret E. Beare, 2017-07-05 This selection of influential articles traces our evolving understanding of transnational organized crime paradigm shifts from the alien conspiracy focused research to the more nuanced focused scholarship on markets and networks culminating in a focus on enablers of transnational crimes and evaluations of harm from transnational crimes The selected essays and articles reflect the way in which politics economics and social factors have impacted on scholarly thinking and the introduction also highlights the many authors and professionals who have been influential in this field This volume is an essential one stop resource for lecturers and students interested in all aspects of transnational organized crime *The Oil Wars Myth* Emily L. Meierding, 2020-05-15 Do countries fight wars for oil Given the resource s exceptional military and economic importance most people assume that states will do anything to obtain it Challenging this conventional wisdom *The Oil Wars Myth* reveals that countries do not launch major conflicts to acquire petroleum resources Emily Meierding argues that the costs of foreign invasion territorial occupation international retaliation and damage to oil company relations deter even the most powerful countries from initiating classic oil wars Examining a century of interstate violence she demonstrates that at most countries have engaged in mild sparring to advance their petroleum ambitions *The Oil Wars Myth* elaborates on these findings by reassessing the presumed oil motives for many of the twentieth century s most prominent international conflicts World War II the two American Gulf wars the Iran Iraq War the Falklands Malvinas War and the Chaco War These case studies show that countries have consistently refrained from fighting for oil Meierding also explains why oil war assumptions are so common despite the lack of supporting evidence Since classic oil wars exist at the intersection of need and greed two popular explanations for resource grabs they are unusually easy to believe in *The Oil Wars Myth* will engage and inform anyone interested in oil war and the narratives that connect them *Systems of Violence, Second Edition* Nazih F. Richani, 2013-07-10 This book examines the political economic and military factors that have contributed to thirty seven years of protracted violent conflict in Colombia Using four years of field research and more than two hundred interviews Nazih Richani examines Colombia s war system the systemic interlacing relationship among actors in conflict their respective political economy and also the overall political economy of the system they help in creating Several key questions are raised including when and why do some conflicts protract and what types of socioeconomic and political configurations make peaceful resolutions difficult to obtain Also addressed are the lessons of other protracted conflicts such as those found in

Lebanon Angola and Italy In this expanded second edition Richani contributes new chapters looking at developments in Colombia since the book's initial publication a decade ago and a look at the challenges for peace that lie ahead **Mexico Is Not Colombia** Christopher Paul, Colin P. Clarke, Chad C. Serena, 2014-05-05 Despite the scope of the threat they pose to Mexico's security violent drug trafficking organizations are not well understood and optimal strategies to combat them have not been identified While there is no perfectly analogous case from history Mexico stands to benefit from historical lessons and efforts that were correlated with improvement in countries facing similar challenges related to violence and corruption

War and the Crisis of Youth in Sierra Leone Krijn Peters, 2011-03-28 The armed conflict in Sierra Leone and the extreme violence of the main rebel faction the Revolutionary United Front RUF have challenged scholars and members of the international community to come up with explanations Up to this point though conclusions about the nature of the war are mainly drawn from accounts of civilian victims and commentators who had access to only one side of the war The present study addresses this currently incomplete understanding of the conflict by focusing on the direct experiences and interpretations of protagonists paying special attention to the hitherto neglected and often underage cadres of the RUF The data presented challenges the widely canvassed notion of the Sierra Leone conflict as a war motivated by greed not grievance Rather it points to a rural crisis expressed in terms of unresolved tensions between landowners and marginalized rural youth further reinforced and triggered by a collapsing patrimonial state **Leashing the Dogs of War** Chester A

Crocker, Fen Osler Hampson, 2007 The definitive volume on the sources of contemporary conflict and the array of possible responses to it *Foreign Intervention, Warfare and Civil Wars* Adam Lockyer, 2017-09-01 This book examines the impact of foreign intervention in the course and nature of warfare in civil wars Throughout history foreign intervention in civil wars has been the rule rather than the exception The involvement of outside powers can have a dramatic impact on the course and nature of internal conflicts Despite this there has been little research which has sought to explain how foreign intervention influences the course of civil wars This book seeks to rectify this gap It examines the impact of foreign intervention on the warfare that characterises civil wars through by studying the cases of the Angolan and Afghan civil wars It investigates how foreign resources affect the military power of the recipient belligerent and examines how changes in the balance of capabilities influence the form of warfare that characterises a civil war Warfare in civil wars is often highly fluid with belligerents adapting their respective strategies in response to shifts in the balance of military capabilities This book shows how the intervention of foreign powers can manipulate the balance of capabilities between the civil war belligerents and change the dominant form of warfare The findings presented in this book offer key insights for policy makers to navigate the increasing internationalization of civil wars around the globe This book will be of much interest to students of civil wars intra state conflict war and conflict studies and security studies Sustainable Development, International Criminal Justice, and Treaty Implementation Sébastien Jodoin, Marie-Claire Cordonier Segger, 2013-06-24 This book provides a serious and timely

perspective on the relationship between two important and dynamic fields of international law **The Lebanese Connection** Jonathan Marshall, 2012-05-16 Long before Mexico Colombia and Afghanistan became notorious for their contributions to the global drug traffic Lebanon was a special target of U S drug agents for harboring the world s greatest single transit port in the international traffic in narcotics In the words of one American official certain of the largest traffickers are so influential politically and certain highly placed officials so deeply involved in the narcotic traffic that one might well state that the Lebanese Government is in the narcotics business Using previously secret government records *The Lebanese Connection* uncovers for the first time the story of how Lebanon s economy and political system were corrupted by drug profits and how by financing its many ruthless militia Lebanon s drug trade contributed to the country s greatest catastrophe its fifteen year civil war from 1975 to 1990 In so doing this book sheds new light on the dangerous role of vast criminal enterprises in the collapse of states and the creation of war economies that thrive in the midst of civil conflicts Taking a regional approach to the drug issue Jonathan Marshall assesses the culpability of Syria Israel and of Palestinian factions and other groups that used Lebanon as their battleground On the international level he documents Lebanon s contribution to the hard drug problem of major consuming countries from the days of the French Connection through the Pizza Connection as well as Lebanon s unrivaled place in the global hashish market *Positive Peace in Theory and Practice* Tuba Turan, 2015-10-20 Examining the shortcomings of eliciting sustainable intra state peace through the UN system and the underlying positive peace paradigm of the liberal traditions the book maintains that a novel positive peace vision and framework under the auspices of the UN is warranted Building upon grievance based explanations of violent conflicts and conflict transformation research this book develops a comprehensive positive peace framework that involves the early tackling of identity divisions i e Fundamental Conflicts through UN facilitated deliberative and dialogical processes at the 1 5 track diplomacy level This framework is designed to complement current UN post conflict peacebuilding and structural prevention practice By dealing both with how to operationalise early conflict prevention in a workable manner and developing a comprehensive yet viable positive peace approach this book entails an extensive interdisciplinary approach and new in depth analyses of the wide ranging normative and policy aspects of the quest of elevating positive peace to a core objective of UN practice
