Pursuit of Pattern Languages for Societal Change - PURPLSOC Baumgartner, Peter, Gruber-Muecke, Tina, Sickinger, Richard, 2017-09-29 The international PURPLSOC In Pursuit of Pattern Languages for Societal Change platform aims to substantiate the relevance of Christopher Alexander's pattern language approach in all major domains by showing its broad applicability and richness and bringing best practice examples from outside the scientific community into research This anthology of 19 papers proceedings of the

PURPLSOC 2015 World Conference held at Danube University Krems in Austria is the first outcome of this discussion and reflection. The papers bring a manifold and broad overview of the current state of the implementation of Alexander's ideas in divergent fields. Additionally, PURPLSOC offers a platform for the research and discussion of Alexander's most recent work *The Nature of Order: An Essay on the Art of Building and the Nature of the Universe* (2004). The four volumes explore the living process with its 15 structure-preserving transformations applied in the unfolding of wholeness. ***Rethinking Neighborhoods*** William A.V. Clark, 2024-05-02. Although neighborhoods are sometimes perceived as just a backdrop to our lives, there is considerable evidence that they are central to our sense of wellbeing and in the functioning of the city. *Rethinking Neighborhoods* is about these areas of geography: what we know about how neighborhoods function, why they matter, and how we choose where to live. ***The Importance of Place*** Borut Juvanec, Amir Pašić, 2016-04-26. How do we value historic urban landscape in order to intervene within it as designers? This is the central question posed in this volume and is tackled by its 16 essays, which investigate different facets of value as bases of building and design practices on a range of spatial scales and brought about by a variety of historical circumstances. While the modernist metanarrative of universalism propagated functionalism and through it biological and psychological motives of design activity, contemporary building practices are based on more complex and diverse patterns of values that range from cultural to market-driven. Researched, reconstructed, and critically assessed, the different case studies brought together here reveal the many possible shades of the importance of place with which architects, urban planners, and city officials work today in the Southern European context. Marked in recent decades by social and political transition and economic hardship, the reality of this region's cities caused repeated revisions of value systems in all spheres of public life, making it thus a particularly intriguing context to observe in these terms. In this sense, these essays will be of interest to university scholars in architecture, art history, urbanism, and planning, in addition to practicing designers and public officials who encounter problems of value definitions in their everyday working tasks related to the shaping and management of contemporary urban space. ***Revisiting the Colonial Past in Morocco*** Driss Maghraoui, 2013-07-18. Exploring the concept of colonial cultures, this book analyses how these cultures both transformed and were transformed by their various societies. Challenging both the colonial vulgate and the nationalist paradigm, *Revisiting the Colonial Past in Morocco* examines the lesser-known specificities of particular moments, practices, and institutions in Morocco with the aim of uncovering a new colonial history. By examining society on a micro level, this book raises the profiles of the mass of Moroccans who were highly influential in the colonial period yet have been excluded from the historical record because of a lack of textual source material. Introducing social and cultural history, gender studies, and literary criticism to the more traditional economic, political, and military studies, the book promotes a more complex and nuanced understanding of Moroccan colonial history. Employing new theoretical and methodological approaches, this volume encourages a re-assessment of existing work and promotes a more interdisciplinary approach to the colonial history of

Morocco Revisiting the Colonial Past in Morocco is a highly topical and useful addition to literature on the subject and will be of interest to students and scholars of History Imperialism and more generally Middle Eastern Studies **Redefining**

Richman,2014-01-10 Trenton like the state of New Jersey is often maligned these days but there was a time when Trenton was the fiftieth largest city in the United States and boasted worldwide leaders in the iron and steel rubber and pottery industries Like many cities of its comparative size and prowess that came of age in the Industrial Revolution Trenton diminished in the aftermath of World War II and has become for many one of the lost cities a place of lessened population abandoned houses and shuttered factories Featuring a series of meditative explorations on the essence of the American post industrial city through the prism of Trenton this book explores the city s history architecture parks factories and neighborhoods through text and image highlighting the importance of such post industrial cities Rethinking English in Schools Viv Ellis,Carol Fox,Brian Street,2007-11-20 Why should young people study a subject called English This question lies at the heart of this fascinating monograph which brings together the diverse perspectives of many leading thinkers about English and literacy education This meticulously researched and well written collection takes as its starting point the importance of the history of the subject in the formation of its constitution and its boundaries First and foremost it proposes that questions of aims and values have informed these choices Equally it suggests that returning to these educational questions helps us to understand curriculum and pedagogy in complex ways that a simple focus on content and methods neglects Curriculum and pedagogy bring learners teachers institutions and the wider society into the debate **Beware of smart people! Redefining the smart city paradigm towards inclusive urbanism** Stollmann, Jörg,Wolf, Konrad,Brück, Andreas, Frank, Sybille,Million, Angela, Misselwitz, Philipp,Schlaack, Johanna,Schröder, Carolin,2016-11-30 The Smart City paradigm aims at resource efficient urban development by means of ICT implementation Cities where we work and conduct our research are building Smart City strategies and that research institutions increasingly fund research into the development of smart infrastructure and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after takes care for and fosters this resource without exhausting it Commoning is a practice that seems closer than any other practice to a sustainable way of life Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered developed and advocated This question is by no means merely theoretical It is also a very practical question which pertains to the management and distribution of the resources we depend on It is a very political question as it demands

negotiation and the taking of sides And it is an ethical question in that it relates to how we respect and stand up for each other our fellow human beings and also the non human nature for which we are responsible The essays and transcripts of the symposium Beware of Smart People want to make a first contribution and stimulate future research in the field Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten St dte in denen wir arbeiten und ber die wir forschen entwickeln Smart City Strategien und Forschungsf rderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung konomisches Wachstum h here Lebensqualit t Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen f r mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen Neue urbane Akteure werden zu Agenten indem sie ihre Erfahrungswissen ihre lokalen Kenntnisse ihre sozialen Netzwerke und F higkeiten zur Kooperation und Kollaboration einbringen Hintergrund diese Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City welcher sich zunehmend Geh r verschafft der Diskurs ber die Gemeing ter die Commons Commons werden definiert als das Zusammenspiel von Ressourcen Menschen und Praktiken Ressourcen die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commoning welche die Ressource schonend bewirtschaftet ohne sie zu verbrauchen In diesem Sinne scheint Commoning eine Praxis die einer nachhaltigen Lebensweise am n chsten kommt Sind diese zwei Diskurse der Diskurs ber die Smart City und jener ber die urbanen Gemeing ter unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten welche offen gelegt weiter entwickelt und verfechtet werden sollten Diese Frage ist keineswegs eine rein theoretische Sie ist eine sehr praktische Frage da sie auf das die Verteilung und das Management lebenswichtiger Ressourcen zielt Sie ist eine politische Frage da sie Auseinandersetzung und Parteinahme einfordert Und sie ist eine ethische Frage denn sie fordert gegenseitigen Respekt und Einsatz ein f r unsere Mitmenschen sowie f r die nichtmenschliche Natur f r die wir Verantwortung tragen Die Texte und Aufzeichnungen des Symposiums Beware of Smart People wollen hierzu einen Beitrag leisten und zuk nftige Forschungsvorhaben stimulieren
