## **Rethinking Today's Minorities:**

**Rethinking Today's Minorities** Vincent Parrillo, 1991-01-30 The characteristics of minorities in the United States have changed significantly over the past twenty years. Today's better educated, more highly skilled immigrants must merge with more acculturated minority groups to achieve assimilation while still preserving the rich diversity of their ethnic heritages. This concept is one focus of *Rethinking Today's Minorities*, a collection of articles by some of the nation's foremost experts in the field of intergroup relations. This volume offers new conceptual overviews by which to compare and evaluate acculturation. The essays also focus on rethinking the nature of minorities long present in the United States, including African Native and Asian Americans. Suggestions for policy changes and programs for social action designed to address the needs of minority groups are also included. Following an introductory overview of the changing demographics of today's minorities, the contributors then discuss major developments in minority communities, such as the disappearance of formerly distinctive European American ethnic groups, the continuation of affirmative action, and the molding of policies to benefit Native Americans and refugees. The book then includes essays on the growth of the Puerto Rican community in the U.S. and the emerging Iranian American middle class. The study concludes with a challenge to the media for its role in perpetuating ethnic stereotypes. *Rethinking Today's Minorities* will be an excellent supplemental text for graduate or undergraduate courses in race and ethnic relations, sociology of minorities, American studies, and immigration history. It will also be an important reference book for school and public libraries.

**New Tribalisms** Michael W. Hughey, 2016-03-29 The resurgence of racial, ethnic, and nationalist loyalties in the contemporary world are examined in this volume. Considered collectively, the contributors offer both a conceptual understanding of race and ethnicity and an empirical examination of their renewed importance in and implications for contemporary societies. With sections on the American experience with ethnoracial pluralism and on ethnonationalist movements in other parts of the world, Hughey offers an extensive treatment of the origins, expressions, and implications of the new tribalisms now confronting the world.

*Racism in Contemporary America* Meyer Weinberg, 1996-05-23 *Racism in Contemporary America* is the largest and most up-to-date bibliography available on current research on the topic. It has been compiled by award-winning researcher Meyer Weinberg, who has spent many years writing and researching contemporary and historical aspects of racism. Almost 15,000 entries to books, articles, dissertations, and other materials are organized under 87 subject headings. In addition, there are author and ethnic racial indexes. Several aids help the researcher access the materials included. In addition to the subject organization, the bibliography entries are annotated whenever the title is not self-explanatory. An author index is followed by an ethnic racial index, which makes it convenient to follow a single group through any or all the subject headings. This is a source book for the serious study of America's most enduring problem, as such it will be of value to students and researchers at all levels and in most disciplines.

Racial Classification and History E. Nathaniel Gates, 1997

Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the

interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject Also available individually by volume 1 The Concept of Race in Natural and Social Science 0 8153 2600 9 288 pages 2 Cultural and Literary Critiques of the Concepts of Race 0 8153 2601 7 3 Racial Classification and History 0 8153 2602 5 4 The Judicial Isolation of the Racially Oppressed 0 8153 2599 1

Solutions have been offered from all quarters but tend to be piecemeal and all too often ideological In this tough minded look at the history current climate and future of university education in the United States Melvyn L Fein re examines the mission of higher education and outlines what institutions can do to better prepare students for an ever more complex techno commercial society Fein argues that students must have the opportunity to explore and discover what works for them and that the most important tool for institutions of higher education is self direction Professors must be allowed to teach in their own ways bringing their own experience into the classroom Since university missions differ both universities and professors need the freedom to make decisions independently The imminent need is for a democratic elite consisting of self directed leaders who possess technical and social expertise as well as personal motivation The tools for change are appropriate curricula communities of learners and a genuine marketplace of ideas While there is no magic bullet Fein contends that we can and should build on the achievements of the past so as to evolve more responsive educational institutions those that promote merit responsibility and universalism
