between the East and West Russian intellectuals have for centuries been divided geographically politically and culturally into two distinct groups the Slavophiles who rejected Western style democracy preferring a more holistic and abstract vision and the more rational and scientific minded Westernizers These two ideologies cut across the political spectrum of late nineteenth century Russia and competed for dominance in the country's intellectual life The tension created between these two opposing groups caused the feeling that violent upheaval was Russia's future In turn many began to think that Russia was possibly following the path of France and that a French style revolution might be possible on Russian soil In *The French Revolution in Russian Intellectual Life* Dmitry Shlapentokh describes the role that the French democratic revolution played in Russia's intellectual development by the end of the nineteenth century The revolutionary upheaval in Russia at the beginning of twentieth century and the continuous expansion of the West convinced most Russian intellectuals that the French Revolution in its democratic reading was indeed the pathway of history Yet the rise of totalitarian regimes and their expansion proved the validity of the sober vision of nineteenth century Russian intellectuals Some conservative Russian intellectuals believed that not only would Russia preserve its authoritarian regime but it would spread this regime all over the world In this context Shlapentokh argues the French Revolution with its democratic tradition was only a phenomenon of Western civilization and hence transitory The flirtation with Western ideology with its democratic polity and market economy that followed in the wake of the collapse of the communist regime culminated in an increasing push for corporate authoritarianism and nationalism This work helps explain why Russia turned away from democratic to autocratic styles<sup>1</sup>

**Bulletin of the Russian Information Bureau in the U.S.** Russian Information Bureau,1920      **Language and Metaphors of the Russian Revolution** Lonny Harrison,2020-12-16 *Language and Metaphors of the Russian Revolution* Sow the Wind Reap the Storm is a panoramic history of the Russian intelligentsia and an analysis of the language and ideals of the Russian Revolution from its inception over the long nineteenth century through fruition in early Soviet society This volume examines metaphors for revolution in the storm flood and harvest imagery ubiquitous in Russian literary works At the same time it considers the struggle to own the narrative of modernity including Bolshevik weaponization of language and cultural policy that supported the use of terror and social purging This uniquely cross disciplinary study conducts a close reading of texts that use storm flood and agricultural metaphors in diverse ways to represent revolution whether in anticipation and celebration of its ideals or in resistance to the same A spotlight is given to the lives and works of authors who responded to Soviet authoritarianism by reclaiming the narrative of revolution in the name of personal freedom and restoration of humanist values Hinging on the clashes of culture wars and class wars and residing at the intersection of ideas at the very core of the fight for modernity this book provides a critical reading of authoritarian discourse and investigates rare examples of the counter narratives that thrived in spite of their suppression      Language Ideologies in Transition Mika Lähteenmäki,Marjatta Vanhala-Aniszewski,2010 The articles collected in this volume address linguistic diversity in Russia

and Finland from different perspectives and aim to provide both theoretical and empirical knowledge concerning recently emerged multilingual and multicultural developments. The topics include representations and conceptualisations of multilingualism, the language education of immigrants, the linguistic rights of ethnic minorities, language policy and ideologies underlying multilingual activities. Linguistic and cultural diversity is approached from different theoretical and methodological perspectives, e.g. discourse analysis, ethnography. The focus is on both micro and macro level phenomena. The articles show how the ideologies that underlie language policies and also various grass root multilingual practices are conditioned by broader political, historical and socio-cultural contexts.

### **The Power of Language and Rhetoric in**

**Russian Political History** Richard S. Wortman, 2017-11-30. This book examines the rhetorical force of certain key words in the discourses of Russian state political thought and literature. It shows how terms for cultured conduct, *kulturnost*, political affection, love, *liubov*, joy, *radost*, etc., personhood, *lichnost*, truth, *pravda*, and geographical integrity, *tsel'nost*, assumed almost sacral meaning. It considers how these terms took on a life of their own, imposing the designs of the Russian state and defining the hopes of educated society in the process. By exploring the usage of these words in a wide range of texts, Richard Wortman provides glimpses into the ideas and feelings of leading figures and thinkers in Russian history, from Peter the Great to Alexander Herzen and Nicholas Berdiaev, as well as writers like Mikhail Lermontov, Ivan Turgenev, and Fedor Dostoevsky, giving a sense of the intellectual and emotional universe they inhabited. *The Power of Language and Rhetoric in Russian Political History* provides both students and scholars with a specific focus through which to approach Russian culture and history. This book is essential reading for students of Russian government, thought, literature, and political action.
