How to start a garden raised vegetable garden square foot gardening planting a vegetable garden backyard garden home vegetable garden vegetable gardening Here is an excerpt from No Work Vegetable Gardening Many years ago when I was just beginning to learn about organic gardening I read Ruth Stout s classic No Work Garden Book in which she recommended 9 or so inches of hay as a year round mulch I busted my you know what dragging home 80 90 bales of hay two at a time in the trunk of my car somehow maneuvering them into my backyard and spreading the hay in my garden only to find several months later that I had weeds in my yard that I had never seen before in my whole entire life It took years to get rid of those weeds In my opinion in rural areas hay is fantastic it s great for the plants I just don t want to have to deal with those field weed seeds again There are other ways to get the browns needed for the beds One of our best sources for good clean browns is that mountain of junk mail that comes to your house every day Discard the colored and or glossy pages possibly toxic ink get yourself a quality paper shredder the smaller the pieces the quicker they will decompose and simply run it through the shredder every day instead of throwing it into the garbage or recycling bin In effect it is being recycled into your vegetables Same with newspapers You ll soon have more browns than you ll know what to do with Mix them with other organic matter when adding them to your bed as they tend to mat when clumped together and may form a barrier for plant root growth Or use them on top as a final mulch Another is leaves Gather them in the fall and store them in those large black plastic bags somewhere hidden from view in the back yard until they re needed Neighbors may even offer to give you theirs End of Excerpt

The Organic Profit Andrew N. Case, 2018-03-15 From green lifestyle mavens who endorse products on social media to natural health activists sponsored by organic food companies the marketplace for advice about how to live life naturally is better stocked than ever Where did the curious idea of buying one s way to sustainability come from In no small part as Andrew Case shows the answer lies in the story of entrepreneur and reformer J I Rodale his son Robert Rodale and their company the Rodale Press These pioneers of organic gardening were also pioneers in cultivating a niche for natural health products in the 1950s organizing the emerging marketplace for organic foods in the 1960s and publishing an endless supply of advice books on diet and health in the process Rodale s marketplace environmentalism brought environmentally minded consumers together and taught Americans how to grow food eat and live in more environmentally friendly ways Yet the marketplace has proved more effective at addressing individual health concerns than creating public health interventions It is as liable to champion untested and ineffectual health supplements as it is to challenge the indiscriminant use of dangerous pesticides For anyone trying to make sense of the complex tensions between business profits and the desire for environmental reform The Organic Profit is essential reading
