## **Selected Models Of Developmental Education Programs In Higher Education:**

Selected Models of Developmental Education Programs in Higher Education Vernon L. Farmer, Wilton A.

Barham, 2001-04-11 Selected Models of Developmental Education Programs in Higher Education includes models that are based on defensible theories about how students grow and develop at all levels of the learning continuum. These models emphasize the theories and concepts that underlie developmental education as a field of practice and research with a theoretical foundation in developmental psychology and learning theory. The theory-based models consist of methods and techniques for implementing developmental education activities and ways of creating environments intended to improve developmental students' learning outcomes. These models include a rationale, a theory that justifies the models, and an explanation of how the models are designed. The rationale is supported by empirical evidence that the models work. These models were selected because they represent varied frames of reference toward educational goals and objectives. Therefore, this book is a valuable resource for scholars, researchers, educators, and practitioners seeking to improve developmental students' learning outcomes in developmental education programs in institutions of higher education. **Handbook of**

**College Reading and Study Strategy Research** Rona F. Flippo, Thomas W. Bean, 2018-06-12 The most comprehensive and up-to-date source available for college reading and study strategy practitioners and administrators, the Third Edition of the Handbook of College Reading and Study Strategy Research reflects and responds to changing demographics as well as politics and policy concerns in the field since the publication of the previous edition. In this thorough and systematic examination of theory, research, and practice, the Handbook offers information to help college reading teachers make better instructional decisions, justification for programmatic implementations for administrators, and a complete compendium of both theory and practice to better prepare graduate students to understand the parameters and issues of this field. The Handbook is an essential resource for professionals, researchers, and students as they continue to study, research, learn, and share more about college reading and study strategies. Addressing current and emerging theories of knowledge, subjects, and trends impacting the field, the Third Edition features new topics such as disciplinary literacy, social media, and gaming theory.

**Research in Education**, 1974 Resources in Education, 1996-05 *Access at the Crossroads* David R.

Arendale, 2010-05-17 Learning assistance often operates at the crossroads of the institution where academic affairs, student affairs, and enrollment management converge. This report investigates the effectiveness of learning assistance for supporting academic affairs with better-prepared students for academically rigorous courses, working with student affairs to achieve higher student development outcomes, and supporting enrollment management programs to increase persistence rates. This report explores difficult questions confronting learning assistance: What is the obligation of colleges for providing assistance for its students? Is learning assistance a civil rights issue for historically underrepresented students attending postsecondary education? What is the history of learning assistance for serving previous generations of students, even at the most prestigious

public and private institutions in the United States Are learning assistance needs better met by high schools and two year institutions Do learning assistance activities benefit the postsecondary institution and society Although it has a presence in most postsecondary institutions the expression of learning assistance is quite diverse through credit and noncredit activities The preferred term used in this report is learning assistance because it is commonly used and most inclusive of the various approaches and activities of the field This is the sixth issue the 35th volume of the Jossey Bass series ASHE Higher Education Report Each monograph in the series is the definitive analysis of a tough higher education problem based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication
