

MODULE FOR SOME SELECTED TOPICS IN PHILOSOPHY OF EDUCATION

Prepared by Dr Patrick O. Akinsanya

LESSON ONE

What is Philosophy/Philosophy of Education?

Learning Objectives:

At the end of the lesson, learners should be able to:

1. Define philosophy in their own possible way
2. Identify and discuss major modes of philosophy
3. Conceptualise the meaning of philosophy of education
4. Enumerate the major modes of philosophy of education

Meaning of Philosophy

Various philosophers define philosophy in various ways. Each attempt at a definition raises a criticism which could sometimes lead to metaphilosophy, that is, philosophizing about philosophy. But one wonders less about this situation when one realises that every philosophy is a product of so many factors such as; one's environment, one's background and orientation, one's experiences, one's education and exposure, and one's natural affiliations and propensities, which are definitely different across board. It logically follows that if philosophy is a product of all of these mentioned factors, then one's perception about the meaning and function of philosophy will vary. This explains the reason for the difference in thought pattern of Aristotle and his teacher, Plato. It equally explains the significant difference in Dewey's thinking and Rousseau's, and so on. But suffice it to mention that despite these divergences in the conception of philosophy, certain activities and tenets are common among philosophers. This is to say that from the ancient period to medieval, to modern, to contemporary period, philosophers have engaged in some preoccupations which cut across board. To understand philosophy therefore, while trying to escape vilifications at the attempt to define it, one may simply reflect on what philosophers have preoccupied themselves with down the ages and the modes used in philosophising. In this reflection, it should be easy for you to discern the meaning and the activity called philosophy.
