Selected Works 1990-1994:

Selected Works, 1990-1994 Merrill A. McPeak, 1995 General Merrill A McPeak became the 14th chief of staff of the Air Force in the fall of 1990 as the nation was beginning to adjust to the reality of Western victory in the cold war Desert Shield was ongoing Desert Storm was only a few weeks away other international crises Bosnia Somalia Rwanda Haiti lay ahead A significant downsizing of resources available to the Air Force had been under way for half a decade and there was every reason to believe this trend would continue In such circumstances the Air Force could have adopted a wait and see attitude just doing the best job they could with the hand they were dealt Instead General McPeak launched the most far reaching reorganization in the Air Force s history often getting ahead of change at a pace that confounded the Air Force rank and file This volume is a collection of documents authored by General McPeak These documents cover the period from late October 1990 when he was confirmed as chief of staff to March 1995 after his retirement from active service Many of the documents are speeches but there also are briefings messages congressional testimony a press conference transcript a letter to the president elect two magazine articles an Air Force policy directive and the only letter to an editor written by the general during his tenure Each document presents an account of his perspective on an important issue Together these documents add up to a body of work that at the same time is both wide ranging and has an impressive constancy of themes 88 figures

Creech Blue James C. Slife, 2004 Colonel Slife chronicles the influence of the late Gen Wilbur L Bill Creech 7a leader visionary warrior and mentor 7in the areas of equipment and tactics training organization and leader development His study serves both to explain the context of a turbulent time in our Air Force s history and to reveal where tomorrow s airmen may find answers to some of the difficult challenges facing them today Colonel Slife who addresses such controversial topics as the development of the Army s AirLand Battle doctrine and what it meant to airmen is among the first to describe what historians will surely see in years to come as the revolutionary developments of the late 1970s early 1980s and General Creech s central role Creech Blue enlightens the Air Force on its strongly held convictions during that period and challenges the idea that by 1990 when Iraq invaded Kuwait the Air Force had forgotten how to wage a strategic air campaign and was dangerously close to plunging into a costly and lengthy war of attrition had it not been for the vision of a small cadre of thinkers on the Air Staff In exploring the doctrine and language of the decade leading up to Operation Desert Storm Colonel Slife reveals that the Air Force was not as shortsighted as many people have argued Landpower in the Long War Jason W. Warren, 2019-06-14 War and landpower s role in the twenty first century is not just about military organizations tactics operations and technology it is also about strategy policy and social and political contexts After fourteen years of war in the Middle East with dubious results a diminished national reputation and a continuing drawdown of troops with perhaps a future force increase proposed by the Trump administration the role of landpower in US grand strategy will continue to evolve with changing geopolitical situations Landpower in the Long War Projecting Force After 9 11 edited by Jason W

Warren is the first holistic academic analysis of American strategic landpower. Divided into thematic sections, this study presents a comprehensive approach to a critical aspect of US foreign policy as the threat or ability to use force underpins diplomacy. The text begins with more traditional issues such as strategy and civilian military relations and works its way to more contemporary topics such as how socio-cultural considerations affect the landpower force. It also includes a synopsis of the suppressed Iraq report from one of the now retired leaders of that effort. The contributors, made up of an interdisciplinary team of political scientists, historians, and military practitioners, demonstrate that the conceptualization of landpower must move beyond the limited operational definition offered by Army doctrine in order to encompass social changes, trauma, the rule of law, acquisition of needed equipment, civil-military relationships, and bureaucratic decision-making, and argue that landpower should be a useful concept for warfighters and government agencies.

Secretaries and chiefs of staff of the United States Air Force, The Evolution of the US Air Force Israel Guy, 2024-08-05. This book looks at the history of the US Air Force through the lens of its lack of preparedness for major wars, which is shown to be a result of its organizational culture. The US Air Force is probably the most powerful military force in history, both in its destructive firepower and in its ability to project it globally. Yet despite its unparalleled power, the Air Force entered its first three pivotal conflicts—World War II, the Korean War, and the Vietnam War—unprepared. But surprisingly, it was remarkably well prepared for its fourth major war, the Gulf War of 1991. Could there be an underlying trait or characteristic which influenced the Air Force between the wars that historically caused the US Air Force to be unprepared for war or prepared for the wrong type of war? Surprisingly, there is such a factor which was quite prominent in the Air Force's complex identity: its organizational culture. Besides providing a historical description of the Air Force, this book demonstrates clearly how its organizational culture evolved and how it caused the US Air Force to be prepared for the wrong war. It also shows that when the organizational culture changed, the Air Force changed its focus and arrived prepared for the following war, the 1991 Gulf War. This book will be of interest to students of air power, strategic studies, US public policy, and security studies in general.

Collected Works (volume 1): Published Papers Stephen Luttrell, 2023-10-24. The motivation for the research that is described in these volumes is the wish to explain things in terms of their underlying causes rather than merely being satisfied with phenomenological descriptions. When this reductionist approach is applied to information processing, it allows the internal structure of information to be analysed so information processing algorithms can then be derived from first principles. One of the simplest examples of this approach is the diagonalisation of a data covariance matrix; there are many variants of this basic approach, such as singular value decomposition, in which the assumed independent components of high-dimensional data are identified and extracted. The main limitation of this type of information analysis approach is that it is based on linear algebra applied globally to the data space, so it is unable to preserve information about any local data structure in the data space. For instance, if the data lives on a low-dimensional curved manifold embedded in the data space, then only the global properties of this manifold would

be preserved by global linear algebra methods In practice data whose high dimensional structure is non trivial typically lives on a noisy version of a curved manifold so techniques for analysing such data must automatically handle this type of structure For instance a blurred image of a point source is described by its underlying degrees of freedom i e the position of the source and as the source moves about it generates a curved manifold that lives in the high dimensional space of pixel values of the sampled image The basic problem is then to deduce the internal properties of this manifold by analysing examples of such images A more challenging problem would be to extend this analysis to images that contain several overlapping blurred images of point sources and so on There is no limit to the complexity of the types of high dimensional data that one might want to analyse These methods then need to be automated so that they do not rely on human intervention which would then allow them to be inserted as components into information processing networks The purpose of the research that is described in these volumes is to develop principled information processing methods that can be used for such analysis Self organising information processing networks arise naturally in this context in which ways of cutting up the original manifold into simpler pieces emerge automatically

Airmen and air theory a review of the sources Phillip S. Meilinger, 2001 This part of the book reviews the state of American airpower biography and autobiography I have set certain parameters to define the boundaries of my discussion I discuss biographies and autobiographies anthologies and oral histories of military officers who served in senior positions Thus although the stories of great aviators like Eddie Rickenbacker Charles Lindbergh and Chuck Yeager are important those men did not command large forces either in combat or in peace they had only a temporary effect on the development of strategy and doctrine Similarly excluded are civilian political leaders and industrialists like Stuart Symington and Donald Douglas even though they played key roles In their own spheres What follows are the stories some published some not of America's greatest military airmen some told by themselves others by biographers The order of presentation is roughly chronological according to the time during which these men served The fact that a surprising number of air luminaries do not appear here means that much work remains to be done

Encyclopedia of Twentieth-Century Photography, 3-Volume Set Lynne Warren, 2005-11-15 The Encyclopedia of Twentieth Century Photography explores the vast international scope of twentieth century photography and explains that history with a wide ranging interdisciplinary manner This unique approach covers the aesthetic history of photography as an evolving art and documentary form while also recognizing it as a developing technology and cultural force This Encyclopedia presents the important developments movements photographers photographic institutions and theoretical aspects of the field along with information about equipment techniques and practical applications of photography To bring this history alive for the reader the set is illustrated in black and white throughout and each volume contains a color plate section A useful glossary of terms is also included

Collected Works of Domenico Mario Nuti, Volume I Saul Estrin, Milica Uvalic, 2023-05-20 This book the first of two volumes brings together the work of Domenico Mario Nuti to highlight his

significant and varied contribution to economics Bringing together works from across Nuti's career his distinctive intellectual framework is exemplified in relation to discussions on the drivers of economic growth and development the most efficient economic system the organisation of firms and how economies should be managed This volume gives particular attention to socialist economic systems and the transition of former socialist countries to market economies This book through the inclusion of an introduction aims to contextualise his ideas and illustrate their continued relevance It will be of wide interest to students and researchers

Global Air Power John Andreas Olsen, 2011 What influences have shaped air power since human flight became a reality more than a hundred years ago *Global Air Power* provides insight into the evolution of air power theory and practice by examining the experience of six of the world's largest air forces those of the United Kingdom the United States Israel Russia India and China and of representative smaller air forces in Pacific Asia Latin America and continental Europe The chapters written by highly regarded scholars and military leaders explore how various nations have integrated air power into their armed forces and how they have applied air power in both regular and irregular warfare and in peacetime operations They cover the organizational professional and doctrinal issues that air forces confronted in the past the lessons learned from victory and defeat and emerging challenges and opportunities Further *Global Air Power* supplements the traditional military perspective with examinations of the ideological economic and cultural factors that give air forces their distinctive characters Chapters show how the interplay among these internal factors together with external challenges determines the structure role and effectiveness of air forces Together these chapters illuminate universal trends as well as similarities and differences among the world's air forces Its combination of military history and sociopolitical analysis makes *Global Air Power* especially valuable to a broad range of historians air power specialists and general readers interested in national defense and international relations

Collected Works (volume 4): Unpublished Papers Stephen Luttrell, 2023-10-25 The motivation for the research that is described in these volumes is the wish to explain things in terms of their underlying causes rather than merely being satisfied with phenomenological descriptions When this reductionist approach is applied to information processing it allows the internal structure of information to be analysed so information processing algorithms can then be derived from first principles One of the simplest examples of this approach is the diagonalisation of a data covariance matrix there are many variants of this basic approach such as singular value decomposition in which the assumed independent components of high dimensional data are identified and extracted The main limitation of this type of information analysis approach is that it is based on linear algebra applied globally to the data space so it is unable to preserve information about any local data structure in the data space For instance if the data lives on a low dimensional curved manifold embedded in the data space then only the global properties of this manifold would be preserved by global linear algebra methods In practice data whose high dimensional structure is non trivial typically lives on a noisy version of a curved manifold so techniques for analysing such data must automatically handle this type of structure

Breaking the Phalanx Douglas A. Macgregor, 1997-01-30 This work proposes the reorganization of America's ground forces on the strategic operational and tactical levels Central to the proposal is the simple thesis that the U.S. Army must take control of its future by exploiting the emerging revolution in military affairs The analysis argues that a new Army warfighting organization will not only be more deployable and effective in Joint operations reorganized information age ground forces will be significantly less expensive to operate maintain and modernize than the Army's current Cold War division based organizations And while ground forces must be equipped with the newest Institute weapons new technology will not fulfill its promise of shaping the battlefield to American advantage if new devices are merely grafted on to old organizations that are not specifically designed to exploit them It is not enough to rely on the infusion of new expensive technology into the American defense establishment to preserve America's strategic dominance in the next century The work makes it clear that planes ships and missiles cannot do the job of defending America's global security issues alone The United States must opt for reform and reorganization of the nation's ground forces and avoid repeating Britain's historic mistake of always fielding an effective army just in time to avoid defeat but too late to deter an aggressor

Space Force Pioneers David Christopher Arnold, 2024-11-19 Featuring biographical chapters on the leaders who served in space roles in the U.S. Air Force Army or Marine Corps including officers who experienced the celestial skies firsthand as astronauts Space Force Pioneers aims to enhance the reader's understanding of character and leadership in military space from the experiences of these elite ground breaking leaders The opening chapter explains in detail how the United States Space Force evolved from the Air Force It is followed by ten biographical chapters that examine the stellar careers of space pioneers and illuminate their varied leadership styles The chapter authors all experts on the subject matter engagingly capture the essence of these impressive individuals by incorporating information derived from the personal papers of their subjects and in some cases oral histories and interviews along with other historical sources They make clear the lasting contributions each of these leaders made to military space while serving in or out of uniform Space Force

Pioneers offers insight and analysis into how these unique leaders have operated in the performance of their duties as well as chronicling changes in military space over the past four decades The volume concludes with a broad and probing interpretation of contemporary space leadership which offers a vehicle for comparing the accomplishments of these distinctive military space leaders **The Theatre of Production** Chappell Howard, 2001 **Air Force Journal of**

Logistics, 2009 *The Collected Works of D.W. Winnicott* Donald Woods Winnicott, 2017 Donald Woods Winnicott 1896 1971 was one of Britain's leading psychoanalysts and paediatricians The author of some of the most enduring theories of the child and of child analysis he coined terms such as the good enough mother and the transitional object known to most as the security blanket Winnicott's work is still used today by child and family therapists social workers teachers and psychologists and his papers and clinical observations are routinely studied by trainees in psychoanalysis psychiatry and clinical psychology Winnicott also wrote for parents teachers social workers paediatricians childcare specialists psychologists policy makers art and play therapists and many others in the field of child and adult development Now for the first time virtually all of Winnicott's writings are presented chronologically in a multi volume set edited and annotated by leading Winnicott scholars The Collected Works of D W Winnicott brings together clinical case reports child consultations psychoanalytic articles and public and private correspondence as well as previously unpublished works on topics of continuing interest to contemporary readers such as delinquency antisocial behavior corporal punishment and child care The Collected Works begins with an authoritative General Introduction by editors Lesley Caldwell and Helen Taylor Robinson and volumes 1 11 each feature original introductory essays examining that volume's major themes written by international Winnicott scholars and psychoanalysts Throughout the Collected Works editorial annotations provide historical context and background information of scholarly and clinical value The 12th and final volume edited by Robert Ad's contains additional complementary material including comprehensive bibliographies of Winnicott's publications and letters documentation of his lectures and broadcasts and a selection of his drawings This extraordinary publication will be an essential resource for readers of Winnicott the world over and also for those interested in the history and origins of the fields of child development and psychoanalysis **Limiting Risk in America's Wars** Phillip S Meilinger, 2017-11-15 The United States has the most expensive and seemingly unstoppable military in the world Yet since World War II the nation's military success rate has been meager The Korean War was a draw while Vietnam Mogadishu Afghanistan and Iraq were clear losses Successes include Iraq in 1991 the Balkans Croatia and Kosovo Panama the initial takedowns of Afghanistan in 2001 and Iraq in 2003 and Libya What differentiates the failures from the successes Failures have been marked by the introduction of large numbers of conventional American ground troops while successes have been characterized by the use of airpower special operations forces robust intelligence and sensor platforms and the use of indigenous ground troops Phillip S Meilinger's new book advocates strategies that limit risks in war as well as achieve measurable goals Instead of large numbers of conventional

ground troops the author argues in favor of a focus on asymmetric capabilities a combination of airpower special operation forces intelligence and indigenous ground troops to achieve the desired political outcomes John Warden and the Renaissance of American Air Power John Andreas Olsen,2007-06-30 Included on the Chief of Staff of the United States Air Force s reading list for 2008 and the Royal Air Force s Centre for Air Power Studies 2008 Reading List Dr John Andreas Olsen has written an insightful compelling biography of retired U S Air Force colonel John A Warden III the brilliant but controversial air warfare theorist and architect of Operation Desert Storm s air campaign Warden s radical ideas about air power s purposes and applications promulgated at the expense of his own career sparked the ongoing revolution in military affairs Legendary in defense circles Warden is also the author of *The Air Campaign Planning for Combat* republished by Brassey s Inc in 1989 Presenting both the positives and negatives of Warden s personality and impact in this objective portrait Olsen offers a trenchant analysis of his revolutionary ideas and great accomplishments *Thoughts on War* Phillip S. Meilinger,2020-03-17 War is changing Unlike when modern military doctrine was forged the United States no longer mobilizes massive land forces for direct political gain Instead the US fights small overseas wars by global mandate to overthrow dictators destroy terrorist groups and broker regional peace These conflicts hardly resemble the total wars fought and expected by foundational military theorists such as Carl von Clausewitz yet their paradigms are ingrained in modern thinking The twenty first century s new geopolitical situation demands new principles for warfare deemphasizing decisive land victory in favor of airpower intelligence systems and indigenous ground forces In *Thoughts on War* Phillip S Meilinger confronts the shortcomings of US military dogma in search of a new strategic doctrine Inter service rivalries and conventional theories failed the US in lengthy Korea Vietnam and Middle East conflicts Jettisoning traditional perspectives and their focus on decisive battles Meilinger revisits historical campaigns looking for answers to more persistent challenges how to coordinate forces manipulate time and fight on two fronts This provocative collection of new and expanded essays offers a fresh if controversial perspective on time honored military values one which encourages a critical revision of US military strategy **Strategic Air Power in Desert Storm** John Andreas Olsen,2013-11-05 In response to the Iraqi invasion of Kuwait on the second of August 1990 a small group of air power advocates in the Pentagon proposed a strategic air campaign Operation Desert Storm designed to drive the Iraqi army from Kuwait by a sustained effort against the major sources of Iraqi national power John Andreas Olsen provides a coherent and comprehensive examination of the origins evolution and implementation of this campaign His findings derive from official military and political documentation interviews with United States Air Force officers who were closely involved with the planning of the campaign and Iraqis with detailed knowledge and experience of the inner workings of the Iraqi regime
