Karl Menger

Selected Writings 1909-1953 Volume Two Vienna Circle Collection Volume 4b:

Selected Writings 1909-1953 M. Reichenbach, 2012-12-06 These two volumes form a full portrait of Hans Reichenbach from the school boy and university student to the maturing and creative scholar who was as well an immensely devoted teacher and a gifted popular writer and speaker on science and philosophy We selected the articles for several reasons Many of them have not previously been available in English many are out of print either in English or in German some especially the early ones have been little known and deal with subject matters other than philosophy of science The genesis and evolution of Reichenbach's ideas appeared to be of deep interest and so we included papers from four decades despite occasional redundancy We were for example pleased to include his extensive review article from the encyclopedic *Handbuch der Physik* of 1929 on The Aims and Methods of Physical Knowledge written at a time of creative collaboration between Reichenbach's Berlin group and the Vienna Circle of Schlick and Carnap Reichenbach was a pioneer opening new pathways to the solution of age old problems in many fields space time causality induction and probability philosophical analysis and interpretation of classical physics relativity and quantum physics logic language ethics scientific explanation and methodology critical appreciation and reconstruction of past metaphysical thinkers and scientists from Plato to Leibniz and Kant Indeed his own philosophical journey was initiated by his passage from Kant to anti Kant *Time, Causality, and the Quantum Theory* S. Mehlberg, 2012-12-06 *Reminiscences of the Vienna Circle and the Mathematical Colloquium* Karl Menger, 2013-03-07 Karl Menger was born in Vienna on January 13 1902 the only child of two gifted parents His mother Hermione nee Andermann 1870-1922 in addition to her musical abilities wrote and published short stories and novelettes while his father Carl 1840-1921 was the noted Austrian economist one of the founders of marginal utility theory A highly cultured man and a liberal rationalist in the nineteenth century sense the elder Menger had witnessed the defeat and humiliation of the old Austrian empire by Bismarck's Prussia and the subsequent establishment under Prussian leadership of a militaristic mystically nationalistic state capitalist German empire in effect the first modern military industrial complex These events helped frame in him a set of attitudes that he later transmitted to his son and which included an appreciation of cultural attainments and tolerance and respect for cultural differences combined with a deep suspicion of rabid nationalism particularly the German variety Also a fascination with structure whether artistic scientific philosophical or theological but a rejection of any aura of mysticism or mumbo jumbo accompanying such structure Thus the son remarked at least once that the archangels' chant that begins the Prolog im Himmel in Goethe's *Faust* was perhaps the most beautiful thing in the German language but of course it doesn't mean anything [Moritz Schlick Philosophical Papers](#) Moritz Schlick, 1978-12-31 *Logical Empiricism in North America* Gary L. Hardcastle, Alan W. Richardson, 2003 An essential overview of an important intellectual movement Logical Empiricism in North America offers the first significant sustained and multidisciplinary attempt to understand the intellectual cultural and political dimensions of logical empiricism

s transmission from Europe subsequent development in North America and influence on our understanding of science in the twenty first century

Philosophical Papers Moritz Schlick,1980-03-31 Empiricism, Logic and Mathematics Hans Hahn,2012-12-06 The role Hans Hahn played in the Vienna Circle has not always been sufficiently appreciated It was important in several ways In the first place Hahn belonged to the trio of the original planners of the Circle As students at the University of Vienna and throughout the first decade of this century he and his friends Philipp Frank and Otto Neurath met more or less regularly to discuss philosophical questions When Hahn accepted his first professorial position at the University of Czernowitz in the north east of the Austrian empire and the paths of the three friends parted they decided to continue such informal discussions at some future time perhaps in a somewhat larger group and with the cooperation of a philosopher from the university Various events delayed the execution of the project Drafted into the Austrian army during the first world war Hahn was wounded on the Italian front Toward the end of the war he accepted an offer from the University of Bonn extended in recognition of his remarkable mathematical achievements He remained in Bonn until the spring of 1921 when he returned to Vienna and a chair of mathematics at his alma mater There in 1922 the Mach Boltzmann professorship for the philosophy of the inductive sciences became vacant by the death of Adolf Stohr and Hahn saw a chance to realize his and his friends old plan

Foundations for a Scientific Analysis of Value V. Kraft,2012-12-06 In English speaking countries Victor Kraft is known principally for his account of the Vienna Circle That group of thinkers has exercised in recent decades a significant influence not only on the philosophy of the western world but also at least indirectly on that of the East where there is now taking place a slow but clearly irresistible erosion of dogmatic Marxism by ways of thinking derived from a modern scientific conception of the world Kraft's work as historian of the Vienna Circle has led to his being classed without further qualification as a neo positivist philosopher It is however only partially correct to count him as such To be sure he belonged to the group named he took part in its meetings and he drew from it suggestions central to his own work but he did not belong to the hard core of the Circle and was a conscious opponent of certain radical tendencies espoused at least from time to time by some of its members Evidence of this is provided by the theory of value now presented in English translation since no less a thinker than Rudolf Carnap had originally at any rate obeyed a very narrowly conceived criterion of sense and declared value judgements to be senseless

Economic Writings Otto Neurath,2006-03-03 This book makes available for the first time in English a substantial part of Otto Neurath's economic writings The essays and small monographs translated here extend from his student years to his last ever finished piece They chart not only Neurath's varied interests in the economic history of antiquity in war economics and schemes for the socialisation of peacetime economies in the theory of welfare measures and social indicators and in issues of the theory of collective choice but also show his philosophical interests emerging in his contributions to seminal debates of the German Social Policy Association This volume shows that

Neurath's important contributions to the socialist calculation debate are but one aspect of a many-sided and original oeuvre. The translations are preceded by an introductory essay by one of the editors which contextualises the selections by locating them in the various debates of the time that provided their original setting. This book is of interest to economists, philosophers of social science and of economics as well as to historians of philosophy of science and of analytic philosophy.

The Law of Causality and Its Limits Philipp Frank, 2012-12-06

The Law of Causality and its Limits was the principal philosophical work of the physicist turned philosopher Philipp Frank. Born in Vienna on March 20, 1884, Frank died in Cambridge, Massachusetts on July 21, 1966. He received his doctorate in 1907 at the University of Vienna in theoretical physics, having studied under Ludwig Boltzmann. His subsequent research in physics and mathematics was represented by more than 60 scientific papers. Moreover, his great success as teacher and expositor was recognized throughout the scientific world with publication of his collaborative *Die Differentialgleichungen der Mechanik und Physik* with Richard von Mises in 1925. Frank was responsible for the second volume on physics and especially noted for his authoritative article on classical Hamiltonian mechanics and optics. Among his earliest papers were those beginning in 1908 devoted to special relativity, which together with general relativity and physical cosmology occupied him throughout his life. Already in 1907, Frank published his seminal paper *Kausalgesetz und Erfahrung* (Experience and the Law of Causality), much later collected with a splendid selection of his essays on philosophy of science in English (1941c and 1949g) in our Bibliography. Joining the first Vienna Circle in the first decade of the 20th century with Hans Hahn, mathematician, and Otto Neurath, sociologist and economist, and deeply influenced by studies of Ernst Mach's critical conceptual histories of science and by the striking challenge of Poincaré and Duhem, Frank continued his epistemological investigations.

Carnap and the Vienna Circle Ramon Cirera, 2022-06-08

It is not inaccurate to say that from 1928 to 1936, Carnap was a member of the Vienna Circle, even though during this period he was not always present in Vienna. During these years, which spanned roughly the period from the *Aufbau* to *Testability and Meaning*, he worked or at least discussed frequently with the members of the group. However, traditionally it has been difficult to form a proper view of the development of Carnap's ideas throughout this period, mainly because of three errors which have persisted in the commonly accepted historical interpretation of Carnap and the Vienna Circle: emphasis on the Circle as a unit rather than a collective of individuals; insistence on verificationism as the defining characteristic of Logical Positivism; and the systematic abstraction of the work of the Circle from its historical context. As against this historically distorted image, this book argues for an alternative reading, evaluating the different influences on Carnap of Schlick, Wittgenstein, Neurath, and Popper, and making sense of Carnap's evolution from physicalism to phenomenalism and the syntactic point of view.

Hans Reichenbach Hans Reichenbach, 1978-12-31

Reality and Experience E. Kaila, 2012-12-06

Philosophically, there is a book which was a tremendous experience for me: Eino Kaila's *Psychology of the Personality*. His thesis that man lives strictly according to his needs, negative and positive, was shattering to me but terribly true. And I built on this ground. Ingmar

Bergman J 1 This introductory essay is neither intended to be a full presentation nor to be a critical evaluation of the contributions to philosophy made by Eino Kaila Kaila's work will speak to the reader through the four papers here published in English translation from the German They belong in the tradition of the Vienna Circle and of logical empiricism They cover however only one period or sector of Kaila's rich and varied life work This is the sector best integrated into the mainstream of contemporary philosophic thinking The primary aim of this essay is to portray an impressive intellectual personality and to make a modest contribution to Finnish and Scandinavian intellectual history Much of its content may be thought to be of local relevance only But considering the position which Kaila held in his country and considering his decisive influence on the development of philosophy in Finland I hope that this local background will also interest an international circle of readers

Physics, Philosophy and Psychoanalysis Robert S. Cohen, Larry Laudan, 1983-04-30 A festschrift dedicated to Adolf Gr nbaum on the occasion of his 60th birthday this volume contains contributions which are original works on scientific and philosophical issues related to his fields of scholarship Adolf Gr nbaum is a leading philosopher of space and time and of the logical foundations of psychoanalytic theory in the English speaking world The philosophers who have contributed are a noteworthy group The collection is complemented by a biographical memoir and a complete bibliography of Gr nbaum's publications

Einstein Was Right Jed Z. Buchwald, 2020-10-13 An authoritative interdisciplinary account of the historic discovery of gravitational waves In 1915 Albert Einstein predicted the existence of gravitational waves ripples in the fabric of spacetime caused by the movement of large masses as part of the theory of general relativity A century later researchers with the Laser Interferometer Gravitational Wave Observatory LIGO confirmed Einstein's prediction detecting gravitational waves generated by the collision of two black holes Shedding new light on the hundred year history of this momentous achievement *Einstein Was Right* brings together essays by two of the physicists who won the Nobel Prize for their instrumental roles in the discovery along with contributions by leading scholars who offer unparalleled insights into one of the most significant scientific breakthroughs of our time This illuminating book features an introduction by Tilman Sauer and invaluable firsthand perspectives on the history and significance of the LIGO consortium by physicists Barry Barish and Kip Thorne Theoretical physicist Alessandra Buonanno discusses the new possibilities opened by gravitational wave astronomy and sociologist of science Harry Collins and historians of science Diana Kormos Buchwald Daniel Kennefick and J rgen Renn provide further insights into the history of relativity and LIGO The book closes with a reflection by philosopher Don Howard on the significance of Einstein's theory for the philosophy of science Edited by Jed Buchwald *Einstein Was Right* is a compelling and thought provoking account of one of the most thrilling scientific discoveries of the modern age

Principles of the Theory of Heat Ernst Mach, 2012-12-06 xi should hope for first and foremost from any historical investigation including his own was that it may not be too tedious II That hope is generally realized in Mach's historical writings most of which are as lively and interesting now as they were when they appeared Mach did not follow any existing

model of historical or philosophical or scientific exposition but went at things his own way combining the various approaches as needed to reach the goals he set for himself When he is at his best we get a sense of the Mach whom William James met on a visit to Prague the Mach whose four hours of unforgettable conversation gave the forty year old well traveled James the strongest impression of pure intellectual genius he had yet received and whose absolute simplicity of manner and winningness of smile captivated him completely 12 Consider for example the first few chapters of this book Principles of the Theory of Heat which Mach devotes to the notion of temperature that most fundamental of all thermal concepts He begins by trying to trace the path that leads from our sensations of hot and cold to a numerical temperature scale **Selected Papers**

in Logic and Foundations, Didactics, Economics Karl Menger, 1979-03-31 This volume brings together those papers of mine which may be of interest not only to various specialists but also to philosophers Many of my writings in mathematics were motivated by epistemological considerations some papers originated in the critique of certain views that at one time dominated the discussions of the Vienna Circle others grew out of problems in teaching fundamental ideas of mathematics still others were occasioned by personal relations with economists Hence a wide range of subjects will be discussed epistemology logic basic concepts of pure and applied mathematics philosophical ideas resulting from geometric studies mathematical didactics and finally economics The papers also span a period of more than fifty years What unifies the various parts of the book is the spirit of searching for the clarification of basic concepts and methods and of articulating hidden ideas and tacit procedures Part 1 includes papers published about 1930 which expound an idea that Carnap after a short period of opposition in the Circle fully adopted and under the name Principle of Tolerance he eloquently formulated it in great generality in his book Logical Syntax of Language 1934 through which it was widely disseminated The New Logic in Chapter 1 furthermore includes the first report 1932 to a larger public of Gödel's epochal discovery presented among the great logic results of all time Chapter 2 is a translation of an often quoted 1930 paper presenting a detailed exposition and critique of intuitionism **Methodological Variance** G.L. Pandit, 2012-12-06 For a philosopher with an abiding interest in the nature

of objective knowledge systems in science what could be more important than trying to think in terms of those very subjects of such knowledge to which men like Galileo Newton Max Planck Einstein and others devoted their entire lifetimes In certain respects these systems and their structures may not be beyond the grasp of a linguistic conception of science and scientific change which men of science and philosophy have advocated in various forms in recent times But certainly it is wrong headed to think that one's conception of science can be based on an identification of its theories with languages in which they may be my own alternatively framed There may be more than one place in book 1983 87 where they may seem to get confused with each other quite against my original intentions The distinction between the objective knowledge systems in science and the dynamic frameworks of the languages of the special individual sciences in which their growth can be embedded in significant ways assumes here therefore much importance It must be recognized that the problems concerning

scientific change which these systems undergo are not just problems concerning language change **Time, Causality, and the Quantum Theory** Henry Mehlberg, 1980 *Inquiries and Provocations* Herbert Feigl, 1980-11-30 The title is his own Herbert Feigl the provocateur and the soul if we may put it so of modesty wrote to me some years ago I m more of a catalyst than producer of new and original ideas all my life but then he completed the self appraisal with just a few exceptions perhaps We need not argue for the creative nature of catalysis but will simply remark that there are new and original ideas in the twenty four papers selected for this volume in the extraordinary aperrus of the 25 year old Feigl in his Vienna dissertation of 1927 on Zufall und Gesetz in the creative critique and articulation in his classical monograph of 1958 on The Mental and the Physical and the reader will want to turn to some of the seventy other titles in our Feigl bibliography appended Professor Feigl has been a model philosophical worker above all else honest self aware open minded and open hearted keenly devotedly and even arduously the student of the sciences he has been a logician and an empiricist Early on he brought the Vienna Circle to America and much later he helped to bring it back to Central Europe The story of the logical empiricist movement and of Herbert Feigl s part in it has often been told importantly by Feigl himself in four papers we have included here

Yeah, reviewing a book **Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b** could go to your close contacts listings. This is just one of the solutions for you to be successful. As understood, achievement does not suggest that you have fabulous points.

Comprehending as skillfully as covenant even more than new will present each success. next-door to, the notice as well as perspicacity of this Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b can be taken as without difficulty as picked to act.

Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results

by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to be cautious and verify the authenticity of the source before downloading Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b Books

1. Where can I buy Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.

6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Selected Writings 19091953 Volume Two Vienna Circle Collection Volume 4b books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
