Zimmermann,Amelie Constant,2012-12-06 In the globalized economy labor migration has become of central importance A key issue in the analysis of immigration is how the migrants fare in the economy in which they migrate and how they assimilate towards the behavior of the natives Using data from the United States Canada many European countries Australia and New Zealand the chapters study the developments of earnings employment unemployment self employment occupational choices and educational attainment after migration The book also investigates the role of language in labor market integration and examines the situation of illegal legalized and unwilling migrants Policy effects are also studied Among those are the effects of selection criteria of labor market success and the effects immigrants have on the public sector budget of the receiving country Hence the book provides a broad picture of the performance of migrants

Gold,2010-10-16 The Store in the Hood is a comprehensive study of conflicts between immigrant merchants and customers throughout the U S during the 20th century

From the lynchings of Sicilian immigrant merchants in the late 1800s to the riots in L A following the acquittal of the police officers who beat Rodney King to present day Detroit recurrent conflicts between immigrant business owners and their customers have disrupted the stability of American life Devastating human lives property and public order these conflicts have been the subject of periodic investigations that are generally limited in scope and emphasize the outlooks and cultural practices of the involved groups as the root of most disputes This book develops a more nuanced understanding by exploring merchant customer conflicts over the past hundred years across a wide range of ethnic groups and settings Utilizing published research official statistics interviews and ethnographic data collected from diverse locations the book reveals how powerful groups and institutions have shaped the environments in which merchant customer conflicts occur These conflicts must be seen as products of the larger society s values policies and structures not solely as a consequence of actions by immigrants the urban poor and other marginal groups *Work, Recreation, and Culture* Martin H. Blatt,Martha K.

Norkunas,2013-02-01 The essays in this volume focus on the role of women in the work force They explore how organized sports social associations of all kinds and the educational system faced by the children of worker were profoundly linked to work place and community activism They examine why radical labor organizations that could win major strikes often could not sustain themselves as permanent institutions Finally the essays argue that simultaneous leadership changes in management and labor in the auto industry were less the result of internal conflicts than needed structural adjustments to changing economic and political realities Interwoven into all of the essays is the intricate dynamic between immigrant and native born between different immigrant waves and the groups and between workers at different skill levels *Work Recreation and Culture* enriches and expands the established labor narratives **Race, Class and Power in the Building of**

Richmond, 1870-1920 Steven J. Hoffman,2017-08-30 Using post Civil War Richmond Virginia as a case study Hoffman explores the role of race and class in the city building process from 1870 to 1920 Richmond s railroad connections enabled the city to participate in the commercial expansion that accompanied the rise of the New South A highly compact city of mixed residential industrial and commercial space at the end of the Civil War Richmond remained a classic example of what historians call a walking city through the end of the century As city streets were improved and public transportation became available the city s white merchants and emerging white middle class sought homes removed from the congested downtown The city s African American and white workers generally could not afford to take part in this residential migration As a result the mixture of race and class that had existed in the city since its inception began to disappear The city of Richmond exemplified characteristics of both Northern and Southern cities during the period from 1870 to 1920 Retreating Confederate soldiers had started fires that destroyed the city in 1865 but by 1870 the former capital of the Confederacy was on the road to recovery from war and reconstruction reestablishing itself as an important manufacturing and trade center The city s size diversity and economic position at the time not only allows for comparisons to both Northern and Southern

cities but also permits an analysis of the role of groups other than the elite in city building process By taking a look at Richmond we are able to see a more complete picture of how American cities have come to be the way they are **Korean Immigrant Entrepreneurs** Jin-Kyung Yoo,2014-09-19 This book examines the advantages and disadvantages of Korean immigrant entrepreneurs in the mainstream labor market Immigrants to the U S have historically pursued entrepreneurship as a means of achieving economic affluence Among immigrants since the 1965 Immigration Amendment Act Koreans have one of the highest rates of entrepreneurship This study investigates various structural elements including enclave and non enclave economies to uncover interconnections with personal advantages such as capacities for resource mobilization through networks and human capital utilized to establish businesses The results show that networks are the most prominent resources that Korean immigrants use for business establishment However networks are divided into two elements family and social The examination of both types of networks shows how they operate differently and generate different intrinsic to business establishment Although previous studies have recognized the economic advantages of immigrants with higher educational backgrounds this study further demonstrates how higher human capital is utilized through network establishment to benefit business establishment Also counter to traditional belief it is found that ethnic resources are not especially crucial resources for starting a business but are useful after businesses are established **Unity is Strength** Markus Bierkoch,2024-12-02 Migration has been one of the most pressing societal issues throughout history Immigrant associations play a crucial role in understanding this phenomenon They channel migration streams influence the assimilation of their members and serve as representatives of the entire immigrant group in society However they remain an understudied subject particularly in historical research To address this gap this study examines German immigrant associations in New York from the 1890s to the 1930s Through an innovative combination of statistical and textual analyses it explores the class composition of these associations their intricate system of mutual aid and their political activities This study offers insights into how specific socio economic motivations influenced immigrant organization and collective action including aspects such as long distance nationalism and cross border ethnic identity Ultimately based on these findings this study demonstrates that immigrant associations played a crucial role in helping their members adapt to a new social and economic environment Additionally it shows why and how immigrant associations significantly shaped the image of German immigrants in American social and political life **The New Immigrant and the American Family** Marcelo M. Suárez-Orozco,Carola Suárez-Orozco,Desirée Qin-Hilliard,2014-07-16 This six volume set focuses on Latin American Caribbean and Asian immigration which accounts for nearly 80 percent of all new immigration to the United States The volumes contain the essential scholarship of the last decade and present key contributions reflecting the major theoretical empirical and policy debates about the new immigration The material addresses vital issues of race gender and socioeconomic status as they intersect with the contemporary immigration experience Organized by theme each volume

stands as an independent contribution to immigration studies with seminal journal articles and book chapters from hand to find sources comprising the most important literature on the subject The individual volumes include a brief preface presenting the major themes that emerge in the materials and a bibliography of further recommended readings In its coverage of the most influential scholarship on the social economic educational and civil rights issues revolving around new immigration this collection provides an invaluable resource for students and researchers in a wide range of fields including contemporary American history public policy education sociology political science demographics immigration law ESL linguistics and more
