On the Way to Self Knowledge Jacob Needleman, Dennis Lewis, 1976 Help I need somebody but is it a guru or a shrink In response to this dilemma the philosopher Jacob Needleman arranged a lecture series at the University of California Medical Center in San Francisco in the hope of clarifying both the distinctions and the interrelations between these two paths of self knowledge psychotherapy and the ancient spiritual disciplines This book is the enriching and often electrifying result The eight lecturers psychotherapists interested in the further reaches of self development and spiritual teachers concerned with helping people live dispatch the basic question with little ultimate disagreement The consensus most concisely expressed by British therapist A C Robin

Skygger is that therapy and the sacred traditions lead in quite different one might say perpendicular directions therapy towards integration and functioning on the plane of normal daily life spiritual discipline towards the far more difficult and demanding ascent into transcendence and self evolution But while the confusion of the two can be dangerous properly understood they can assist and enhance each other Kirkus Reviews 10 15 76 **Self-knowledge and Self-identity** Sydney Shoemaker,1967 **Self-Knowledge** The School of Life,2017-09-21 In Ancient Greece when the philosopher Socrates was asked to sum up what all philosophical commandments could be reduced to he replied Know yourself Self knowledge matters so much because it is only on the basis of an accurate sense of who we are that we can make reliable decisions particularly around love and work This book takes us on a journey into our deepest most elusive selves and arms us with a set of tools to understand our characters properly We come away equipped with a newly clarified sense of who we are what we need to watch out for when making decisions and what our priorities and potential might be *Self-Knowledge* Brie Gertler,2010-11-25 In this outstanding introduction Brie Gertler assesses the leading theoretical approaches to self knowledge explaining the work of many of the key figures in the field from Descartes and Kant through to Bertrand Russell and Gareth Evans as well as recent work by Tyler Burge David Chalmers William Lycan and Sydney Shoemaker Essential reading for students of philosophy of mind epistemology and metaphysics **Self Knowledge for Humans** Quassim Cassam,2014 Humans are not model epistemic citizens Our reasoning can be careless our beliefs eccentric and our desires irrational Quassim Cassam develops a new account of self knowledge which recognises this feature of human life He argues that self knowledge is a genuine cognitive achievement and that self ignorance is almost always on the cards

Self-Knowledge and Resentment Akeel Bilgrami,2012-03-05 In *Self Knowledge and Resentment* Akeel Bilgrami argues that self knowledge of our intentional states is special among all the knowledges we have because it is not an epistemological notion in the standard sense of that term but instead is a fallout of the radically normative nature of thought and agency Four themes or questions are brought together into an integrated philosophical position What makes self knowledge different from other forms of knowledge What makes for freedom and agency in a deterministic universe What makes intentional states of a subject irreducible to its physical and functional states And what makes values irreducible to the states of nature as the natural sciences study them This integration of themes into a single and systematic picture of thought value agency and self knowledge is essential to the book's aspiration and argument Once this integrated position is fully in place the book closes with a postscript on how one might fruitfully view the kind of self knowledge that is pursued in psychoanalysis **The Way to Self-knowledge** Gopi Krishna,1985 **A treatise on self-knowledge** John Mason,1839 *Self-knowledge*: John Mason,1794 *Self-knowledge* John Mason,1769 **A Treatise on Self Knowledge** John Mason,1826 Shakespeare's Patterns of Self-knowledge Rolf Soellner,1972 The Renaissance evinced a strong interest in self knowledge and the theme is a persistent one in the moral and dramatic literature of the age The ancients slogan nosce teipsum became a universal

watchword of men schooled in the paramount importance of coming to know themselves Shakespeare's abiding interest in the concept of self knowledge shows itself in the dramatic patterns of his plays in images ideas themes and character portrayals The recurrence of such motifs as the search for the self and the dangers and rewards of finding oneself as well as the prominence of such ideal or nearly ideal characters as Henry V Duke Vincentio and Prospero testify to the powerful influence humanistic notions of self knowledge exerted on Shakespeare as a writer and thinker But his was a changing and developing art in a restless and dynamic age Professor Soellner suggests that as much as Shakespeare's artistic development which also affects his patterns of self knowledge is part of his natural growth into a mature and incomparable dramatist it is yet analogous to the stylistic and philosophic changes that led from the Renaissance through Mannerism toward the Baroque Mr Soellner examines twelve plays in which self knowledge as the Renaissance understood it figures prominently Mindful that concepts of self knowledge are not independent of cultural contexts and that the definitions in the moral literature of the time were notoriously imprecise and unscientific he recognizes that the meaning of the term in Shakespeare's time must be acquired as Shakespeare acquired it that is contextually Mr Soellner distinguishes three points in Shakespeare's evolution an early stage that culminates in the later histories and the romantic comedies in which the dramatist reflected sometimes almost schematically the humanistic patterns of his time a middle or interim phase that begins with Julius Caesar and includes both Hamlet and the problem comedies and in which Shakespeare experiences certain hesitations and entertains some doubts about the patterns accepted uncritically earlier and the final period of the great tragedies and tragicomic romances in which a growing awareness of the unpredictability of human nature leads to a dynamic synthesis in which what is the quintessence of humanism is fused with a full realization of the weakness of codification and a profound sympathy for the human condition In the last of his great plays the tempests Mr Soellner finds Shakespeare composed a brilliant finale in which are worked many of the patterns that he used in his earlier work The dream of The Tempest that man can control himself limit his power and even resign it voluntarily is totally humanistic and may be utopia But it is one of the happiest expectations of man and represents an irresistible affirmation of his potential greatness Rolf Soellner **Self-knowledge**

John Mason, 1836 **Self-knowledge** John Mason, 1820 *Morality, Self Knowledge and Human Suffering* Josep Corbí, 2012-08-21 In this wholly original study Josep Corbi asks how one should relate to a certain kind of human suffering namely the harm that people cause one another Relying upon real life examples of human suffering including torture genocide and warfare as opposed to thought experiments Corbi proposes a novel approach to self knowledge that runs counter to standard Kantian approaches to morality Kant and the Problem of Self-Knowledge Luca Forgiione, 2018-10-17 This book addresses the problem of self knowledge in Kant's philosophy As Kant writes in his major works of the critical period it is due to the simple and empty representation I think that the subject's capacity for self consciousness enables the subject to represent its own mental dimension This book articulates Kant's theory of self knowledge on the basis of the

following three philosophical problems 1 a semantic problem regarding the type of reference of the representation I 2 an epistemic problem regarding the type of knowledge relative to the thinking subject produced by the representation I think and 3 a strictly metaphysical problem regarding the features assigned to the thinking subject's nature The author connects the relevant scholarly literature on Kant with contemporary debates on the huge philosophical field of self knowledge He develops a formal reading according to which the unity of self consciousness does not presuppose the identity of a real subject but a formal identity based on the representation I think *Self-awareness* M. D. Ferrari, Robert J.

Sternberg, 1998-04-17 This integrative volume brings together leading social scientists to present diverse perspectives on the emergence development and practical role of self awareness Shedding light on the fundamental question of how human beings come to understand who we are in relation to ourselves to others and to the broader world the book does justice to the complexity of its subject while remaining accessible to readers in a wide range of disciplines Chapters cover such topics as developmental and evolutionary aspects of self awareness the self consciousness and theory of mind and connections between self awareness and social affective academic and neuropsychological functioning
