Tamdgidi, Khaldoun Samman, 2005-09-01 This Fall 2004 Spring 2005 III 1 2 double issue of *Human Architecture Journal of the Sociology of Self Knowledge* demonstrates the extent to which the sociology of self knowledge as advanced by this journal from its inception can serve as both a course topic as well as a pedagogical strategy in teaching sociology and related subjects The issue includes student papers of various faculty at UMass Boston and a symposium of student and faculty papers organized by Khaldoun Samman from Macalester College Samman had earlier taken the step of turning his senior seminar into a course on the sociology of self knowledge and encouraging his students all graduating seniors at Macalester to subject their own lives and troubles to their sociological imaginations The student papers included in the issue as a whole are highly demonstrative of how self and socially critical and liberating the sociology of self knowledge can be Authors use a variety of class and outside readings as well as films and documentaries to explore in depth currently

Dance, Embodied Agency and Neuroplasticity in Aging Glenna B. Batson,Bettina E. Bläsing,Aline Nogueira Haas,Christina E. Hugenschmidt ,Joseph F. X. DeSouza,2024-11-18 Dance is a multi sensory and multi modal form of movement expression one that stimulates creative potential for innovative action and intersubjective communication Over the last two decades results from systematic reviews have shown a spectrum of dance styles to be powerful non pharmacological agents in advancing intergenerational health across quality of life domains This Research Topic invites further investigation into the specificity of how the dancing body can access untapped cognitive resources that promote brain health in the elderly While early findings from dance protocols

have been shown to impact positively on structural and functional neuroplasticity the link between embodied agency and brain health remains under researched and under theorized Researchers are called to design methodologies that test the ecological validity of dance explicitly examining the interactive effects of sentient expressive movement with cognitive reserve One challenge among many lies in explicating and differentiating the elements of the dancing body itself particularly when outcomes correlate with other forms of movement rich exercise for the elderly

Free Will, Consciousness, and Self Preben Bertelsen, 2005 What is it to be human How do we relate to the world to each other and to our self in a human in everyday life and when faced with life's big questions In this book the author develops a general theoretical model that might be able to offer a better understanding of the human condition and of the underlying principles of human behavior The author shows that general psychology bridging the natural sciences and the social sciences can make a significant contribution to a general anthropology

Self-Identity and Everyday Life Harvie Ferguson, 2009-04-08 Identity and selfhood are terms routinely used throughout the human sciences that seek to analyze and describe the character of everyday life and experience Yet these terms are seldom defined or used with any precision and scant regard is paid to the historical and cultural context in which they arose or to which they are applied This innovative book provides fresh historical insights in terms of the emergence development and interrelationship of specific and varied notions of identity and selfhood and outlines a new sociological framework for analyzing it This is the first historical sociological framework for discussion of issues which have until now generally been treated as philosophy or psychology and as such it is essential reading for those undergraduates and postgraduates of sociology philosophy and history and cultural studies interested in the concepts of identity and self It covers a broader range of material than is usual in this style of text and includes a survey of relevant literature and precise analysis of key concepts written in a student friendly style

Flawed System/Flawed Self Ofer Sharone, 2013-10-16 Today 4.7 million Americans have been unemployed for more than six months In France more than ten percent of the working population is without work In Israel it's above seven percent And in Greece and Spain that number approaches thirty percent Across the developed world the experience of unemployment has become frighteningly common and so are the seemingly endless tactics that job seekers employ in their quest for new work Flawed System Flawed Self delves beneath these staggering numbers to explore the world of job searching and unemployment across class and nation Through in depth interviews and observations at job search support organizations Ofer Sharone reveals how different labor market institutions give rise to job search games like Israel's résumé based spec games which are focused on presenting one's skills to fit the job and the chemistry games more common in the United States in which job seekers concentrate on presenting the person behind the résumé By closely examining the specific day to day activities and

strategies of searching for a job Sharone develops a theory of the mechanisms that connect objective social structures and subjective experiences in this challenging environment and shows how these different structures can lead to very different experiences of unemployment *Boosting Self-Esteem For Dummies, UK Edition* Rhena Branch, Rob Willson, 2011-01-13
