Lueder, 2011-01-16 Involving Hard to Reach Parents Creating Family School Partnerships presents a comprehensive strategy for reaching out to help the parents to get involved in the education of their children This book describes in practical terms ways to develop and establish collaborative relationships with parents especially those that are underserved The book is about change change so children to get the help and support they need to be successful The book is for anyone who wants to reach out and work with all families Creating Partnerships with Parents Donald Lueder, 2000-10-25 Are you wondering how to nurture a better relationship with the parents of your students This book provides teachers with comprehensive methods to bridge the gap between school and home in order to enhance the development of their students How School Principals Sustain Success over Time Lejf Moos, Olof Johansson, Christopher Day, 2011-05-26 This work represents a publishing event in education research Genuinely groundbreaking it is the result of longitudinal research from five nations over five years The authors set themselves an unprecedented task to analyze how it is that successful school principals sustain positive outcomes over a significant period of time To find out they initiated the International Successful School Principal Project ISSPP assembling 30 multinational case histories and numerous comparative analyses In doing so they recorded fresh perspectives on the influence school principals can have on their schools the quality of teaching in their classrooms and student outcomes Revisiting the subject schools in 2007 they found many principals still in place having steered their organizations through various minefields of political governance and educational reform As the most penetrating longitudinal investigation of the subject this research has unearthed fascinating new insights into school leadership that add real substance to the sum of our knowledge It incorporates data from educational systems in Australia Denmark Norway Sweden England and the USA One key finding is that while all principals delegate a range of leadership tasks successful ones distribute responsibility on a case by case basis founded on personal assessments of their staff as well as on organizational and policy contexts The research also demonstrates that successful principals maintain close communication with their staff and the wider school environment and that they are adaptive maximizing the opportunities presented by new political contexts and expectations yet without losing sight of their school s core moral and ethical

principles The volume s international thematic analysis has allowed comparative conclusions to be drawn on what the principals do to sustain and foster pedagogical and institutional success Organizational Change B. Lubin,L. D. Goodstein,A. W. Lubin,2014-03-18 First published in 1984 Starting out with the exploration of the value of the case study this volume looks at organisational change and presents nine case studies of planned change on the organizational or community level Each is an in depth analysis prepared by the consultants who were actively engaged in the change activity
