Selfdirected Growth:

Self-Directed Growth Douglas L. Robertson, 2019-01-15 Self Directed Growth is a valuable map to the no man's land where education philosophy adult development and counseling meet This is the trackless waste that we usually encounter when we try to explore the relation between learning and personal meaning The book helps the student wrestle with issues of identity knowledge change and purpose Better yet it does so in a clear sequence of steps that keep the student on track With the average student today being more and more likely to be beyond the traditional college age this map of the territory of self directed learning is long overdue Too many of its would be competitors err either by being about adult education while leaving out anything for learners themselves or by being cookbooks full of recipes for how to throw off the past or dive into the future while leaving out the critical process of learning Robertson's book will be used in many ways Self directed learners either inside an educational institution or outside will use it to launch themselves on journeys of self discovery Groups of them working under the guidance of a mentor will use it as a text for exciting new kinds of courses And teachers will use it as a guide to reorienting their own efforts away from implanting content and toward developing students

Self-Directed Growth Douglas L. Robertson, 1988 This book is written for adults who are interested in learning to manage change constructively It is designed to be useful as a self help resource should the learner be working independently However it is especially intended to provide a good text for teachers or trainers who are leading credit courses or non credit workshops on various topics dealing with adult development The book discusses development and how it can be facilitated Material is presented in a way which is appropriate for busy adult learners Practice is combined with theory After a section discussing objectives looking ahead sources of learning proactivity versus reactivity and the relationship of striving and service Part I discusses development Included in the discussion is an examination of growth versus change perspective people as content and process a definition of development and developmental phases Part II discusses the contribution of the environment The topics of novelty minimizing threat supportiveness of the learning cycle information richness and learning facilitators are discussed Part III discusses what the individual can contribute including self awareness growth motivation learning skills knowledge of the developmental process developmental planning and closure Over 100 references and an index are included

A Beginner's Guide to Training in Counselling & Psychotherapy Robert Bor, Stephen Palmer, 2001-12-20 This highly practical and informative book is designed for all who are considering training in counselling counselling psychology or psychotherapy To secure work within these increasingly professional and competitive fields candidates need to have the appropriate training and qualifications While theoretically and in practice the professional groups have much in common each has its own distinct training routes and qualifications which can be confusing for the newcomer A Beginner's Guide to Training in Counselling and Psychotherapy sets out clearly the range of options for trainees including the professional pathways and main theoretical models available to them Drawing on their vast experience as trainers pra

Being Empathic Steve Vincent,2018-10-08 This is the most stimulating thorough in depth work on empathy as originated and developed by Carl Rogers within client centred therapy and the person centred approach that a reader will find It provides a rigorous look at empathic understanding with practical case illustrations throughout What a cornucopia of offerings are provided in this book The quotes and extracts from Rogers are always to the point and explorations of the concepts rich and original each amplifying yet not changing Carl s meanings This book has a unique format and style merging tradition with innovation and whimsy It is both intellectually stimulating and very personal I was delighted with the wit humour and plays on words When compared with the reductionistic stereotypic depiction of Rogers work in so many previous texts outside the Person Centred Approach community this book is a breath of fresh air I believe Steve has guided us with elegance and insight wisdom and compassion towards deeper understandings of the genius and profundity of Carl Rogers work and his principles While the audience for this book might best be considered to be those in training as therapists or students using the book as a university text it will also be most helpful for practitioners who want to review and renew a deeper understanding of Rogers approach Potential clients in seeking a safe haven for their deep explorations may also profit greatly from this book as a guide in their search Gay Leah Barfield in her Foreword **Comprehensive**
