Emerging Methods in Psychology Seth Sargan, 2017-09-08 The motivation for this volume in the History and Theory of Psychology series is to look across sub disciplines within psychology and highlight instances where researchers transcended the tendency to think about methodology along traditional lines Contributors have located examples of researchers who built upon existing ideas to create methods true to their interests and theoretical convictions Emerging Methods in Psychology shows how a discipline creates new methods and carves out possibilities that not only generate data but also advance knowledge of human psychological functioning It concentrates on showcasing the possibilities that exist when the researcher focuses on the relationship between theory method and data The question of what kind of expertise is required is a key issue This is particularly the case in psychology where the tradition of standardizing methods over the last century has served to

stabilize research questions Knowledge creation is deeply affective and ambiguous rather than the secure accumulation of data by a socially legitimized procedure This innovative volume moves beyond psychology as social engineering into new varieties of social knowledge *Culture, Psychotherapy, and Counseling* Lisa Tsoi Hoshmand, 2006 Written by the core faculty of the Hebrew program at Brandeis University the pilot edition of Brandeis Modern Hebrew Intermediate to Advanced serves as a sequel to the well known volume for beginners It contains the functional and contextual elements to bring users Hebrew language proficiency to the intermediate level and introduce students to skills they need to become advanced in their use of the language This volume reflects key principles of the Brandeis University Hebrew curriculum These include Placing emphasis on the learner's ability to use Hebrew in four skill areas listening reading speaking and writing Contextualizing each unit within a specific subject or theme Exposing the student to authentic materials and exploring aspects of Israeli and Jewish culture through language drills and reading passages **Narration, Identity, and Historical Consciousness** Jürgen Straub, 2006-01-01 A generally acknowledged characteristic of modern life namely the temporalization of experience inextricable from our intensified experience of contingency and difference has until now remained largely outside psychology's purview Wherever questions about the development structure and function of the concept of time have been posed for example by Piaget and other founders of genetic structuralism they have been concerned predominantly with concepts of physical chronometrical time and related concepts e.g. velocity All the contributions to the present volume attempt to close this gap A larger number are especially interested in the narration of stories Overviews of the relevant literature as well as empirical case studies appear alongside theoretical and methodological reflections Most contributions refer to specifically historical phenomena and meaning constructions Some touch on the subjects of biographical memory and biographical constructions of reality Of all the various affinities between the contributions collected here the most important is their consistent attention to issues of the constitution and representation of temporal experience *Handbook of Narrative Psychotherapy for Children, Adults, and Families* Jan Olthof, 2018-05-08 The Handbook Narrative Psychotherapy for Children Adults and Families combines philosophical scientific and theoretical insights in the field of narrative psychotherapy and links them to sources of inspiration such as poetry film literature and art under the common denominator narrative thinking Sections on theoretical issues alternate with a large number of case histories drawn from different therapeutic contexts The reader can browse at will through the many examples of therapeutic sessions in some cases including literal transcriptions in which narrativity in all its forms is the point of departure What language does the body speak What messages do seemingly random slips of the tongue convey How can a painting help a client to find words for his or her story The discussion of the logic of abduction demonstrates the importance of metaphor and special attention is given to the processes of creating a therapeutic context and defining a therapeutic framework

Dynamic Process Methodology in the Social and Developmental Sciences Jaan Valsiner, Peter C. M. Molenaar, Maria C.D.P. Lyra, Nandita Chaudhary, 2009-07-09 All psychological processes like biological and social ones are dynamic Phenomena of nature society and the human psyche are context bound constantly changing and variable This feature of reality is often not recognized in the social sciences where we operate with averaged data and with homogeneous stereotypes and consider our consistency to be the cornerstone of rational being Yet we are all inconsistent in our actions within a day or from one day to the next and much of such inconsistency is of positive value for our survival and development Our inconsistent behaviors and thoughts may appear chaotic yet there is generality within this highly variable dynamic The task of scientific methodologies qualitative and quantitative is to find out what that generality is It is the aim of this handbook to bring into one framework various directions of construction of methodology of the dynamic processes that exist in the social sciences at the beginning of the 21st century This handbook is set up to bring together pertinent methodological scholarship from all over the world and equally from the quantitative and qualitative orientations to methodology In addition to consolidating the pertinent knowledge base for the purposes of its further growth this book serves the major educational role of bringing practitioners students researchers and professionals interested in applications the state of the art know how about how to think about extracting evidence from single cases and about the formal mathematical statistical tools to use for these purposes

Personal Construct Psychotherapy David A. Winter, Linda Viney, 2008-09-15 In the half century that has passed since George Kelly put forward his psychology of personal constructs there have been major advances in the form of psychotherapy derived from his theory. This book presents developments in the personal construct theory perspective on psychological disorders and their treatment in the context of contemporary issues in psychotherapy. It illustrates the diverse range of personal construct psychotherapy approaches that have been devised for a wide range of clinical problems and indicates the growing evidence base for these approaches. It contains contributions from most of the leading international practitioners in the field. It will not only be of interest to psychotherapists, other clinicians, academics and students who are already familiar with personal construct theory or constructivism but also to those who are seeking a therapeutic approach which is integrative but has a clear theoretical rationale and which is able to combine humanism with rigour. Critical Issues in Psychotherapy Brent D. Slife, Richard N. Williams, Sally H. Barlow, 2001-02-28 The contributors are an esteemed group that have played significant roles in shaping contemporary understanding of the issues they will be addressing. The number of chapters coincides with the number of weeks in a typical semester, increasing its use as a course text. Brian Vandenberg, University of Missouri St. Louis. A landmark publication. Critical Issues in Psychotherapy moves the discipline into the new millennium by addressing many of the field's new and revolutionary approaches. Through illustrative therapy cases and practitioner commentaries, this text examines both the newer and the more established models in psychotherapy. Bridging the gap between theory and practice, this volume translates the new approaches to psychotherapy, making them more accessible to students. Organized around the issues that are fundamental to psychotherapy, chapters include information on empirically validated treatments, mainstream theories, individualism, spirituality, multiculturalism, moral and legal discourse, and managed care. Bringing together an esteemed group of authorities, this will be the ideal text for students in advanced courses in psychotherapy and counseling practice and theory. **Constructivist Psychotherapy** Robert A. Neimeyer, 2009-01-30 Constructivist psychotherapy focuses on the meaning that clients attribute to their world and the way that this shapes their life and contributes to their difficulties.
