New Approaches to Monetary Theory Heiner Ganßmann, 2012-03-12 Everybody uses money every day but we rarely stop to think about how money works In this book scholars from different disciplines seek to answer that question from historians to economists sociologists a philosopher and a physicist Money works as a social construction because we have mutual expectations that support its use despite the seeming irrationality of trading valuable things or doing strenuous work for pieces of paper or numbers in accounts Recently there has been a revival of interest in monetary theory not least because the impacts of globalizing markets and of new communication and information technologies have changed the forms of money The deep crisis of the financial system has demonstrated the importance of a functioning monetary system and although renewed interest in this has led to significant contributions in various fields it remains true that no social science discipline on its own is sufficiently equipped to explain the basic workings of monetary systems their rapid innovation and their effects on social economic and political structures The contributors to this book report on their latest research on the origins of money on the nature of monetary transactions on money and the state and on the role of money and finance in the recent global crisis They show how established theories of money and the policies guided by these theories went wrong This collection will be a valuable resource for students and researchers seeking a deeper understanding of money

Innovation, Human Capital and Trade Competitiveness Marzenna Anna Weresa, 2013-11-18 This work focuses on researching and establishing the importance of human capital and innovation as determinants of competitive advantages in international trade in the context of rapidly evolving technological advancement globalization and economic integration The processes that accompany the shift from industrial economics to a knowledge based economy are currently the object of interest of both scientists politicians investors and entrepreneurs In many countries the traditional sources of socioeconomic development such as low labor costs availability of inexpensive raw materials and favorable geographic location are waning These economies are searching for new sources of competitive advantage that will allow for maintaining growth among other things by boosting participation in international trade The book explores non traditional drivers of competitiveness in both theory and practice First chapters 1 through 4 present theoretical and methodological aspects of the relationships among international trade human capital and innovation Here the authors address the controversy associated

with the concept of competitiveness itself and its measurement while paying special attention to the political development of comparative advantages related to international trade The second part of the monograph chapters 5 through 8 is of empirical nature This section contains case studies of selected countries that represent models of various national innovation systems Finally the theoretical and practical aspects are integrated allowing policymakers and financial and business leaders to consider how their decisions can influence their countries competitive positions through their investments in innovation and human capital

Bioequity - Property and the Human Body Nils Hoppe, 2016-04-15 Recent scandals involving the use of human body parts have highlighted the need for legal clarification surrounding property law and the use of human tissue This book advances the notion that the legal basis for dealing with this is already available in the law but has thus far neither been used nor discussed Proposing an alternative approach to constructing entitlements in human tissue and resolving resulting property conflicts a new methodology is also advanced for abstracting different concepts within the debate which enables comparison and distinction between different cases of entitlement and retention
