Hollywood's Dirtiest Secret Hunter Vaughan,2019-03-12 In an era when many businesses have come under scrutiny for their environmental impact the film industry has for the most part escaped criticism and regulation Its practices are more diffuse its final product less tangible and Hollywood has adopted public relations strategies that portray it as environmentally conscious In Hollywood s Dirtiest Secret Hunter Vaughan offers a new history of the movies from an environmental perspective arguing that how we make and consume films has serious ecological consequences Bringing together environmental humanities science communication and social ethics Hollywood s Dirtiest Secret is a pathbreaking consideration of the film industry s environmental impact that examines how our cultural prioritization of spectacle has distracted us from its material consequences and natural resource use Vaughan examines the environmental effects of filmmaking from Hollywood classics to the digital era considering how popular screen media shapes and reflects our understanding of the natural world He recounts the production histories of major blockbusters Gone with the Wind Singin in the Rain Twister and Avatar situating them in the contexts of the development of the film industry popular environmentalism and the proliferation of digital technologies Emphasizing the materiality of media Vaughan interweaves details of the hidden environmental consequences of specific filmmaking practices from water use to server farms within a larger critical portrait of social perceptions and valuations of the natural world **The Anthem Companion to Philip Selznick** Paul van

complemented the classical Hollywood filmmaking style while still offering innovative novelty By the end of the 1930s color in film was thoroughly harnessed to narrative and it became elegantly expressive without threatening the coherence of the film's imaginary world Harnessing the Technicolor Rainbow is the first scholarly history of Technicolor aesthetics and technology as well as a thoroughgoing analysis of how color works in film Scott Higgins draws on extensive primary research and close analysis of well known movies including *Becky Sharp* *A Star Is Born* *Adventures of Robin Hood* and *Gone with the Wind* to show how the Technicolor films of the 1930s forged enduring conventions for handling color in popular cinema He argues that filmmakers and designers rapidly worked through a series of stylistic modes based on the demonstration restraint and integration of color and shows how the color conventions developed in the 1930s have continued to influence filmmaking to the present day Higgins also formulates a new vocabulary and a method of analysis for capturing the often elusive functions and effects of color that in turn open new avenues for the study of film form and lay a foundation for new work on color in cinema
