Grammar and Meaning Howard Jackson, 2014-06-11 *Grammar and Meaning* is an introduction to the study of grammar of contemporary English It provides an impressive survey of all the main areas of English grammar from words through to sentences and texts It introduces and explains the linguistic terms needed to talk about the ways in which language works from simple terms like adjective to more complex terms like non finite clause To meet the needs of both students and scholars Howard Jackson has produced an innovative approach to the study of English grammar Instead of concentrating on the formal and theoretical discussion of grammar as many introductions do this original analysis examines the meanings we want to express when we use language Beginning with the question What do we talk about it goes on to investigate how these meanings are structured in the grammar of English These notions are closer to our ordinary understanding of what language is doing and therefore the forms and structures of grammar are more easily grasped The book is extensively illustrated with examples from real English With analytical exercises in each chapter and a comprehensive glossary of terms the book will prove an invaluable aid to students of English language linguistics and English as a Foreign Language whilst also being accessible to anyone who studies English grammar as part of their course

Future Times, Future Tenses Philippe De Brabanter, Mikhail Kissine, Saghie Sharifzadeh, 2014-06-26 Future Times Future Tenses examines how the future is expressed by means of tense aspect and modality across a wide range of languages among them French Polish Basque Turkish and West Greenlandic From the present point of view the future is not fixed while there is arguably only one past the future is largely open and or indeterminate Reference to the future has thus become one of the most hotly debated topics in contemporary linguistics the interactions of future tense with future time and of future tense with the semantics of possible worlds are crucial to any satisfactory account of temporal linguistics This book considers and seeks a resolution to outstanding issues in the field by uniting linguistic and philosophical perspectives on future reference in natural language Scholars from different parts of the world approach these issues from a variety of theoretical perspectives including those of linguistic typology formal semantics

pragmatics and philosophy of language In the process they question the very validity of the traditional notion of a specific marker for future tense The book shows the close connections between linguistic logical metaphysical ontological and epistemological issues concerning the future and reveals the value of linking linguistic considerations of tense and aspect to philosophical approaches to modality and time Linguistic Typology Jae Jung Song, 2018 This textbook provides a critical introduction to major research topics and current approaches in linguistic typology It draws on a wide range of cross linguistic data to describe what linguistic typology has revealed about language in general and about the rich variety of ways in which meaning and expression are achieved in the world's languages Grammaticalization Heiko Narrog, Bernd Heine, 2021-03-31 This textbook introduces and explains the fundamental issues major research questions and current approaches in the study of grammaticalization the development of new grammatical forms from lexical items and of further grammatical functions from existing grammatical forms Grammaticalization has been a vibrant research field in recent years and has proven effective in explaining a wide range of phenomena it has even been claimed that the only true language universals are diachronic and are related to cross linguistic processes of grammaticalization The chapters provide a detailed account of the major issues in the field foundational questions such as directionality criteria and parameters of grammaticalization and phases and cycles the much debated issue of the motivations behind grammaticalization including the role of language contact and typological influences the advantages and disadvantages of different theoretical approaches and the relationship between grammaticalization and process such as lexicalization exaptation and the development of discourse markers Each chapter offers guidance on further reading and concludes with study questions to encourage further discussion there is also a glossary of key terminology in the field Thanks to its comprehensive approach the volume will serve as both a textbook for undergraduate and graduate students and a valuable reference work for researchers in the field
