Semantic Universals and Universal Semantics D. Zaefferer, 2019-10-21 No detailed description available for Semantic Universals and Universal Semantics **Semantic Universals and Universal Semantics** Dietmar Zaefferer, 1991

Semantic and Lexical Universals Cliff Goddard, Anna Wierzbicka, 1994-05-04 This set of papers represents a unique collection it is the first attempt ever to empirically test a hypothetical set of semantic and lexical universals across a number of genetically and typologically diverse languages In fact the word collection is not fully appropriate in this case since the papers report research undertaken specifically for the present volume and shaped by the same guidelines They constitute parallel and strictly comparable answers to the same set of questions coordinated effort with a common aim and a common methodology The goal of identifying the universal human concepts found in all languages is of fundamental importance both from a theoretical and a practical point of view since these concepts provide the basis of the psychic unity of mankind underlying the clearly visible diversity of human cultures They also allow us to better understand that diversity itself because they provide a common measure without which no precise and meaningful comparisons are possible at all A set of truly universal or even near universal concepts can provide us with an invaluable tool for interpreting and explaining all the culture specific meanings encoded in the language and culture systems of the world It can also provide us with a tool for explaining meanings across cultures in education business trade international relations and so on The book contains 13 chapters on individual languages including Japanese by Masayuki Onishi Chinese by Hilary Chappel Thai by Anthony Diller Ewe Africa by Felix Ameka Miskitu languages of South America by Kenneth Hall Australian Aboriginal languages Aranda Yankunytjatjara and Kayardild by Jean Harkins Semantic theory and semantic universals by Goddard Introducing lexical primitives by Goddard and Wierzbicka and Semantic primitives across languages a critical review by Wierzbicka

Semantics : Primes and Universals Anna Wierzbicka, 1996-03-28 This book provides a synthesis of Wierzbicka's theory of meaning which is based on conceptual primitives and semantic universals using empirical findings from a wide range of languages While addressed primarily to linguists the book deals with highly topical and controversial issues of central importance to several disciplines including anthropology psychology and philosophy Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years Semantics Primes and Universals is a major synthesis of her work presenting a full and systematic exposition of that theory in a non technical and readable way It delineates a full set of universal concepts as they have emerged from large scale investigations across a wide range of languages undertaken by the author and her colleagues On the basis of empirical cross linguistic studies it vindicates the old notion of the psychic unity of mankind while at the same time offering a framework for the rigorous description of different languages and cultures A major synthesis of Anna Wierzbicka's work **Situation Theory and Its Applications: Volume 1** Robin Cooper, Kuniaki Mukai, John Perry, Center for the Study of Language and Information

(U.S.), 1990 Situation Theory grew out of attempts by Jon Barwise in the late 1970s to provide a semantics for naked infinitive perceptual reports such as Claire saw Jon run Barwise's intuition was that Claire didn't just see Jon an individual but Jon doing something a situation Situations are individuals having properties and standing in relations A theory of situations would allow us to study and compare various types of situations or situation-like entities such as facts events and scenes One of the central themes of situation theory of meaning and reference should be set within a general theory of information one moreover that is rich enough to do justice to perception communication and thought By now many people have contributed by the need to give a rigorous mathematical account of the principles of information that underwrite the theory

Epistemology for the Rest of the World Masaharu Mizumoto, Stephen P. Stich, Eric S. McCready, 2018 Today the use of English is dominant and even epistemologists in the rest of the world use English using know But why and to what extent can this be justified As the first volume ever to be dedicated solely to this topic the papers collected here will contribute to this important topic and in epistemology in general

Discontinuous Syntax Andrew M. Devine, Laurence D. Stephens, 2000 The interface between syntax and meaning both semantic and pragmatic has emerged as an area of linguistics theory This study applies some of these ideas to hyperbaton offering a new theory with broad applications for our understanding of Greek syntax

Current Issues in Relevance Theory Willy Rouchota, Andreas H. Jucker, 1998-01-01 Many of the papers included in this volume were first presented at the 5th International Pragmatics Conference held in July 1996 in Mexico City Topics covered include the relevance theoretic approach to linguistic semantics and the application of theory to the study of sociolinguistic theory

Empirical Studies of the Construction of Discourse Óscar Loureda, Inés Recio Fernández, Laura Nadal, Adriana Cruz, 2019-08-06 This volume assembles eleven articles addressing current concerns in discourse studies from an empirical perspective Engaging with highly topical issues they indicate the potential of an approach to the construction of discourse via corpus based analysis experimentation or combined methodologies The subject matters of the contributions delivered by renowned scholars and dealing with either one or several languages range from mechanisms through which information structure connection and discourse organization are realized to prosody as a determinant of hierarchy and specific functions of discourse markers as well as innovative tools for visualizing discourse structure The resulting volume addresses scholars working in a variety of topics who either wish to incorporate empirical methods to their research or whose work is already empirically oriented and wish to gain insight into empirical evidence on state of the art discursive phenomena

Expressing Surprise at the Crossroads Susana Rodríguez Rosique, 2025-01-27 Expressing Surprise at the Crossroads has as its aim to evaluate the impact of

mirativity in Romance languages or expressed differently to determine how these languages apprehend surprise and related notions as linguistic devices The different contributions included in the book point to revealing conclusions concerning the status of surprise in Romance as well as the place that mirativity occupies if any in the grammar of these languages In this vein the volume tries to answer questions such as to what extent do interactional contexts influence the development of mirative structures or how is the solidarity synchrony diachrony reflected in mirative constructions

The Second Glot International State-of-the-Article Book Lisa Cheng,Rint Sybesma,2014-10-15 The Glot International State of the Article books constitute the ideal solution for every one who wants to have a good idea of what the others are doing but does not have time to follow the developments in all other parts of the field on a day to day basis All articles were previously published in Glot International and have been revised and updated and special attention was given to the extensive bibliography which constitutes an important part of each overview article Among the essays in the first volume are overview articles dealing with VP ellipsis by Kyle Johnson Ergativity by Alana Johns tone by San Duanmu acquisition of phonology by Paula Fikkert and semantic change by Elizabeth Closs Traugott The second volume offers articles on subjects ranging from the development of grammars by David Lightfoot and markedness in phonology by Keren Rice to the syntactic representation of linguistic events by Sara Thomas Rosen optionality in Optimality syntax by Gereon Müller and the nature of coordination by Ljiljana Progovac

Negative Contexts Ton van der Wouden,2002-11-01 This research

emphasizes semantic syntactic and pragmatic considerations illustrating a wide array of linguistic approaches Written from within the theoretical framework of Generalized Quantifiers the three main areas considered are collocations polarity items and multiple negations Levels in Clause Linkage Tasaku Tsunoda,2018-02-05 This is a cross linguistic exploration of the use of clause linkage markers in causal conditional and concessive sentences Employing a five level classification of clause linkage based on semantic and pragmatic grounds it shows that within individual languages different markers exhibit different distributions on the five levels Also the rich evidence presented from seventeen languages from many parts of the world documents that these distributions present commonalities as well as differences across the languages of the sample

Plurality and Quantification F. Hamm,Erhard W. Hinrichs,2013-03-14 The papers in this volume address central issues in the study of Plurality and Quantification from three different perspectives Algebraic approaches to Plurals and Quantification Distributivity and Collectivity Theoretical Foundations Distributivity and Collectivity Empirical Investigations Algebraic approaches to the semantics of natural languages were independently introduced for the study of generalized quantification predication intensionality mass terms and plurality The most prominent modern advocate for an algebraic theory of plurality and mass terms is certainly Godehard Link It is indicative of the Wirkungsgeschichte of Link's work that most of the contributions in this volume take the logic of plurals proposed by Godehard Link Link 1983 1987 as their foundation or at the very least as their point of reference Link's own paper in this volume provides a concise summary of many of the central research issues that have engaged semanticists during the last decade Link's paper also contains an extensive bibliography that provides an excellent resource for scholars interested in the semantics of plurals Since we can refer readers to Link's paper for an excellent survey of the subject matter of this book we will limit our attention in this introduction to summarizing the individual contributions in this volume The book is organized into three main sections within each section the papers are ordered alphabetically However as in much of linguistic theorizing there is an exception for reasons pointed out above Godehard Link's article appears as Chapter 1 Syntax and Lexis in Conversation Auli Hakulinen,Margret

Selting,2005-09-28 This volume is a collection of current work at the interface of linguistics and conversation analysis The focus is on linguistic items in their action contexts syntactic structures and lexical items in data from natural conversations in six European languages Danish English Finnish German Italian and Swedish Some of the studies deal with similar practices in two different languages which enables cross linguistic comparisons The notion of construction is brought together with an interactional perspective the fact that constructions cannot always be clearly analysed as either syntactic or lexico semantic has its reflection in this volume So far there have been fewer attempts at interactionally oriented work on lexical and semantic phenomena than on syntactic constructions In this volume several papers show the interactional relevance of word selection and lexical semantic issues In the future studies on syntax and lexico semantics in interaction will enrich realistic grammars of our languages and cross linguistic description of comparable practices of organizing talk in interaction will be

invaluable for the study of both inter European and international communication **Logic and Linguistics** Helmut Schnelle, Niels Ole Bernsen, 1989 The present volume on Logic and Linguistics is one in a series of five presenting the findings of a joint European study in cognitive science 1987-88 The study was organised and funded as a collaborative network by the research unit FAST Forecast and Assessment in Science and Technology of the Commission of the European Communities and comprised about 35 scientists from the core disciplines of cognitive science The research disciplines represented in the network were cognitive psychology logic and linguistics cognitive neuroscience human computer interaction and artificial intelligence
