Looking At Cities:

Looking at Cities Allan B. Jacobs, 1985 Allan Jacobs has written a city planning book for everyone with a passion for urban environments His message conveyed in word and vivid image is that the people who make changes in cities base their decisions upon what they see and that their visions and actions which affect the lives of millions have too often been faulty This book is about how to look at and understand urban environments In order to plan sensitively the city and regional planner must walk in look at wonder about and simply enjoy cities Careful observation is a crucial tool for the kind of analysis and questioning necessary to achieve good planning Through observation the city planner and urban activist can learn when an area was built for whom it was built who lives there now how it has changed and how it might be improved for present and future inhabitants Jacobs shows us how to read cities by identifying and discussing the many visual clues and their various meanings in different environments Case studies of American and European cities San Jose San Francisco Cincinnati Bologna Rome and over two hundred striking photographs drawings and maps by the author present ways to read the environment that will prove indispensable for urban planners and will delight all city watchers

Why Cities Look the Way They Do Richard J. Williams, 2019-08-08 We tend to think cities look the way they do because of the conscious work of architects planners and builders But what if the look of cities had less to do with design and more to do with social cultural financial and political processes and the way ordinary citizens interact with them What if the city is a process as much as a design Richard J Williams takes the moment construction is finished as a beginning tracing the myriad processes that produce the look of the contemporary global city This book is the story of dramatic but unforeseen urban sights how financial capital spawns empty towering skyscrapers and hollowed out ghettos how the zoning of once illicit sexual practices in marginal areas of the city results in the reinvention of culturally vibrant gay villages how abandoned factories have been repurposed as creative hubs in a precarious postindustrial economy It is also the story of how popular urban clichés and the fictional portrayal of cities powerfully shape the way we read and see the bricks concrete and glass that surround us Thought provoking and original **Why Cities Look the Way They Do** will appeal to anyone who wants to understand the contemporary city shedding new light on humanity's greatest collective invention

Cities and Photography Jane Tormey, 2013-01-17 Photographs display attitudes agency and vision in the way cities are documented and imagined **Cities and Photography** explores the relationship between people and the city visualized in photographs It provides a visually focused examination of the city and urbanism for a range of different disciplines across the social sciences and humanities photography and fine art This text offers different perspectives from which to view social political and cultural ideas about the city and urbanism through both verbal discussion and photographic representation It provides introductions to theoretical conceptions of the city that are useful to photographers addressing urban issues as well as discussing themes that have preoccupied photographers and informed cultural issues central to a discussion of city This text interprets the city as a spatial network

that we inhabit on different conceptual psychological and physical levels and gives emphasis to how people operate within relate to and activate the city via construction habitation and disruption Cities and Photography aims to demonstrate the potential of photography as a contributor to commentary and analytical frameworks what does photography as a medium provide for a vision of city and what can photographs tell us about cities histories attitudes and ideas This introductory text is richly illustrated with case studies and over 50 photographs summarizing complex theory and analysis with application to specific examples Emphasis is given to international contemporary photographic projects to provide provide focus for the discussion of theoretical conceptions of the city through the analysis of photographic interpretation and commentary This text will be of great appeal to those interested in Photography Urban Studies and Human Geography *Historic Cities* Jeff Cody, Francesco Siravo, 2019-07-30 This new volume in the GCI s Readings in Conservation series brings together a selection of seminal writings on the conservation of historic cities This book the eighth in the Getty Conservation Institute s Readings in Conservation series fills a significant gap in the published literature on urban conservation This topic is distinct from both heritage conservation and urban planning despite the recent growth of urbanism worldwide no single volume has presented a comprehensive selection of these important writings until now This anthology profusely illustrated throughout is organized into eight parts covering such subjects as geographic diversity reactions to the transformation of traditional cities reading the historic city the search for contextual continuities the search for values and the challenges of sustainability With more than sixty five texts ranging from early polemics by Victor Hugo and John Ruskin to a generous selection of recent scholarship this book thoroughly addresses regions around the globe Each reading is introduced by short prefatory remarks explaining the rationale for its selection and the principal matters covered The book will serve as an easy reference for administrators professionals teachers and students faced with the day to day challenges confronting the historic city under siege by rampant development *Innovations in Smart Cities Applications Volume 8* Mohamed Ben Ahmed, Boudhir Anouar Abdelhakim, İsmail Rakıp Karas, Kaoutar Ben Ahmed, 2025-05-06 This book discovers the latest technological advances that are transforming our cities into smart and connected spaces This book presents cutting edge research and inspiring case studies on urban management smart mobility and environmental sustainability With an innovative approach it explores concrete solutions and future perspectives to improve the quality of urban life Intended for researchers professionals and decision makers this book is an essential resource to understand and participate in the transformation of smart cities *The Roadmap for Sustainable Business and Net Zero Carbon Emission* Henry K. The Venice Variations Sophia Psarra, 2018-04-30 From the myth of Arcadia through to the twenty first century ideas about sustainability how we imagine better urban environments remain persistently relevant and raise recurring questions How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery and by which mechanisms do they foster imagination and innovation While past utopias were conceived in terms of an ideal geometry contemporary exemplary models of urban design seek technological

solutions of optimal organisation The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia Venice was not the result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication Its urban creativity though came to represent the quintessential combination of place and institutions of its time Through a discussion of Venice and two other works owing their inspiration to this city Italo Calvino's *Invisible Cities* and Le Corbusier's *Venice Hospital* Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic algorithm that is a structure with a small number of rules capable of producing a large number of variations The rapidly escalating processes of urban development around our big cities share many of the motivations for survival shelter and trade that brought Venice into existence Rather than seeing these places as problems to be solved we need to understand how urban complexity can evolve as happened from its unprepossessing origins in the marshes of the Venetian lagoon to the model city that endured a thousand years This book frees Venice from stereotypical representations revealing its generative capacity to inform potential other Venices for the future *First Concurrent*

Russian Diaspora Ludmila Isurin, 2011 The book presents a broad interdisciplinary perspective on the contemporary Russian immigration to three countries the United States Germany and Israel The changes and transformations in three domains i.e. cultural perception self identification and attitudes to first language maintenance are explored through the Acculturation Framework that allows bringing together these essential aspects of immigration A separate look at Jewish and Russian ethnic groups within the so called Russian immigration as well as its interdisciplinary nature sets this book apart from other studies on recent immigration from the former USSR

Moorish Cities in Spain Catherine Gasquoine Hartley, 1906 *The Cities and Bishoprics of Phrygia* Sir William Mitchell Ramsay, 1895 *A Tale of Two Cities* Charles Dickens, 1894 *Cities in the Sand* Kenneth D. Matthews, Alfred W. Cook, 2018-12-02 Today the ancient Roman towns of Leptis Magna and Sabratha on the Mediterranean coast of Libya attract only a few curious travelers But two thousand years ago they were thriving commercial and agricultural centers whose value to Rome was measured by the wealth of produce shipped annually to the cities of the Empire This volume is primarily an introduction to the personality of these two towns recovered by archaeologists from the burying sands only in relatively recent years The text offers a concise and informative survey of the history of the region known as Tripolitania and examines the cultural and social life of Leptis Magna and Sabratha as reflected in the magnificent ruins depicted in the accompanying plates The first chapter provides an understanding of Roman government and organization in Africa from the time of Scipio's destruction of Carthage in 146 B.C. until the beginning of Mohammedan rule in 698 A.D. This discussion gives perspective to the life of Leptis Magna and Sabratha by placing it in context with Roman Africa in general explaining the various political divisions of the Roman provinces as well as the manner of civil and military administration under early imperial Roman Vandal and Byzantine rule The second and third chapters deal respectively with the particular ruins of the two towns Although both Leptis Magna and Sabratha unlike their sister city Oea or modern Tripoli succumbed to the smothering weight of drifting sand dunes they are made to live again in the pages of this volume Kenneth Matthews text is an excellent summary of life in Roman times while the photographs by Alfred Cook provide views unsurpassed in beauty and clarity of detail of the buildings and art that once flourished along the rim of the Mediterranean Sea
