Jungle Revolt Fomundam Eric Awandeh,2011-09-06 In the jungle of animals where everyone is compelled to live on edge not knowing what to expect the next moment misfortunes and sufferings of all types when they befall individuals are accepted as a natural and blessed necessity for the continuation and sustaining of life Once in a while however this rule is overturned in the anguish of the pain caused by such a dreadful reality In Jungle Revolt the merciless slaughter of the family of Mr Pig before his own very eyes compels him in his humbleness to dare this long established and fast rule of the survival of the fittest in the jungle And notwithstanding the obviously formidable challenges to such an unprecedented undertaking he manages at the expense of his own life to shake the foundations of the rule leaving behind a lasting legacy that does not necessarily annul the rule but brings relief to many Jungle revolt tries to explain a peculiar and age old human phenomenon On account of different abilities and natures stronger human beings tend to lord it on the weaker ones who on account of their weakness are generally resigned to the undesirable fate Occasionally however because of this unpleasant reality these weak ones stand up in revolt yearning for a better life and even though they may not reap exactly what they desire their situation compelled by a Higher Power could not be exactly the same again

The Raw and the Cooked Claude Lévi-Strauss,1983-03-15 In anthropological terms the concept of the raw verses the cooked has long been associated with the dichotomy between the natural world and the world of human culture In a broad based empirical study of native mythologies Claude L vi Strauss proposes a structural and thematic link between the opposition of the raw and the cooked in mythological thought and man s attempt to establish a balanced relationship between natural and cultural forces L vi Strauss postulates that the raw cooked axis is characteristic of all human culture with

elements falling along the raw side of the axis being those of natural origin and those on the cooked side being of cultural origin i.e. products of human creation Symbolically cooking marks the transition from nature to culture by means of which the human state can be defined in accordance with all its attributes In mythological thought the cooking of food is in effect a form of mediation between nature and society between life and death and between heaven and earth The cook in turn can be viewed as a cultural agent whose function is to mediate the conjunction of the raw product and the human consumer the operation of which has the effect of making sure the natural is at once cooked and socialized
