A Man's Reach Charles Edward Locke, 1914 **The Fall and the Ascent of Man** Joseph Fitzpatrick, 2012-02-16 In this groundbreaking work Joseph Fitzpatrick challenges the traditional interpretation of chapter three of Genesis the story of Adam and Eve in Eden This narrative was imposed on the Christian West but not the East through the genius of Augustine of Hippo and came to dominate Catholic and Protestant theology Fitzpatrick points to weaknesses in Augustine s interpretation of the Genesis story before providing a revolutionary interpretation of his own Fitzpatrick claims that this story is about nothing less than hominisation Far from being an account of the original sin against God it is in fact a symbolic tale about the ascent of a hominid couple to full human consciousness Aided by modern anthropology Fitzpatrick is able to enter into the mentality of the ancient Hebrews and adopt a literary approach to the biblical text by comparing it with the Babylonian Epic of Gilgamesh In *The Fall and the Ascent of Man* he clears away the clutter of centuries and lets us see the famous tale for what it is the story of the emergence of humankind on the face of the earth first in nature then in history This book provides the key for a new interpretation of the early chapters of Genesis within a new understanding of Judaeo Christian salvation history By offering a biblical account of human sinfulness Fitzpatrick hopes to draw Western theology closer to that of the Orthodox East and point the way forward for Christian theology in the twenty first century **World Design Science Decade: Phase 1 Document 1** R. Buckminster Fuller, The documents in this series originated with a proposal made by R Buckminster Fuller to the International Union of Architects I U A at their VIIth Congress in London England in July 1961 launching the World Design Science Decade He proposed then that the architectural schools around the world be

encouraged by the I U A to invest the next ten years in a continuing problem of how to make the total world's resources which in 1961 serve only 40% serve 100% of humanity through competent design despite a continuing decrease of metal resources per capita In essence The World Design Science Decade series of documents suggests in great detail ways in which world architectural schools and specifically their students should initiate and assume The Design Science Decade The total series includes many of Fuller's most prescient ideas A note from the series editor John McHale Though the language of some of the texts may seem difficult at first approach it should be borne in mind that one of our major problems in thinking today 1965 is the use of language systems which still represent a fixed structurally compartmentalized world view The terms available to us for the expression of dynamic rather than static concepts are far from satisfactory Fuller's language is particularly representative of the transitional state of the western world between the older traditional noun centered culture to its present day changing verb centered culture In his search for an adequately descriptive terminology he tends to employ concepts and usages from many different fields juxtaposed in ways which may be unfamiliar to those more customarily restrained within the vocabularies of particular disciplines Description by the Buckminster Fuller Institute courtesy of The Estate of R Buckminster Fuller *Letters to a Man of the World Disposed to Believe* J.
