## **Man Time And World Two Contributions To Anthropological Psychology Duquesne Studies:**

*Man, Time, and World* Erwin Walter Straus, 1982      **The Concept of Passivity in Husserl's Phenomenology** Victor Biceaga, 2010-06-16 Building upon Husserl's challenge to oppositions such as those between form and content and between constituting and constituted *The Concept of Passivity in Husserl's Phenomenology* construes activity and passivity not as reciprocally exclusive terms but as mutually dependent moments of acts of consciousness The book outlines the contribution of passivity to the constitution of phenomena as diverse as temporal syntheses perceptual associations memory fulfillment and cross cultural communication The detailed study of the phenomena of affection forgetting habitus and translation sets out a distinction between three meanings of passivity receptivity sedimentation or inactuality and alienation Husserl's texts are interpreted as defending the idea that cultural crises are not brought to a close by replacing passivity with activity but by having more of both      **Existential-Phenomenological Perspectives in Psychology** Ronald S. Valle, Steen

Halling, 2013-03-08 When I began to study psychology a half century ago it was defined as the study of behavior and experience By the time I completed my doctorate shortly after the end of World War II the last two words were fading rapidly In one of my first graduate classes a course in statistics the professor announced on the first day Whatever exists exists in some number We dutifully wrote that into our notes and did not pause to recognize that thereby all that makes life meaningful was being consigned to oblivion This bland restructuring perhaps more accurately destruction of the world was typical of its time 1940 The influence of a narrow scientific attitude was already spreading throughout the learned disciplines In the next two decades it would invade and tyrannize the social sciences education and even philosophy To be sure quantification is a powerful tool selectively employed but too often it has been made into an executioner's axe to deny actuality to all that does not yield to its procrustean demands      **Situating Phenomenological Psychopathology:**

**Subjective Experience Within the World** Elizabeth Pienkos, Jasper Feytaerts, Rosa Ritunnano, Jérôme Englebert, Louis Sass, 2023-09-28 vThe discipline of phenomenological psychopathology has historically focused on elucidating the ways in which persons with psychiatric illnesses experience themselves and the world Early pioneers in this field were aware of the impact of uncontrollable life events on the onset and course of severe illness such as Jaspers recognition that environmental events may stimulate or enhance certain innate potentialities for the development of a disorder Furthermore the role of environment and life events in the development and onset of psychiatric illness has been well documented For example there is a clear relationship between the development of psychotic symptoms and life stressors including adverse childhood events urban living and migration However relatively little attention with some notable exceptions has been devoted to exploring the features of those experienced worlds and how they may impact the trajectory of severe illnesses such as schizophrenia depression and personality disorders      **The Time Dimension** T K. Das, 1990-04-17 This is the first comprehensive bibliography of temporal scholarship research on the subject of time and the phenomenon of time itself As the author notes in

his introduction the nature of research insights on the subject of time is difficult to comprehend within the confines of any specific discipline since relevant materials are scattered throughout the literature in numerous scholarly fields By bringing together the most significant published works in a wide variety of disciplines this unique compendium enables scholars and researchers to look beyond their own particular area of expertise when selecting appropriate resource materials Throughout the focus is on the time dimension itself as a problematic or researchable phenomenon rather than on narrow topics such as time management time series analysis or forecasting Organized by discipline the work begins with an initial chapter that lists general works on the time dimension Nineteen chapters then list works in particular disciplines ranging from anthropology and culture to biology economics futures studies history linguistics management studies psychology and more The final chapter lists miscellaneous entries which could not be categorized into any of the specific disciplinary headings Within each chapter entries are arranged alphabetically by author or editor Nearly all sources are from scholarly journals and books

Phenomenology World-Wide Anna-Teresa Tymieniecka,2014-11-14 Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names      *Books in Series* ,1985 Vols for 1980 issued in three parts Series Authors and Titles      *Medical Books and Serials in Print* ,1983      **Medical and Health Care Books and Serials in Print** ,1987
