New Visions of Adolescence in Contemporary Latin American Cinema Geoffrey Maguire,Rachel Randall,2018-07-20 This volume explores the recent adolescent turn in contemporary Latin American cinema challenging many of the underlying assumptions about the nature of youth and distinguishing adolescence as a distinct and vital area of study Its contributors examine the narrative and political potential of teenage protagonists in a range of recent films from the region acknowledging the distinct emotional registers that are at play throughout adolescence and releasing teenage subjectivities from restrictive critical and theoretical emphases on theories of childhood As the first academic study to examine the figure of the adolescent in contemporary Latin American film *New Visions of Adolescence in Contemporary Latin American Cinema* thus presents a timely and innovative analysis of issues of sexuality and gender political and domestic violence and social class and will be of significant interest to students and researchers in Latin American Studies Cultural Studies World Cinema and Childhood Studies

Embodied Conceptualization or Neural Realization Qingqing Zhao,2019-08-31 This book focuses on linguistic synaesthesia in a hitherto less studied language Mandarin Chinese and adopts a corpus driven approach to support the analysis and argumentation The study identifies directional tendencies and underlying mechanisms for Mandarin synaesthetic adjectives By doing so it not only provides an added layer of understanding for theories of linguistic synaesthesia but also offers evidence to help refine previous theories such as Embodiment Theory and Conceptual Metaphor Theory In brief the book makes a significant contribution to the development of Cognitive Linguistics The intended readership includes but is not limited to graduate students in linguistics and researchers interested in Chinese linguistics in particular and in lexical semantics and cognitive linguistics in general

Cinema and Sensation Martine Beugnet,2007 A study of one of the most intriguing aspects of contemporary French cinema the cinema of transgression This book

demonstrates how the films explored as forms of embodied thought offer alternative ways of approaching those questions that are at the heart of the most burning socio cultural debates

Locating Consciousness Valerie Gray Hardcastle,1995 *Locating Consciousness* argues that our qualitative experiences should be aligned with the activity of a single and distinct memory system in our mind brain Spelling out in detail what we do and do not know about phenomenological experience this book denies the common view of consciousness as a central decision making system Instead consciousness is viewed as a lower level dynamical structure underpinning our information processing This new perspective affords novel solutions to a wide range of problems the absent qualia the binding problem the inverted spectra the specter of epiphenomenalism the

explanatory gap the distinction between objective and subjective and the general skeptical doubts about the viability of the naturalist project itself Drawing on recent data in psychology and neuroscience Locating Consciousness also discusses when we become conscious and when we should think other animals are conscious Series A [Thomas Hardy's Short Stories](#) Juliette Berning Schaefer, Siobhan Craft Brownson, 2016-11-18 Thomas Hardy penned nearly fifty short stories but in spite of this impressive number his contributions to the genre have been relatively understudied Bringing together an international group of scholars this is the first edited collection devoted solely to Hardy's works of short fiction The contributors take up topics related to their publication in periodicals gender and community relationships and narrative techniques Taken together the essays show that Hardy's short stories are important not only for what they tell us about Hardy as a writer who straddles the divide between the traditionalist and the modernist but also for how they reflect and inform the period in which he wrote *Timeless Healing* Herbert Benson, 2009-07-07 Learn how the mind shapes the body and take charge of your health and wellness with the science and power of belief In this life changing book Dr Herbert Benson draws on his twenty five years as a physician and researcher to reveal how affirming beliefs particularly belief in a higher power make an important contribution to our physical health We are not simply nourished by meditation and prayer but are in essence wired for God Combining the wisdom of modern medicine and of age old faith Dr Benson shows how anyone can with the aid of a caring physician or healer use their beliefs and other self care methods to heal over 60 percent of medical problems As practical as it is spiritual *Timeless Healing* is a blueprint for healing and transforming your life **Synesthesia** Lynn C. Robertson, Noam Sagiv, 2005 Owing to its bizarre nature and its implications for understanding how brains work synesthesia has recently received a lot of attention in the popular press and motivated a great deal of research and discussion among scientists The questions generated by these two communities are intriguing Does the synesthetic phenomenon require awareness and attention How does a feature that is not present become bound to one that is Does synesthesia develop or is it hard wired Should it change our way of thinking about perceptual experience in general What is its value in understanding perceptual systems as a whole This volume brings together a distinguished group of investigators from diverse backgrounds among them neuroscientists novelists and synesthetes themselves who provide fascinating answers to these questions Although each approaches synesthesia from a very different perspective and each was curious about and investigated synesthesia for very different reasons the similarities between their work cannot be ignored The research presented in this volume demonstrates that it is no longer reasonable to ask whether or not synesthesia is real we must now ask how we can account for it from cognitive neurobiological developmental and evolutionary perspectives This book will be important reading for any scientist interested in brain and mind not to mention synesthetes themselves and others who might be wondering what all the fuss is about [Springer Handbook of Augmented Reality](#) Andrew Yeh Ching Nee, Soh Khim Ong, 2023-01-01 The Springer Handbook of Augmented Reality presents a comprehensive and authoritative guide to

Novel Notions Katherine E. Kickel, 2023-06-14 Medical popular and literary understanding about the imagination converged when Thomas Willis asserted that he had discovered the area of the brain that facilitated imagining Taking this discovery as paradigmatic *Novel Notions* examines the reverberations of the medical investigation of the imagination in early British novels by Daniel Defoe Henry Fielding Laurence Sterne and Ann Radcliffe It argues that one of the novel's central features was a mapping of the terrain of human cognition imagination and creation as a continuation of early modern medicine's account of perceptual experience All the novels discussed reveal a simultaneous anxiety and excitement about medicine's understanding of the relationship between the imagination and perceptual experience through narrators who reflect on the nature of authoring

Fresh Perspectives: Introduction to Psychology Belinda Train, 2007

The Myth of Pain Valerie Gray Hardcastle, 1999 Valerie Gray Hardcastle argues that both professional and lay definitions of pain are wrongheaded with consequences for how pain and pain patients are treated how psychological disorders are understood and how clinicians define the mind body relationship Pain although very common is little understood Worse still according to Valerie Gray Hardcastle both professional and lay definitions of pain are wrongheaded with consequences for how pain and pain patients are treated how psychological disorders are understood and how clinicians define the mind body relationship Hardcastle offers a biologically based complex theory of pain processing inhibition and sensation and then uses this theory to make several arguments 1 psychogenic pains do not exist 2 a general lack of knowledge about fundamental brain function prevents us from distinguishing between mental and physical causes although the distinction remains useful 3 most pain talk should be eliminated from both the folk and academic communities and 4 such a biological approach is useful generally for explaining disorders in pain processing She shows how her analysis of pain can serve as a model for the analysis of other psychological disorders and suggests that her project be taken as a model for the philosophical analysis of disorders in psychology psychiatry and neuroscience

From Skin to Heart Paolo Santangelo,Ulrike Middendorf,2006 Just like the self sensations and emotions expressed in literature are elusive issues Necessarily separated from living reality and yet in a sense a mirror of it linguistic coding of bodily feeling and emotional feeling became subject of avid interest among scholars of historical emotion research and the history of mentality in intra and intercultural perspectives This volume combines eleven essays with critical discussions concerning the bidirectional network of sense perception and emotion Exploring the theme from different angles psychological medical and literary From Skin to Heart highlights the intimate interrelationship between bodily sensations states of mind and the emotions from pain

illness and self destruction to love sickness and self sacrifice in early Chinese poetry and ethics and late imperial lyrics and narrative The partly descriptive partly analytical essays are contributions of a new wave of Continental and American sinology that inspired by cultural studies discourse analysis and rhetorical analysis offers fresh views on body and psyche as locked into and emerging from Chinese primary sources An appendix provides additional examples of the rich linguistic material referring to phenomena of sense perception and the affective sphere and their interdependence

The Physiology of Sexist and Racist Oppression Shannon Sullivan, 2015-07-01 While gender and race often are considered socially constructed this book argues that they are physiologically constituted through the biopsychosocial effects of sexism and racism This means that to be fully successful critical philosophy of race and feminist philosophy need to examine not only the financial legal political and other forms of racist and sexism oppression but also their physiological operations Examining a complex tangle of affects emotions knowledge and privilege The Physiology of Sexist and Racist Oppression develops an understanding of the human body whose unconscious habits are biological On this account affect and emotion are thoroughly somatic not something mental or extra biological layered on top of the body They also are interpersonal social and can be transactionally transmitted between people Ranging from the stomach and the gut to the hips and the heart from autoimmune diseases to epigenetic markers Sullivan demonstrates the gastrointestinal effects of sexual abuse that disproportionately affect women often manifesting as IBS Crohn's disease or similar functional disorders She also explores the transgenerational effects of racism via epigenetic changes in African American women who experience much higher pre term birth rates than white women do and she reveals the unjust benefits for heart health experienced by white people as a result of their racial privilege Finally developing the notion of a physiological therapy that doesn't prioritize bringing unconscious habits to conscious awareness Sullivan closes with a double barreled approach for both working for institutional change and transforming biologically unconscious habits The Physiology of Sexist and Racist Oppression skillfully combines feminist and critical philosophy of race with the biological and health sciences The result is a critical physiology of race and gender that offers new strategies for fighting male and white privilege
