Man Made Women How New Reproductive Technologies Affect Women:

Man-made Women Gena Corea,1985 Man Made Women will encourage women to start questioning the miracle of the new reproductive technologies and to become involved in crucial decisions about their bodies and their lives Back cover

Man-Made Women Gena Corea,Renate Duelli Klein,Jalna Hanmer,Helen B. Holmes,Betty Hoskins,Madhu Kishwar,Janice Raymond,Robyn Rowland,Roberta Steinbacher,2024-11-20 In the early 1980s the new reproductive technologies available supposedly offered infertile women a chance to have children However there was growing concern that the determination of scientists to dominate nature their disregard for women s well being and the financial gains to be made from these technologies would together result in the increased modification of all women s lives and the loss of even more control over our own bodies Originally published in 1985 the essays in Man Made Women describe the technologies being used and researched in the areas of in vitro fertilization test tube babies sex predetermination and embryo transfer at the time They discuss the practical application of the technologies on an international scale and draw attention to the racist and classist assumptions on which they are based There is also information about the international action that feminists had begun to counter these so called benevolent and therapeutic technologies Man Made Women hoped to encourage women to start questioning the miracle of these new reproductive technologies and to become involved in crucial decisions about their bodies and their lives *Man-made Women* ,1985 New Reproductive Technologies Maureen McNeil,1990-04-12 This collection of essays provides an overview of the social developments associated with the new reproductive technologies It assesses the significance of these new technologies for the field of the sociology of technology as a whole Women's Studies Quarterly Lee Quinby,2001-08 A timely and vital issue of this leading journal examines the impact of new technologies on the lives of women *Women, Medicine, Ethics and the Law* Susan Sherwin,Barbara Parish,2020-09-10 This title was first published in 2002 A collection of articles focused on women within a general study of medicine ethics and the law Topics covered include areas where the institutions of medicine ethics and the law intersect in women s reproductive and sexual lives the impact of legal policies and dominant ethical beliefs on many aspects of women s health and the health practices and policies of bioethics and health law The editors recognise that it is important not to lose sight of social differences other than gender such as race ethnicity class age sexuality religion level of physical and mental ability and family relationships In their approach they seek to consider the lives and experiences of women as primary Hence they focus on the question of how women s encounters with the health care system are structured by gender and other socially significant dimensions of their lives rather than the question of how women differ from the male norm Issues in Reproductive Technology Helen B. Holmes,1994-08 A remarkable collection of scholarly essays philosophical discussions and ethical arguments concerning reproductive choices Choice It seems as if every week there is a new case involving reproductive technologies that raises provocative often painful questions What policies should be followed by centers that

preserve human embryos Are such innovations as Norplant improvements over established methods of contraception Should RU 486 be available in the U S Is prenatal diagnosis an ethically acceptable step to limiting the number of disabled people These are just some of the vital questions explored in this timely work which offers incisive analysis of the plethora of issues raised by advances in reproductive medicine The book s major section cover abortion contraception cryopreservation of gametes and embryos surrogate motherhood and psychosocial issues of in vitro fertilization In each section introductory essays by recognized authorities such as Elizabeth Bartholet and Andrea L Bonnicksen are followed by critical articles by professionals in such fields as women s health medicine biology sociology politics and philosophy In assessing a technology the authors present well argued analyses of problems created by that technology including views from advocates and practitioners that raise attendant ethical and practical issues

Ectogenesis, 2006-01-01 This book raises many moral legal social and political questions related to possible development in the near future of an artificial womb for human use Is ectogenesis ever morally permissible If so under what circumstances Will ectogenesis enhance or diminish women s reproductive rights and or their economic opportunities These are some of the difficult and crucial questions this anthology addresses and attempts to answer

Communication and Disenfranchisement Eileen Berlin Ray, 2013-12-02 This volume and its companion case studies book deal with some of the people groups and classes who are living a disenfranchised existence in the United States Whether through birth life events or unfortunate circumstances they are denied full privileges rights and power within the existing societal structure Centered around societal health problems as they relate to socioeconomic status family abuse and health concerns these volumes examine salient issues from several theoretical frameworks including feminist theory and the social construction of reality Communication and Disenfranchisement provides theory based essays on topics such as the homeless adult survivors of sexual assault battered women persons with disabilities impoverished women the indigent living in the inner city persons with HIV AIDS the terminally ill and the elderly Case Studies in Communication and Disenfranchisement provides parallel case studies applying the issues and concepts discussed in the essays Used together these books provide theoretically based applications of social health issues within a communication framework Traditionally health communication research has emphasized the communication physical health relationship Inadvertently this primary focus has restricted what information has been included under the domain of health communication These books expand that domain by examining how the communication disenfranchisement relationship is accomplished managed and overcome and by recognizing the significance of the pragmatic and theoretic implications of this inquiry

When IVF Fails K. Throsby, 2004-08-19 In spite of the fact that almost eighty percent of all IVF cycles are unsuccessful the dominant representations of the technology are of its success Based on extensive interviews with women and couples who have undergone IVF unsuccessfully and who have since stopped treatment and taking an overtly feminist approach the book explores the ways in which IVF failure is experienced and accounted for

The book argues that IVF failure and the end of treatment have to be carefully managed over time in order to construct the self as normal in the profoundly gendered context of reproductive normativity Treatment failure is identified in the book not only as a central but largely excluded aspect of the experience of IVF but also of a proliferating range of new more controversial reproductive and genetic technologies

Staging Motherhood J. Komporaly, 2006-10-31 Focusing on post 1956 British women playwrights this book questions to what extent transformations in women s lives have impacted on theatre Contributing to a range of discourses including gender studies cultural studies and theatre and performance studies this timely volume is crucial to our understanding of women s drama in this period

Fetal Subjects, Feminist Positions Lynn M. Morgan, Meredith Wilson Michaels, 2016-11-11 Selected as the Most Enduring Edited Collection by the Council on Anthropology and Reproduction Since Roe v Wade there has been increasing public interest in fetuses in part as a result of effective antiabortion propaganda and in part as a result of developments in medicine and technology While feminists have begun to take note of the proliferation of fetal images in various media such as medical journals magazines and motion pictures few have openly addressed the problems that the emergence of the fetal subject poses for feminism Fetal Subjects Feminist Positions foregrounds feminism s effort to focus on the importance of women s reproductive agency and at the same time acknowledges the increasing significance of fetal subjects in public discourse and private experience Essays address the public fascination with the fetal subject and its implications for abortion discourse and feminist commitment to reproductive rights in the United States Contributors include scholars from fields as diverse as anthropology communications political science sociology and philosophy

The Gendered Cyborg Fiona Hovenden, Linda Janes, Gill Kirkup, Kathryn Woodward, 2013-09-13 The Gendered Cyborg explores the relationship between representation technoscience and gender through the metaphor of the cyborg The contributors argue that the figure of the cyborg offers ways of thinking about the relationship between culture and technology people and machines which disrupt the power of science to enforce the categories through which we think about being human male and female Taking inspiration from Donna Haraway s groundbreaking Manifesto for Cyborgs the articles consider how the cyborg has been used in cultural representation from reproductive technology to sci fi and question whether the cyborg is as powerful a symbol as is often claimed The different sections of the reader explore the construction of gender categories through science the interaction of technoscience and gender in contemporary science fiction film such as Bladerunner and the Alien series debates around modern reproductive technology such as ultrasound scans and IVF assessing their benefits and constraints for women issues relating to artificial intelligence and the internet

Routledge Library Editions: Feminist Theory Various, 2021-04-28 Routledge Library Editions Feminist Theory brings together as one set or individual volumes a series of previously out of print classics from a variety of academic imprints With titles ranging from The Liberation of Women to Feminists and State Welfare from Married to the Job to Julia Kristeva this set provides in one place a wealth of important reference sources from the diverse field of gender

studies Feminist Knowledge (RLE Feminist Theory) Sneja Gunew, 2013-05-20 The minority feminist viewpoints have often been submerged in the interests of maintaining a mainstream universal model of feminism This anthology takes into account the various differences among women while looking at the important areas of feminist struggle While sisterhood is indeed global it certainly does not mean that all women are required to submerge their specific differences and assimilate to a universal model Consequently the collection includes essays by leaders in the field of post structuralist enquiry as well as by those immersed in the new spirituality and the social consequences of recent biological research Other essays reflect the political struggles which continue to be waged with different strategies by socialist and radical feminists and the self searching analyses undertaken by feminists uneasy about their inclusion within educational institutions and the radical new interpretations of sexuality within the cultural domain The collection begins with a critique of white mainstream feminism emanating from Aboriginal women in Australia The implications of the critique indicate that there is a pervasive racism within the feminist movement **The Criminalization of a Woman's Body** Clarice Feinman, 2018-10-24 This

groundbreaking book addresses the ominous trend of introducing and passing laws and court decisions regulating the actions of women and the control of their bodies One of the few books published on the criminalization of women s bodies this timely book takes a serious look at the effect these laws would have on women and the threat to their autonomy privacy and control their bodily integrity control over reproductive capacities and their constitutional rights From ancient literature to the literature and law of contemporary society a woman s value has often rested on her fulfilling expected roles as wife and mother The lack of respect for women inherent in this predominantly male oriented line of thinking is reinforced in this new trend of legislation and court decisions attempting to regulate women s behavior and reproductive capacity The Criminalization of a Woman s Body thoroughly discusses these special laws governing women s personal choices and the threats these laws and court decisions pose to women s autonomy and constitutional rights Scholars from Israel Italy and the United States provide a multidimensional discussion of the problem facing women in many if not all countries Contributors represent various disciplines including law philosophy medicine political science sociology women s studies and criminal justice Articles analyze sensitive issues surrounding abortion and its impending criminalization in several countries controversial topics on contract motherhood the power of administrative agencies to control and informally criminalize pregnant women and new mothers policies meant to protect the fetus from pregnant women who deviate from medically socially and legally sanctioned behavior which may deter women from seeking any medical care and the destruction of families due to the criminalization of pregnant women and new mothers and the consequent removal of their children and placement into foster care Professors students librarians agency workers dealing with women s issues and women and men in the general public will find this important book a helpful tool in sorting through the complex issues on criminalizing women s bodies Radically Speaking Diane Bell, Renate Klein, 1996 The contributors to Radically Speaking show that a

radical feminist analysis cuts across class race sexuality region religion and across the generations It is essential reading for Women s Studies sociology cultural studies and anyone interested in processes of social change The collection reveals the global reach of radical feminism and analyze the causes and solutions to patriarchal oppression Seventy writers discuss their ideas and practice of contemporary feminism

The Political Geographies of Pregnancy Laura R. Woliver, 2010-10-01 A searing study of how modern reproductive politics shapes women s bodily agency Pregnancy indisputably takes place within a woman s body But as reproductive power finds its way into the hands of medical professionals lobbyists and policymakers the geographies of pregnancy are shifting and the boundaries need to be redrawn argues Laura R Woliver The Political Geographies of Pregnancy is a vigorous analysis of the ways modern reproductive politics are shaped by long standing debates on abortion and adoption surrogacy arrangements new reproductive technologies medical surveillance and the mapping of the human genome Across a politically charged backdrop of reproductive issues Woliver exposes strategies that claim to uphold the best interests of children families and women but in reality complicate women s struggles to have control over their own bodies Utilizing feminist standpoint theory and promoting a feminist ethic of care Woliver looks at abortion politics modern adoption laws that cater to male headed families regulations that allow the state to monitor pregnant women but not always provide care for them and the power structures behind the seemingly benign world of egg selling and surrogate parenting She also considers the potentially staggering political implications of mapping the human genome and the exclusion of women s perspectives in discussions about legislation and advancements in reproductive technologies

Pregnancy in a High-tech Age Robin Gregg, 1995-04 Too often in the debate over reproductive rights and technologies we lose sight of the fundamental emotional and psychological issues that define the experience of pregnancy Robin Gregg here draws on the words and stories of over thirty women to provide a first hand perspective on pregnancy in the modern age In an age where a new advance in reproductive technology occurs seemingly every month pregnancy has come to be defined by such medical procedures as prenatal screening amniocentesis fetal monitoring induced labor and cesarean sections Public policymakers ethicists religious figures and the medical establishment control the debate drowning out the voices of women who grapple in the most immediate sense with the issues Even feminist theorists often overlook the nuances and paradoxes of the reproductive revolution as experienced by individual particular women The reader follows these thirty women as they speak about whether to become pregnant and by what means how to choose a health provider what meaning they attribute to their pregnancies and how they navigate their way through the contradictory pressures they face during pregnancy The intimate nature of Gregg s research consisting as it does largely of women s pregnancy narratives lends her book a vibrancy often lacking in academic writing about reproduction

Thai In Vitro Andrea Whittaker, 2015-06-01 In Thailand infertility remains a source of stigma for those couples that combine a range of religious traditional and high tech interventions in their quest for a child This book explores this experience of infertility and the pursuit and use of assisted reproductive

technologies by Thai couples Though using assisted reproductive technologies is becoming more acceptable in Thai society access to and choices about such technologies are mediated by differences in class position These stories of women and men in private and public infertility clinics reveal how local social and moral sensitivities influence the practices and meanings of treatment
