*Management and the Worker* Fritz Jules Roethlisberger, William J. Dickson, 2003 This is the official account of the experiments carried out at the Hawthorne Works of the Eastern Electric Company in Chicago These were divided into test room studies interviewing studies and observational studies The test room studies were experiments into what variables in a workplace environment might affect worker fatigue The findings of these tests led to extensive interviewing on the attitudes of the workers The final phase of the Hawthorne experiment focused on social factors using techniques of cultural anthropology to observe small working groups The results of these experiments profoundly influenced the Human Relations movement

Excerpt from *The Management and the Worker* This book and its two companion volumes are designed to present a complete picture of the common problems that arise in handling human relations in any business large or small The method of treatment throughout is the one that seems logically suggested by the nature of the problem itself Theory has been the approach in very many earlier volumes treating the same question but the relations between employers and employees are today so practical the points ordinarily at issue between them have been defined so often and so completely and so much experience has accumulated in handling the problems that the only satisfactory treatment today seems to be an analysis of methods actually being used and proving successful This book is designed primarily for those who face the problems of employee management Business today is a huge laboratory in which numerous intensely interesting industrial experiments are being tried Some of these experiments are still in too early a stage to determine how well they may succeed or whether they will succeed at all Only in two or three instances have these been touched on in the present volume There are many other plans however that have been thoroughly tried and their success proved by results The bulk of this volume and its companion titles are made up of descriptions of the methods used in these concerns About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
