Management by Values S. K. Chakraborty, 1992 This original work is based on the premise that values are as relevant as skills for the effectiveness of managers in industrial and commercial organizations and that these values are unique to every society Chakraborty argues that Indian managers who have long imported value systems from countries that have no roots in India and thus lack the philosophical foundations of the ages old Indian values system have created organizations strong on skills and weak in values to the detriment of efficient functioning Looking at the Japanese Chinese and American systems as well as Indian classical texts in philosophy and psychology he develops a new theory of values for Indian managers and a systematic training regime for putting his theory in practice

Values Management and Value Creation in Business Bertelsmann Stiftung, 2010-07-30 How important is it to actually live a company's values Values provide internal and external orientation and legitimize decisions and actions They also send a signal that the company is a reliable cooperation partner They can therefore help businesses lower their costs and improve their economic value creation If lived values have such advantages why is explicit and effective values management not as widespread as one might think How do inconsistencies between propagated values and actual behavior arise and what is the role that misled expectations among different stakeholders may play Two case studies of internationally successful corporations illustrate the context and show how to leverage explicit values management

Islamic Values and Management Practices Maqbouleh M. Hammoudeh, 2016-05-06 The author of this thought provoking addition to Gower's Transformation and Innovation Series has worked as a management consultant in the Arab Middle East for 25 years In Islamic Values and Management Practices she acknowledges that businesses and other organizations in the region face urgent concerns in relation to quality and transformation but argues that these issues might be more appropriately addressed by the application of an Islamic Management Model rather than the Western one hitherto applied Over time a set of management systems based on Islamic values has been developed by the author These systems recognise the need to build human organizations socially and politically as well as commercially and

also the recognition that for Muslims justice is the ultimate value bringing balance between the individual's soul and spirit on the one hand and the organization's soul and spirit on the other. This Islamic management model stresses that effectiveness is an outcome of operating efficiently and at the same time unifying the organization's objectives with those of its employees and wider society and ensuring that at the strategic level the long view is always maintained. Recounting her own personal and business journey, Maqbouleh Hammoudeh presents the outcomes of research that has tested the application of the Islamic Management Model and its ability to deliver the desired quality and transformation outcomes in a major civic or profit-making organization. At a time when many practitioners and business educators are seeking new management approaches, this revealing case study sheds light on the evolution of a contemporary theory of management for the Muslim World.

The Courage to Lead Through Values Liza-Maria Norlin, 2020-07-03

As society rapidly increases in complexity, we are in great need of sustainable leadership in accord with beliefs and values as we experience continuous changes. The *Courage to Lead through Values: How Management by Values Supports Transformational Leadership Culture and Success* is about having the courage to lead through the implementation of agreed-upon values. In addition, it's about the courage it takes to never cease doing this. However, it's not enough to simply be aware of the importance of constantly working with values and ethics; effective leadership based on values and ethics means taking the time to actually do it. This book tackles this issue by providing you with clear examples of how to implement incorporating values and ethics in your everyday leadership. In business, you face challenges when you must choose between efficiency, analysis of results and goals versus actively working on values and ethics. This book will argue that one doesn't need to compete with the other and it posits that one supports the other. As the world is rapidly growing in complexity and we are facing new challenges and expectations, we must find ways to achieve sustainable lives, businesses, and societies. The author strongly believes that values are the key. By using the methodology Management by Values (MBV) under the mentorship of its founder, Professor Simon L. Dolan, the book is well anchored in research. Ten years ago, a new school was founded in a medium-sized town in Sweden, Internationella Engelska Skolan Sundsvall. It started with a staff of 20 and 250 students. Today, the staff has grown to 120 members with nearly 1100 students attending. In 2019, it was considered one of the best schools in Sweden. The principal, Pascal Brisson, in many ways epitomizes the school and its success. Through in-depth interviews with the principal and colleagues, previous staff executives within the organization, and students, the author amassed information to provide a factual and engaging story of the school's journey from a leadership perspective. It becomes clear how implementing shared values and the principal's courage to never stop actively working with values as a management tool is a recipe for the success of an organization. The book invites you into a conversation about leadership. It includes the author's personal reflections on historical management methodology and on challenges of today. As you follow the ten-year journey of a successful leader in one of our society's most complex organizations, a school, you do this in the light of Management by Values. Essentially, this book gives the reader
