The Apocalypse Factory: Plutonium and the Making of the Atomic Age Steve Olson, 2020-07-28 A thrilling narrative of scientific triumph decades of secrecy and the unimaginable destruction wrought by the creation of the atomic bomb It began with plutonium the first element ever manufactured in quantity by humans Fearing that the Germans would be the first to weaponize the atom the United States marshaled brilliant minds and seemingly inexhaustible bodies to find a way to create a nuclear chain reaction of inconceivable explosive power In a matter of months the Hanford nuclear facility was built to produce and weaponize the enigmatic and deadly new material that would fuel atomic bombs In the desert of eastern Washington State far from prying eyes scientists Glenn Seaborg Enrico Fermi and many thousands of others the physicists engineers laborers and support staff at the facility manufactured plutonium for the bomb dropped on Nagasaki and for the bombs in the current American nuclear arsenal enabling the construction of weapons with the potential to end human civilization With his characteristic blend of scientific clarity and storytelling Steve Olson asks why Hanford has been largely overlooked in histories of the Manhattan Project and the Cold War Olson who grew up just twenty miles from Hanford's B Reactor recounts how a small Washington town played host to some of the most influential scientists and engineers in American history as they sought to create the substance at the core of the most destructive weapons ever created The Apocalypse Factory offers a new generation this dramatic story of human achievement and ultimately of lethal hubris

Destructive Creation Mark R. Wilson, 2016-08-03 During World War II the United States helped vanquish the Axis powers by converting its enormous economic capacities into military might Producing nearly two thirds of all the munitions used by Allied forces American industry became what President Franklin D Roosevelt called the arsenal of democracy Crucial in this effort were business leaders Some of these captains of industry went to Washington to coordinate the mobilization while others led their companies to churn out weapons In this way the private sector won the war or so the story goes Based on new research in business and military archives Destructive Creation shows that the enormous mobilization effort relied not only on the capacities of private companies but also on massive public investment and robust government regulation This public private partnership involved plenty of government business cooperation but it also generated antagonism in the American business community that had lasting repercussions for American politics Many business leaders still engaged in political battles against the New Deal regarded the wartime government as an overreaching regulator and a threatening rival In response they mounted an aggressive campaign that touted the achievements of for profit firms while dismissing the value of public sector contributions This probusiness story about mobilization was a political success not just during the war but afterward as it shaped reconversion policy and the transformation of the American military industrial complex Offering a groundbreaking account of the inner workings of the arsenal of democracy Destructive Creation also suggests how the struggle to define its heroes and villains has continued to shape economic and political development to the present day
