Mainframe from Scratch: Hardware Configuration and z/OS Build Keith Winnard, Bertus Bekker, Rafael Carvalho A. Lima, Nilkanth Patwardhan, Zheng Zhao, Hui Zhou, IBM Redbooks, 2016-12-22 This IBM Redbooks publication helps you install, customize, and configure an IBM z13 and build z/OS environments. This book is intended for those readers who are new to the platform and are faced with the task of installing a mainframe for the first time. By the term mainframe in this instance, we refer to the hardware and the system software. The intention is to show you how this installation can be done. Volume 1 shows you how we set up a mainframe and installed z/OS V2R2 and IBM DB2 V11. The starting point is a basic hardware configuration of an IBM z13 and DS8000 as shipped from the factory. Volume 1 shows you how the following milestones were achieved: Creating a configuration for the Customized Offering Driver (COD) system; Stand-alone restoration of the COD; Expanding the configuration; Installing the z/OS V2R2 ServerPac; Loading and running IVPs for z/OS ServerPac; Installing DB2 ServerPac and IVPs. This publication includes figures that show you how the initial builds were achieved. For this book, we designed a scenario and show you how to build that scenario step by step. Although your requirements likely differ from our scenario, we intend to provide you with an example to show you how it can be done and samples and downloadable materials that you can choose to modify to bring you closer to meeting your needs. This book is divided into the following parts: Part 1: Overview and Planning. In this part, we introduce you to how we approached the project. Part 2: Configuration and Builds. In this part, we describe the tasks that must be completed to create the initial build for the scenario that is described in Part 1.

The Triumvirate Approach to Systems Engineering, Technology Management and Engineering Management Thomas J. Day, 2022-01-31 This text is meant for introductory and midlevel program and project managers. Systems Engineering (SE), Technology Management (TM), and Engineering Management (EM) professionals. This includes support personnel who underpin and resource programs and projects. Anyone who wishes to understand what SE, TM, and EM are, how they work together, what their differences are, when they should be used, and what benefits should be expected will find this text an invaluable resource. It will also help students to understand the career paths in innovation and entrepreneurship to choose from. There is considerable confusion today on

when and where to use each discipline and how they should be applied to individual circumstances This text provides practitioners with the guidelines necessary to know when to use a specific discipline how to use them and what results to expect The text clearly shows how the disciplines retain focus of goals and targets using cost scope schedule and risk to their advantage while complying with and informing investors oversight and those related personnel who eventually govern corporate or government decisions It is more of an entry and midlevel general overview instructing the reader how to use the disciplines and when to use them To use them all properly more in depth study is always necessary However the reader will know when to start where to go and what disciplines to employ depending on the product service market infrastructure system or service under consideration To date none of this is available in existing literature All texts on the subject stretch to try and cover all things which is simply not possible even with the definitions assigned by the three disciplines
