Cheetahs of the Serengeti Plains Timothy M. Caro, 1994-08-15 Cheetahs of the Serengeti Plains is the most comprehensive account of carnivore social behavior to date Synthesizing more than a decade of research in the wild this book offers a detailed account of the behavior and ecology of cheetahs Compared with other large cats and other mammals cheetahs have an unusual breeding system whereas lions live in prides and tigers are solitary some cheetahs live in groups while others live by themselves Tim Caro explores group and solitary living among cheetahs and discovers that the causes of social behavior vary dramatically even within a single species Why do cheetah cubs stay with their mother for a full year after weaning Why do adolescents remain in groups Why do adult males live in permanent associations with each other Why do adult females live alone Through observations on the costs and benefits of group living Caro offers new insight into the complex behavior of this extraordinary species For example contrary to common belief about cooperative hunting in large carnivores he shows that neither adolescents nor adult males benefit from hunting in groups With many surprising findings and through comparisons with other cat species Caro enriches our understanding of the evolution of social behavior and offers new perspectives on conservation efforts to save this charismatic and endangered carnivore **Zoo Biology** ,1982

Health and Welfare of Brachycephalic (Flat-faced) Companion Animals Rowena Packer, Dan O'Neill, 2021-08-06 Health and welfare issues of brachycephalic flat faced animals are one of the most pressing problems facing companion animals right now Dogs in particular are suffering from a brachycephalic crisis resulting from a perfect storm where predispositions to an array of health issues are amplified by a population boom for certain brachycephalic breeds such as the French Bulldog and Pug But yet for many owners these dogs represent the perfect companion endearing personas and cute looks in a socially desirable package So where is the truth in all of this This book will equip veterinary professionals animal welfare scientists breeders and owners with the fuller story about brachycephalic health and welfare The first half of the book provides the context of how and why we are in this crisis offering in depth historical social ethical communication nursing welfare epidemiological genetics and international perspectives The second half shifts towards the clinical arena with chapters that cover the background diagnosis treatment and prevention of the many unique healthcare needs of brachycephalic animals Cutting edge knowledge is shared on a range of disciplines including respiratory disease

Restoring Nature Lary M. Dilsaver, Timothy J. Babalis, 2023 Off the coast of California running from Santa Barbara to La Jolla lies an archipelago of eight islands known as the California Channel Islands The northern five were designated as Channel Islands National Park in 1980 to protect and restore the rich habitat of the islands and surrounding waters In the years since that mission intensified as scientists discovered the extent of damage to the delicate habitats of these small fragments of land and to the surprisingly threatened sea around them In *Restoring Nature* Lary M Dilsaver and Timothy J Babalis examine how the National Park Service has attempted to reestablish native wildlife and vegetation to the five islands through restorative ecology and public land management The Channel Islands staff were innovators of the inventory and monitoring program whereby the resource problems were exposed This program became a blueprint for management throughout the U S park system Dilsaver and Babalis present an innovative regional and environmental history of a little known corner of the Pacific West as well as a larger national narrative about how the Park Service developed its approach to restoration ecology which became a template for broader Park Service policies that shaped the next generation of environmental conservation
