Lussier, PhD and David C. Kimball, PhD , **Management Skills** W.T. Singleton, 2013-03-09 w T SINGLETON THE CONCEPT This is the third in a series of books devoted to the study of real skills The topic is management A book on social skills is still to come and it might seem that the sequence should be reversed on the grounds that social skills are obviously one element in management skills but it is appropriate to deal with management first on the criterion of increasing complexity Management skills are easier to understand than general social skills This is because the defining characteristic of a skill is a purpose The purpose of organizations in which managers operate and the tasks in which they are engaged are not easy to define but they are certainly less obscure than are the more general purposes of communities and people interactions in which the complete range of social skills is practised Skills like purposes are inherently to do with people It follows that the skills view of management will be as a people based activity Individuals carry out management tasks and these tasks always involve other individuals of whom some are subordinate some superior and some equivalent within the hierarchy of the particular management organization The concept of a hierarchy is as central to management as it is to skills The alternative to hierarchy is anarchy Management is not solely concerned with people Management Fundamentals , **Management Fundamentals : Made Easy** Dr. Mukul A. Burghate, Management is the science and art of getting people together to

accomplish desired goals and objectives by coordinating and integrating all available resources efficiently and effectively Management can be defined as all the activities and tasks were undertaken for the purpose of achieving an objective or goal by continuous activities like planning organizing leading and controlling Management is the combined or interchanged process of planning decision making organizing leading motivation and controlling the human resources financial physical and information resources of an organization to reach its goals in an efficient and effective manner The purpose of this study Material is to present an introduction to the subjects of MBA Sem I The book contains the syllabus from basics of the subjects going into the intricacies of the subjects All the concepts have been explained with relevant examples and diagrams to make it interesting for the readers An attempt is made here by the author to assist the students by way of providing Study Material as per the curriculum with non commercial considerations However it is implicit that these are exam oriented Study Material and students are advised to attend regular lectures in the Institute and utilize reference books available in the library for In depth knowledge We owe to many websites and their free contents we would like to specially acknowledge contents of website www.wikipedia.com and various authors whose writings formed the basis for this book We acknowledge our thanks to them At the end we would like to say that there is always a room for improvement in whatever we do We would appreciate any suggestions regarding this study material from the readers so that the contents can be made more interesting and meaningful Readers can email their queries and doubts to tmcnagpur@gmail.com We shall be glad to help you immediately Dr Mukul Burghate Author *Management* Leslie W.
