Challenging Behaviour Eric Emerson, Stewart L. Einfeld, 2011-02-03 Challenging behaviours are common among people with intellectual disabilities resulting in significantly reduced quality of life. These may include aggression, self injury, destructiveness, hyperactivity and inappropriate social conduct. This new edition provides a concise, accessible and contemporary summary of current knowledge about challenging behaviour drawn from psychology, psychiatry, medicine and public health. Fully updated and revised, it includes comprehensive coverage of the epidemiology and aetiology of challenging behaviours and evidence of the efficacy and effectiveness of different approaches to intervention. This edition contains significantly expanded sections on the emergence and development of challenging behaviour and strategies for prevention at the level of both individuals and service systems. Essential reading for students undertaking professional training in health and related aspects of intellectual disabilities including psychologists, psychiatrists, nurses, teachers and social workers. The Strategy-focused Organization Robert S. Kaplan, David P. Norton, 2001 In today's business environment, strategy has never been more important. Yet research shows that most companies fail to execute strategy successfully. Behind this abysmal track record lies an undeniable fact: many companies continue to use management processes that are top down, financially driven and tactical, that were designed to run yesterday's organizations. Now the creators of the revolutionary performance management tool called the Balanced Scorecard introduce a new approach that makes strategy a continuous process owned not just by top management but by everyone. In *The Strategy Focused Organization*, Robert Kaplan and David Norton share the results of ten years of learning and research into more than 200 companies that have implemented the Balanced Scorecard. Drawing from more than twenty in-depth case studies including Mobil, CIGNA, Nova Scotia Power and AT T Canada, Kaplan and Norton illustrate how Balanced Scorecard adopters have taken their groundbreaking tool to the next level. These organizations have used the scorecard to create an entirely new performance management framework that puts strategy at the center of key management processes and systems. Kaplan and Norton articulate the five key principles required for building Strategy Focused Organizations: 1. translate the strategy to operational terms 2. align the organization to the strategy 3. make strategy everyone's everyday job 4.

make strategy a continual process and 5 mobilize change through strong effective leadership The authors provide a detailed account of how a range of organizations in the private public and nonprofit sectors have deployed these principles to achieve breakthrough sustainable performance improvements Presenting a practical proven framework steeped in rich case study experience The Strategy Focused Organization helps solve a universal management problem not just how to formulate strategy but how to make it work Building on one of the most revolutionary business ideas of our time this important book shows how today s leaders can shape their own companies to meet the challenges and reap the rewards of a new competitive era Robert S Kaplan is the Marvin Bower Professor of Leadership Development at Harvard Business School David P Norton is President of Balanced Scorecard Collaborative Inc
