Partnership Governance in Public Management Seth Grossman, Marc Holzer, 2015-10-14 The ability to create and sustain partnerships is a skill and a strategic capacity that utilizes the strengths and offsets the weaknesses of each actor. Partnerships between the public and private sectors allow each to enjoy the benefits of the other: the public sector benefits from increased entrepreneurship, and the private sector utilizes public authority and processes to achieve economic and community revitalization. *Partnership Governance in Public Management* describes what partnership is in the public sector as well as how it is managed, measured, and evaluated. Both a theoretical and practical text, this book is a what, why, and how examination of a key function of public management. Examining governing capacity, community building, downtown revitalization, and partnership governance through the lens of formalized public-private partnerships, specifically how these partnerships are understood and sustained in our society, this book is essential reading for students and practitioners with an interest in partnership governance and public administration and management more broadly. Chapters explore partnering technologies as a way to bridge sectors to produce results and a new sense of public purpose and to form a stable foundation for governance to flourish.

Behn, 2004-05-26 Traditionally American government has created detailed formal procedures to ensure that its agencies and employees are accountable for finances and fairness Now in the interest of improved performance we are asking our front line workers to be more responsive we are urging our middle managers to be innovative and we are exhorting our public executives to be entrepreneurial Yet what is the theory of democratic accountability that empowers public employees to exercise such discretion while still ensuring that we remain a government of laws How can government be responsive to the needs of individual citizens and still remain accountable to the entire polity In *Rethinking Democratic Accountability* Robert D Behn examines the ambiguities contradictions and inadequacies in our current systems of accountability for finances fairness and performance Weaving wry observations with political theory Behn suggests a new model of accountability with compacts of collective mutual responsibility to address new paradigms for public management

The Blind Spots of Public Bureaucracy and the Politics of Non-Coordination Tobias Bach, Kai Wegrich, 2018-05-29 How to better coordinate

policies and public services across public sector organizations has been a major topic of public administration research for decades However few attempts have been made to connect these concerns with the growing body of research on biases and blind spots in decision making This book attempts to make that connection It explores how day to day decision making in public sector organizations is subject to different types of organizational attention biases that may lead to a variety of

coordination problems in and between organizations and sometimes also to major blunders and disasters The contributions address those biases and their effects for various types of public organizations in different policy sectors and national contexts In particular it elaborates on blind spots or not seeing the not seeing and different forms of bureaucratic politics as theoretical explanations for seemingly irrational organizational behaviour The book s theoretical tools and empirical insights address conditions for effective coordination and problem solving by public bureaucracies using an organizational perspective

Madison's Managers Anthony M. Bertelli, E. Jr. Lynn, 2006-05-01 A case for the constitutional roots of public administration Essential to the field as we develop new theories and applications in a postmodern America Political Studies Review Combining insights from traditional thought and practice and from contemporary political analysis Madison s *Managers* presents a constitutional theory of public administration in the United States Anthony Michael Bertelli and Laurence E Lynn Jr contend that managerial responsibility in American government depends on official respect for the separation of powers and a commitment to judgment balance rationality and accountability in managerial practice The authors argue that public management administration by unelected officials of public agencies and activities based on authority delegated to them by policymakers derives from the principles of American constitutionalism articulated most clearly by James Madison Public management is they argue a constitutional institution necessary to successful governance under the separation of powers To support their argument Bertelli and Lynn combine two intellectual traditions often regarded as antagonistic modern political economy which regards public administration as controlled through bargaining among the separate powers and organized interests and traditional public administration which emphasizes the responsible implementation of policies established by legislatures and elected executives while respecting the procedural and substantive rights enforced by the courts These literatures are mutually reinforcing the authors argue because both feature the role of constitutional principles in public management Madison s *Managers* challenges public management scholars and professionals to recognize that the legitimacy and future of public administration depend on its constitutional foundations and their specific implications for managerial practice
