Badiru, 2025-05-01 This volume focuses on the broad scope of systems engineering and recent energy technology developments as they relate to the oil and gas industry which remains a lifeline to communities around the world In 2015 the United Nations adopted the 17 Sustainable Development Goals SDGs to among other things curtail the catastrophe that will befall the world from the increasing menace of global warming and climate change The best way to achieve most or all the goals is to use a comprehensive systems based approach specifically leveraging the efficacy of systems engineering for project management in the oil and gas industry Systems Engineering and Technology presents the systems based interrelationships of energy generation transmission distribution and consumption This volume will expand on elements of the first edition to encapsulate new developments in technologies from a systems approach In tackling climate change problems both qualitative and quantitative approaches must be pursued This allows us to bring in technological approaches as well as human centered social considerations The premise of this volume is that a systems engineering approach is the key to making the desired progress where renewables and conventional oil and gas can coexist This book contains a mix of technical social economic engineering and political considerations ideal for practitioners designers consultants contractors risk and quality managers along with project managers and systems engineers involved in oil and gas projects and related industries **Increasing Student Engagement and Retention Using Immersive Interfaces** Charles Wankel, Patrick Blessinger, 2012-12-05 Uses case studies surveys and literature reviews to critically examine how gaming simulation and virtualization are being used to improve teamwork and leadership skills in students and create engaging communities of practice This volume discusses a framework for deploying and assessing these technologies *Reconstructing Relationships in Higher Education* Celia Whitchurch, George Gordon, 2017-06-14 Drawing on two international research projects Reconstructing Relationships in Higher Education Challenging Agendas looks behind formal organisational structures and workforce patterns to consider the significance of relationships particularly at local and informal levels for the aspirations and motivations of academic faculty In practice and day to day such relationships can overlay formal reporting lines and therefore inform to a greater or lesser

extent the overall relationship between individuals and institutions As a result from an institutional point of view relationships may be a critical factor in the realisation of strategy and can in practice have a disproportionate effect both positively and negatively However little attention has been paid to the role that they play in understanding the interface between individuals and institutions at a time of ongoing diversification of the workforce For instance they may provide space which in turn may be implicit and discretionary in which negotiation and influence can occur In this context Reconstructing Relationships in Higher Education also reviews ways in which institutions are responding to more agentic approaches by academic faculty particularly younger cohorts and the significance of local managers mentors and academic networks in supporting individuals and promoting career development The text which examines the dynamics of working relationships at local and institutional level will be of interest to senior management teams practising managers at all levels academic faculty and researchers in the field of higher education
