Managing Managed Care Robert Langs, 2009-02-19 Managing Managed Care is the first comprehensive exploration of the many issues and challenges faced by both providers and patients who work under the auspices of managed care insurers The distinctive conditions of managed care treatment are scrutinized in detail and their effects and optimal management are carefully presented The book makes extensive use of the author s unique in depth understanding of the human mind and pays attention to both the consciously mediated effects of the conditions of managed care treatment and to the especially powerful largely unappreciated effects that are mediated unconsciously The result is a well grounded extensive practical guide to dealing effectively with the inevitable intrusions into the therapeutic relationship and with other common issues that are characteristic of managed care therapy The recommendations proposed by the author can turn a failing treatment experience into one that brings symptom relief to the patient and satisfaction to the therapist While the author is critical of many practices endorsed by managed care insurers and in use by their providers he takes pains to propose basic improvements in these areas In addition the positive features of this treatment modality are given full consideration including ways to enhance their favorable effects The book uniquely provides critical insights for therapists and psychiatrists of all backgrounds and all levels of clinical experience in ways that will greatly enhance their work with managed care patients

Managed Care Marge Conger, 1999-01-27 Of all the recent changes in health care none have more

dramatically affected both patients and care providers than managed care. Not only has it altered the way we pay for health care but also it has compelled a change in the way we approach health care focusing increasingly on preventive care to reduce costs. In *Managed Care*, Dr Margaret M Conger and her colleagues examine the impact of managed care on nursing as a profession and nurses as individual caregivers. Organized into three sections, *Managed Care* looks at the nature of managed care nursing strategies in acute care hospitals and nursing strategies in community settings. Section I examines the evolution of managed care definitions and issues informing this method of service delivery and nursing involvement in quality of care and case management. In Section II the authors look at acute care settings discussing the use of nurse extenders, advanced practice nursing, case management, automated clinical pathways and outcome research. Section III addresses the community settings and explores case management, advanced practice roles in community health clinics and collaboration in primary care settings. *Managed Care* will serve as an excellent course text on nursing and managed care as well as being a useful introduction and shelf reference for professional nurses at all levels.

Mental Health Providers Guide To Managed Care Leonard Reich, Andrew Kolbasovsky, 2006. For both patients and providers, the words managed care are loaded with negative connotations synonymous with inefficiency and bureaucracy. Forced to perform a delicate balancing act of offering the best possible care for their clients while carefully adhering to various managed care policies and procedures, providers in particular often wince at the prospect of having to deal with managed care companies or MCOs. Fearing burdensome paperwork, low reimbursement rates and denials of care, it's not surprising that a number of mental health professionals choose to limit their involvement with managed care companies or eliminate it altogether. My clients are all on different health plans; how can I keep the policies straight? Getting services approved is so time consuming that I'm better off accepting only self-paying clients, aren't I? Do the benefits of working with MCOs really outweigh the drawbacks? The answer, according to two industry insiders, is yes. If you know how to work with the system, the system can work for you. *Mental Health Provider's Guide to Managed Care* is the first handbook of its kind to offer clinicians a window into the inner workings of MCOs. Authors Reich and Kolbasovsky candidly draw on their combined 37 years experience in the

field to walk readers through all the major elements of how to successfully work within the system marketing yourself and your practice to an MCO getting onto a MCO's network maintaining a good relationship and communicating with MCOs for quick service approval reducing your liability understanding your rights and responsibilities getting paid and more Every issue big and small is covered from capitation versus fee for service payment arrangements to evaluating which MCOs are a good fit to join and everything in between After explaining how to work with the system the authors reveal how to put the system to work for you Tips for building your practice through referrals generating business through doctor collaboration and understanding future practice opportunities are all covered By demystifying the complexities of managed care and offering a unique inside view of the process this book mitigates the negative connotations associated with MCOs and exposes the hidden benefits of a seemingly burdensome process Exceedingly reader friendly and packed with insightful tips and vignettes *Mental Health Provider's Guide to Managed Care* is one clinician's guide you won't want to be without **Ethical**

Challenges in Managed Care Karen Grandstrand Gervais, 1999 Through twenty case studies that illustrate a wide range of ethical challenges this book explores the goals methods and practices of managed care and offers practical guidance for addressing the ethical and policy issues inherent in such a system *Essentials of Managed Health Care* Peter Reid Kongstvedt, 2003

Managing care pathways for patients with complex care needs Magdalena Smeds, 2019-05-15 One of the central challenges for the healthcare system today is how to manage care for patients with complex needs This patient group is not well defined but covers patients with serious diseases and comorbidities or with a limited ability to perform basic daily functions due to physical mental or psychosocial challenges This group has a high service and resource utilisation resulting in high costs for the healthcare system and typically poor health outcomes To improve care for these patients it is necessary to implement strategies to manage the differentiated care needs the additional support needs the uncertainty in care delivery and the coordination needs of the involved providers and the patient Care pathways are increasingly used internationally to make care more patient centred and to structure and design care processes for individual patient groups Important elements in care pathways include structuring care activities by defining their content and sequence coordinating between providers and professionals and involving patients in their care process In this thesis care pathways are proposed as the overall strategy for managing care for patients with complex care needs The purpose of this thesis is thus to contribute with knowledge on how care pathways can be managed for patients with complex care needs This is achieved by analysing how the practices coordination standardisation customisation and personalisation can support management of care pathways and by discussing how these practices influence quality of care The quality of care dimensions discussed are accessible timely equitable and patient centred care The empirical context in this thesis is the Standardised Cancer Care Pathways CCPs which were implemented in Sweden from 2015 to 2018 CCPs is the umbrella term for the national initiative to shorten waiting times decrease regional differences and reduce fragmentation in care processes CCPs include elements such as

diagnosis specific pathways and guidelines introduction of CPP coordinators and mandatory reporting of waiting times Focus has been on implementing care pathways for 31 cancer diagnoses in all Swedish healthcare regions Both qualitative and quantitative research methods have been used A case study was conducted to examine standardised and customised care pathways and coordination and multidisciplinary work in care pathways A document study of regional reports on CCPs was analysed to study effects of care pathways on accessibility timeliness and equitability Finally a national survey was conducted to deepen the understanding of the role of coordination as performed by coordinators in care pathways This thesis argues that standardised and customised care pathways should be combined to manage care for patients with complex care needs The customised pathway in particular benefits patients with serious unspecific symptoms unknown primary tumour or more complex care needs while patients with care needs that can be treated independently of the main diagnosis benefit from following a standardised care pathway Coordinators are an important means to manage coordination customisation and personalisation in the care pathway The coordinators role is twofold the first role is to manage care pathways by customising the care pathway and coordinating involved providers the second role is to support and guide patients through the care pathway This can be achieved by adapting interpersonal communication with patients through personalisation This thesis further argues that care pathways have most potential to positively influence accessibility timeliness equitability and patient centredness Accessibility has been positively influenced especially for patients with ambiguous symptoms where symptoms indicating cancer have improved their chances of accessing cancer diagnostics A negative aspect of prioritising patients who follow CCPs has been the potentially longer waiting times for other patient groups in equal need of urgent care Notwithstanding prioritised access to care is perceived to positively influence timeliness for patients following CCPs Care pathways are perceived to have positively influenced patient centredness by shifting the focus from what to deliver to how to deliver it

Managed Care Pharmacy Practice Robert P. Navarro, 2008-12-11 **Managing to Care** Ann E. P. Dill, The point of departure for Managing to Care is widespread concern that the present delivery of health and social welfare services is fragmented uncoordinated inefficient costly wasteful and ultimately detrimental to clients health and wellbeing Dill traces the evolution of case management from its start as a tool for integrating services on the level of the individual client to its current role as a force behind the most significant trends in health care Those trends include the entrenchment of bureaucracy the challenges of once dominant professions and the rise of corporate control The author s purpose in adopting this analysis is to invite further scrutiny of the case management profession and at the same time to identify new possibilities for its application This volume brings together thoughts developed over many years of observing and participating in case management programs It provides a multilayered perspective of case management showing linkages among its social and historical contexts and the ways it is practiced today in diverse service settings The author emerged convinced about the essential need for care coordination and that present ways of providing care can work against our highest objectives in doing

so The paradoxes and contraindications embedded in case management practice became a major theme of the book *Managing to Care* is highly critical of the ways case management has come to absorb and reflect the organizational flaws of the very service systems it was intended to reform Too often management of the case comes to dominate care The author does not call for a rejection of professional systems in favor of a resurrected informal community While much can and should be done to strengthen our ties to one another there will always be people whose problems require more expert help Dill argues here that case management can provide such help and provide it well but only if it is grounded in the human dimension of a caring relationship Ann E P Dill associate professor of sociology and gender studies at Brown University is a medical sociologist and social gerontologist Her research examines issues affecting the long term provision of health care and social services both in the United States and in countries formerly part of Yugoslavia Physician Practice Management Lawrence F. Wolper, 2005 *Health Sciences Professions* *Three Realms of Managed Care* Jack Glaser, 1997 Glaser and Hamel offer readers an opportunity to step back from the ethical issues connected with modern health care and reflect on what we are doing how we are doing it and what impact our actions and omissions are having on the common good While offering a new ethical paradigm that takes into account the three realms of ethical complexity societal issues institutional issues and individual issues this book offers articles for reflection and self examination on various aspects of managed care taking into account specific issues such as rationing financial incentives and full disclosure
