Kaluzny, *Managing Disruptive Change in Healthcare* Arnold D. Kaluzny, Donna M. O'Brien, 2015 Healthcare faces unprecedented global challenges Rapid advances in genomics computational sciences and technology as well as the new focus on value based care and an increased trend toward healthcare commercialization represent disruptive changes to an already fragmented delivery system The healthcare establishment has been slow to adapt and now faces rising cancer care costs and lags in outcome improvement and genomically informed interventions *Managing Disruptive Change in Healthcare* codifies the US National Cancer Institute's lessons from utilizing a public private partnership with community hospitals to navigate the change needed to increase patient access to high quality cancer care and enhance hospitals capacity to conduct and support research initiatives The treatment of complex diseases requires a delivery system capable of translating scientific advances into care that is coordinated across the full continuum this book offers a blueprint to just such an infrastructure **Journal of the National Cancer Institute**, 1990 **Bridging the Gap Between Practice and Research** Institute of Medicine, Committee on Community-Based Drug Treatment, 1998-08-11 Today most substance abuse treatment is administered by community based organizations If providers could readily incorporate the most recent advances in understanding the mechanisms of addiction and treatment the treatment would be much more effective and efficient The gap between research findings and everyday treatment practice represents an enormous missed opportunity at this exciting time in this field Informed by real life experiences in addiction treatment including workshops and site visits *Bridging the Gap Between Practice and Research* examines why research remains remote from treatment and makes specific recommendations to community providers federal and state agencies and other decision makers The book outlines concrete strategies for building and disseminating knowledge about addiction for linking research policy development and everyday treatment implementation and for helping drug treatment consumers become more informed advocates In candid language the committee discusses the policy barriers and the human attitudes the stigma suspicion and skepticism that often hinder progress in addiction treatment The book identifies the obstacles to effective collaboration among the research treatment and policy sectors evaluates models to address these barriers and looks in detail at the issue from the perspective of the community based provider and the researcher **Continuous Quality Improvement in Health Care** Curtis P. Bennett,Tammy Stinson,2007-08-20 Policy and outcome studies represent a new area of research in oncology Understanding the factors that affect quality of life costs of care patterns of care and outcomes in oncology is important to providing comprehensive care Health services is meant to be both a productive area of research as well as a discipline that improves patient decision making In sum Cancer Policy highlights some of the important areas of health services research in oncology Alcoholism Marc Galanter,2008-04-08 From the President of the Research Society on Alcoholism On behalf of the Research Society on Alcoholism I welcome the important contribution that Volume 15 of this excellent series on Recent Developments in Alcoholism brings to our field It is not enough for our scientists to develop effective and efficient methods to identify and treat alcohol abuse and alcohol dependence the availability of these services is often limited and it is certainly nonexistent for the early problem drinker In nineteen outstanding chapters Volume 15 deals with organizational issues concerning access to and delivery of substance abuse treatment and the role of managed care Several chapters deal with economic issues cost benefits and financing of these services Lastly five address recent treatment outcome studies Thus this volume will be of great value to both scientists and practitioners The Editor and Associate Editors are congratulated for this conceptual and organizational accomplishment Yedy Israel Ph D McLaughlin and Kaluzny's Continuous Quality Improvement In Health Care William A.
