Managing Displacement Jennifer Hyndman, 2000 *Handbook on the Governance and Politics of Migration* Emma Carmel, Katharina Lenner, Regine Paul, 2021-04-30 This innovative Handbook sets out a conceptual and analytical framework for the critical appraisal of migration governance Global and interdisciplinary in scope the chapters are organised across six key themes conceptual debates categorisations of migration governance regimes processes spaces of migration governance and mobilisations around it **The Politics of Humanitarian Technology** Katja Lindskov Jacobsen, 2015-06-05 This book offers a detailed exploration of three examples of humanitarian uses of new technology employing key theoretical insights from Foucault We are currently seeing a humanitarian turn to new digital technologies such as biometrics remote sensing and surveillance drones However such humanitarian uses of new technology have not always produced beneficial results for those at the receiving end and have sometimes exposed the subjects of assistance to additional risks and insecurities Engaging with key insights from the work of Foucault combined with selected concepts from the Science and Technology Studies literature this book produces an analytical framework that opens up the analysis to details of power and control at the level of materiality that are often ignored in liberal histories of war and modernity Whereas Foucault details the design of prisons factories schools etc this book is original in its use of his work in that it uses these key insights about the details of power embedded in material design but shifts the attention to the technologies and attending forms of power that have been experimented with in the three humanitarian endeavours presented in the book In doing so the book provides new information about aspects of liberal humanitarianism that contemporary critical analyses have largely neglected This book will be of interest to students of humanitarian studies peace and conflict studies critical security studies and IR in general

Fragments of Home Tom Scott-Smith, 2024-09-03. Abandoned airports, shipping containers, squatted hotels. These are just three of the many unusual places that have housed refugees in the past decade. The story of international migration is often told through personal odysseys and dangerous journeys but when people arrive at their destinations a more mundane task begins: refugees need a place to stay. Governments and charities have adopted a range of strategies in response to this need. Some have sequestered refugees in massive camps of glinting metal. Others have hosted them in renovated office blocks and disused warehouses. They often end up in prefabricated shelters flown in from abroad. This book focuses on seven examples of emergency shelter from Germany to Jordan which emerged after the great summer of migration in 2015. Drawing on detailed ethnographic research into these shelters, the book reflects on their political implications and opens up much bigger questions about humanitarian action. By exploring how aid agencies and architects approached this basic human need, Tom Scott-Smith demonstrates how shelter has many elements that are hard to reconcile or combine: shelter is always partial and incomplete, producing mere fragments of home. Ultimately, he argues that current approaches to emergency shelter have led to destructive forms of paternalism and concludes that the principle of autonomy can offer a more fruitful approach to sensitive and inclusive housing.

Refugees in Extended Exile Jennifer Hyndman, Wenona Giles, 2016-10-04. This book argues that the international refugee regime and its temporary humanitarian interventions have failed. Most refugees across the globe live in protracted conditions that extend from years to decades without legal status that allows them to work and establish a home. It is contended that they become largely invisible to people based in the global North and cease to remain fully human subjects with access to their political lives. Shifting the conversation away from the salient discourse of solutions and technical fixes within state-centric international relations, the authors recover the subjectivity lost for those stuck in

extended exile The book first argues that humanitarian assistance to refugees remains vital to people's survival even after the emergency phase is over It then connects asylum politics in the global North with the intransigence of extended exile in the global South By placing the urgent crises of protracted exile within a broader constellation of power relations both historical and geographical the authors present research and empirical findings gleaned from refugees in Iran Kenya and Canada and from humanitarian and government workers Each chapter reveals patterns of power circulating through the colonial present Cold War legacies and the global war on terror Seeking to render legible the more quotidian struggles and livelihoods of people who find themselves defined as refugees this book will be of great interest to international humanitarian agencies as well as migration and refugee researchers including scholars in refugee studies and human displacement human security globalization immigration and human rights

Humanitarian Borders Polly Pallister-Wilkins, 2022-06-07 Winner of the International Political Sociology book award for 2023 What does it mean when humanitarianism is the response to death injury and suffering at the border This book interrogates the politics of humanitarian responses to border violence and unequal mobility arguing that such responses mask underlying injustices depoliticise violent borders and bolster liberal and paternalist approaches to suffering Focusing on the diversity of actors involved in humanitarian assistance alongside the times and spaces of action the book draws a direct line between privileges of movement and global inequalities of race class gender and disability rooted in colonial histories and white supremacy and humanitarian efforts that save lives while entrenching such inequalities Based on eight years of research with border police European Union officials professional humanitarians and grassroots activists in Europe's borderlands including Italy and Greece the book argues that this kind of saving lives builds expands and deepens already restrictive borders and exclusive and exceptional identities through what the book calls humanitarian borderwork
