**Research Methods in Neurochemistry** Neville Marks, Richard Rodnight, 2013-11-27 This fifth volume of Research Methods in Neurochemistry represents a milestone in that it marks almost a decade since the inception of the series Over these ten years there has been an almost exponential growth in neuro chemistry accompanied by numerous technical developments This is the justification for our series inevitably we have only been able to cover a fraction of the methodological innovations of the last decade but we have tried as much as possible to create a balance between the different approaches and philosophies in the study of the chemical basis of brain function Thus our original format of grouping chapters under various headings for instance studies in intact tissues as distinct from studies describing constituents and isolated enzymes appears to be justified Studies on whole animals or tissues retaining cellular organization are vital in providing insights into the neurochemical mechanism underlying functional processes at the same time the eventual understanding of function can only be attained on the basis of knowledge of the molecular architecture of the tissue In the present volume Oldendorfs chapter on the transport of radiolabeled metabolites across the blood brain barrier illustrates one side of this equation whereas Poduslo s chapter on the separation of oligodendroglia cells provides new information on the role of these cells in myelogenesis and the distinctive chemical composition of glia as compared to neurons

**Milestones & Guideposts of Massachusetts and Southeastern New Hampshire** Mary E. Gage, James E. Gage, 2014-02-03 Across Massachusetts roadsides are dotted with small stone markers giving the mileage to major cities These ancient road signs called milestones aided travelers during the 1700 s and 1800 s as our road signs today do with their mileage and destination information Although these old milestones no longer serve a useful purpose in our modern age of highways they continue to fascinate us This fascination has led to the preservation by local communities of at least 129 milestones in Massachusetts and a number of milestones in New Hampshire Milestones were for the most part commissioned by private citizens and made by local or itinerant stone carvers With the exception of the turnpike milestones no two milestones are alike There are differences in the type of stone chosen the wording and the lettering styles of individual carvers These differences give the milestones personality and character This sense of character is one of the endearing aspects of these humble road signs that continues to draw us to them Although some of the milestones like those around Boston and those along the famous Upper Post Road are well known many are not The authors have spent a number of years combing through old books and newspapers and traveling through the state in search of these local historical treasures This book draws together all of their research in an effort to provide a comprehensive inventory of Massachusetts milestones In addition it includes milestones the authors have found in their travels through southeastern New Hampshire
