problems its people are better off than ever before in terms of prosperity and personal freedom *A Tale of Three Cities*
Barbara Czarniawska-Joerges, 2002 Cities are complex sprawling diverse places They are organized but disorganized
managed but unmanaged orderly but disorderly Modern metropolitan cities reproduce themselves and we are familiar with
the common icons that are replicated in every part of the globe but how should we understand cities For the past five years
Professor Czarniawska has been leading a research project on globalization and the management of cities Rather than seeing
the city as a conurbation or a location of economic activity or in terms of governance and administration Czarniawska
explores the city as an action net An action net of this sort includes various organizations municipal state private and
voluntary and non organized individuals Such an approach was designed to avoid the fallacy of viewing the big city as one big
organization The city is thus conceived as a particularly complex and disorderly action net a seamless web of
interorganizational networks where the city administration proper constitutes just one point of entry and by no means
provides a map of the entire terrain The research focuses on three European capitals Warsaw Stockholm and Rome At the
outset leading politicians and officials in each city listed the major problems and projects that the city was engaged in for
example environmental reforms improvement of public utilities privatization financial targets etc The author selected a
number of these for more detailed study reporting upon interesting similarities and differences between the approaches
taken The book aims to explore organizing processes in their local context while following the connections between such
contexts
